"Nec Verba nec Res—Carlstadt;" see *Wickliffites, Protestants, Calvinists, Lutherans, Presbyterianism, Wittenberg, &c.* The eras of the reformation are as follows:—

The return of the malady led to the prince of Wales (afterwards George IV.) being sworn in before the privy council as regent of the kingdom, 5 Feb. 1811. REGENT'S CANAL, begun at Paddington, where it joins a cut to the Grand Junction, passes under Maida-hill, continues its course by the Regent's park to Islington, where another subterranean excavation, about three-quarters of a mile in length, was formed for its passage. It then proceeds by Hoxton, Hackney, Mile-end, to Limehouse, where it joins the Thames. The whole length of it is nine miles; it comprises twelve locks and thirty-seven bridges. The park consists of about 450 acres; within it are the gardens of the Zoological Society and the Royal Botanical Society. "The feeling of reverence which men entertain towards a Supreme Being or to any order of beings conceived by them as demanding reverence for the possession of superhuman control over the destinies of man or the powers of nature; more especially the recognition of God as an object of worship, love, and obedience." There are numerous classifications of religions. Hegel distributes them into religions of nature, religions of spirituality, and the absolute or Christian religion. Professor Tiele's classification includes nature religions and ethical religions; the former comprehending animism, polytheism, anthropomorphic polytheism, &c.; the latter comprehending Confucianism, Taoism, Brahminism, Buddhism, Mohammedanism, Judaism, and Christianity. The

science of religion comprises the psychology, the history of religions, and comparative theology. Hume may be said to have initiated the study of religion as a process of mind and the factors which condition and determine its development in his "Natural History of Religion," 1759. During the 19th century the study of comparative religions was taken up and has made great progress in Germany, France, and England by the investigations of philosophers and scholars like Von Hartmann, Pfleiderer, Reville, Kuenen, Renouf, Max Müller, Herbert Spencer, D'Alviella, De la Saussaye, Tylor, Lubbock (lord Avebury), Rhys, Davids, Rawlinson, Lang, and others.

The following table gives the latest distribution and percentages of the leading religions of the world according to Dr. H. Zeller, director of the Stuttgart Statistical Bureau:—

REMISSION OF PENALTIES ACT, see *Sunday*.

REMONSTRANCE, THE GRAND, drawn up by the house of commons, and presented to king Charles I., 1 Dec. 1641. It consisted of 206 articles, dwelt bitterly on all the king's illegal and oppressive acts, and was printed by order of the house.

REMONSTRANTS, see *Arminians*.

RENAISSANCE, a term applied to the revival of the study of classic literature and art in the 15th and 16th centuries, under the patronage of the Medici and others; see *Painters*, and *Sculptors*.

RENSBURG (Holstein), was taken by the imperialists in 1627; by the Swedes in 1643; and by the Prussians and confederate troops in 1848. The first diet of Schleswig and Holstein met here 3 April, 1848. It was re-occupied by the Danes in 1852, and taken by the Prussians after a serious conflict, 21 July, 1864.

RENNES (capital of Brittany, N. W. France). Here was established by Henry II., in 1553, the parliament so celebrated for its independence, especially in its struggle with the court, 1788-89. On 20 May, 1788, it declared infamous every one who should take part in the *cour plénière* then proposed, but afterwards suppressed. Here took place the re-trial of the Dreyfus case (which see) 1899. Population in 1901, 74,006; 1910 (est.) 81,400.

RENTS said to have been first made payable in money, instead of in kind, about 1135. Numerous statutes have been enacted in various reigns to

define the relations and regulate the dealings between landlord and tenant. 8 & 9 Vict. c. 106 (1845) regulates leases. By the act 8 Anne, 1709, no goods are removable from tenements under an execution until the rent shall have been paid to the landlord by the sheriff, 1709. The rental of England, including land, houses, and mines, was 6,000,000*l.* about the year 1600, and twelve years' purchase the value of land. About 1690, the rental amounted to 4,000,000*l.*, and the land was worth eighteen years' purchase. *Davenport on the Revenues*. The rental of the United Kingdom was estimated during the nineteenth century at 127,000,000*l.*; Great anti-rent agitation in Ireland, 1879, *et seq.*; see *Land, Ireland, and Irish Land Act*, 1903.

REPEAL OF THE UNION, IRELAND. An Irish association was formed with this object under the auspices of Mr. O'Connell, in 1829. See *Home Rule and Ireland*.

A proclamation of the lord lieutenant prohibited the meetings of a society "leagued for the purpose of procuring a repeal of the union, under the name of the Irish Society for Legal and Legislative Relief, or the Anti-Union Society" . . . 18 Oct. 1830. The commons, by a majority of 484, reject Mr. O'Connell's motion for repeal . . . 27 April, 1834. A new association in 1841, 1842, and 1843 became more violent. Assemblies of the lower classes of the people were held in the last-named year, in various parts of Ireland, some of them amounting to 150,000 persons.

A meeting to be held at Clontarf, on 8 Oct., 1843, was prevented by government; and Mr. O'Connell and his chief associates were brought to trial for political conspiracy, 15 Jan. 1844; and convicted 12 Feb.; but the sentence was reversed by the house of lords, 4 Sept.; see *Trials*.

The association for the repeal of the union continued for some time under the direction of Mr. John O'Connell, but was little regarded.

The total "repeal rent" is said to have amounted to 134,379*l.*

A fruitless attempt was made in Dublin to revive repeal agitation . . . 4 Dec. 1860. See *Home Rule and Ireland* for the revival of the home rule movement.

REPORTING. The publication of the debates in parliament is forbidden as a breach of privilege, but was virtually conceded, after a severe struggle, in 1771.* Reporters' galleries were erected in the houses of parliament after the fire of 1834. To the unfettered liberty of reporting we doubtless owe much of our freedom and good government; see under *Law*. By the verdict for the defendant in the case of *Wason v. The Times* (for libel) reports of parliamentary debates were decided to be privileged, Nov. 1868. For the attempted exclusion of reporters, see *Parliament*, 1875. A commons committee on reporting recommend continuance of Hansard's debates with improvement, May, 1879.

The publication of Hansard's parliamentary debates began 1803 and closed in 1888. Latterly a subsidy was granted. The publication of the debates was taken up by Messrs. Macrae, Curteis & Co., Feb. 1889; and continued by the Hansard Publishing Union, limited, 1889; the Union

* Very inaccurate reports of parliamentary debates were inserted in the *Gentleman's Magazine* and other periodicals in the middle of the eighteenth century. Miller, printer of the *London Evening Mail*, was arrested in the city of London, by order of the house of commons, for publishing the debates, but was discharged by the lord mayor, who for doing this was sent to the Tower, where he remained until the end of the session. No opposition was made to the publication of the debates in the next session, 1772.

REPRESENTATION OF THE PEOPLE ACT FOR ENGLAND, passed 15 Aug. 1867; for Ireland and Scotland, 13 July, 1868; a new act passed, 6 Dec. 1884. See *Reform*.

The *Representative*, a daily Tory paper, was started by Mr. John Murray, the bookseller, in opposition to the *Times*, in 1826. Although he was assisted by Mr. Benjamin Disraeli and other eminent persons, the project was unsuccessful; the first number appeared 25 Jan., the last . . . 29 July, 1826.

"**REPTILE BUREAUCRACY**," term applied in Germany to certain journalists writing for government pay, 1871, *et seq.*

REPUBLICANS, see *Democrats*. The name adopted by the Northern party in the United States, N.A., opposed to the democrats in the South. It is stated that the first delegate-nominating convention in the United States that adopted the name Republican party, was held in Strong, Franklin county, Maine, 7 Aug. 1854. Sir Charles Dilke, M.P. professed himself a republican at public meetings and was much applauded, Nov. 1871; but at some places his appearance led to riotous proceedings. His motion for returns respecting the expenditure of the civil list by queen Victoria was negative in the house of commons (2-276), 19 March, 1872. A national republican conference of delegates was held at Sheffield, 1 Dec. 1872, when a national flag was adopted.

REQUIEM, a solemn mass, sung for the dead, so called from the introtit "Requiem Æternam," &c. Palestrina's Requiem was printed at Rome, 1591; Vittoria's at Madrid, 1605; Mozart's last work was a requiem, 1791.

REDOS, the screen or decorated portion of the wall behind the altar in a church.

A highly sculptured redos, designed by sir G. G. Scott, was erected in Exeter cathedral, by subscription . . . 1873.

Prebendary Philpotts, the chancellor, and others who objected, brought their objections before the bishop's visitation court, on 7 Jan.; it was decided that the bishop had jurisdiction in the matter, and he ordered the redos to be removed, 15 April, 1874. Dean Boyd appealed to the court of arches, and sir R. Phillimore reversed the previous decision . . . 6 Aug. 1874.

Prebendary Philpotts appealed to the judicial committee of the privy council, who decided that the redos should remain . . . 24 Feb. 1875.

The magnificent redos set up in St. Paul's Cathedral, London, was protested against as idolatrous by some of the London clergy, April, 1888. An action against the dean having been stopped by the bishop, the queen's bench division ordered the bishop to withdraw his veto upon the prosecution, 1 June, 1889. After further litigation, the house of lords sustained the bishop's veto . . . 20 July, 1891.

RESERVE FORCES. In the summer of 1859, acts were passed to provide for the establishment of a military reserve force of men who had been in the service (not to exceed 20,000), and a volunteer reserve force of seamen not to exceed 30,000. These acts were consolidated and amended in 1867, 1882 and 1896. The reserve forces called out by proclamation, on account of possible war with Russia,

2 April, 1878. About 35,000 good soldiers appeared, and were commended. They were disbanded 31 Aug. 1878. Again called out on account of war in Egypt, 25 July, 1882, and prospect of war with Russia, 27 March, 1885. Average of army reserve: 1888, 55,200; 1890, 56,082; 1893, 76,874; 1896, 78,057; 1904, 77,673. Important changes to be made to meet exigencies during war time, act passed, 1 July, 1898. Reserve called out and sent to the front during South African war, 1899-1902. Under the Haldane scheme (1907) a "Special Reserve" was formed, consisting of the old militia force, with a nominal strength of 80,000 men. The actual strength (1 Jan., 1909) was 67,780 men. The Special Reserve is liable for foreign service.

RESONATOR, a small apparatus, placed in the mouth to strengthen and increase the volume of the voice in singing, invented by signor Alberto Bach, who exhibited its effects at the Royal Academy of Music, 29 June, 1880.

RESTORATION, THE, of king Charles II. to the crown of England, after an interregnum of eleven years and four months, between 30 Jan. 1649, when Charles I. was beheaded, and 29 May, 1660, when Charles II. entered London amidst the acclamations of the people. The annual form of prayer, with thanksgiving, then appointed, was ordered to be disused by 22 Vict. c. 2, 25 March, 1849. See *France*, 1814, 1815.

RETREAT OF THE TEN THOUSAND GREEKS, who had joined the army of the younger Cyrus in his revolt against his brother, Artaxerxes Mnemon. The Greeks were victors, but Cyrus was defeated and slain at the battle of Cunaxa, 401 B.C. Artaxerxes having enticed the Greek leaders into his power and killed them, Xenophon was called to the command of his countrymen. Under continual alarms from sudden attacks, he led them across rapid rivers, through vast deserts, over the tops of mountains, till he reached the sea. The Greeks returned home after a march of 1155 parasangs or leagues (3465 miles), which was performed in 215 days, after the absence of fifteen months. This retreat has been immortalised by the account given by its conductor, in his "Anabasis Cyri" (Expedition of Cyrus).

REVISING BARRISTERS' COURTS, to examine the lists of voters for members of parliament, were instituted by the Reform Act of 1832.

REVISION, see under *Bible*. Advocates of the revision of the French constitution, chiefly Bonapartists or Jeromists, termed *Revisionists*, Feb. 1884.

REVIVALS on the subject of religion arose in the United States in 1857. In the autumn of 1859, they began in Scotland, the north of Ireland (particularly Belfast), and England. Many meetings were held for prayers and preaching throughout the week, as well as on Sundays. The "twelve days' mission," a series of revival services, took place in many London churches during advent, 1869.

Mr. Moody, preacher (born 1837, died 22 Dec. 1899), and Mr. Sankey, singer, American Revivalists, visited many towns in the United Kingdom, 1874-5. Their meetings in London began at the Agricultural-hall, 9 March, about 15,000 present; at the Queen's theatre, Haymarket, 12 April-31 May; farewell meeting, 12 July, 1875. Moody and Sankey again in London, 6 Oct. 1881; 3 Nov. 1883-23 June, 1884. Revival in Wales, chiefly the result of the preaching of Evan Roberts, a young miner of N. Wales; decrease of crime and drunkenness reported as an outcome of the movement, which spread throughout Wales in 1904-5. The Torrey-Alexander mission opened at the Albert-hall, London, 4 Feb., and at Brixton, 8 April, 1905. See *Salvation Army*.

REVOLUTIONARY TRIBUNAL, established at Paris, Aug. 1792.

Up to 27 July, 1794, when Robespierre was deposed, it had put to death 2774 persons, including queen Marie Antoinette, the princess Elizabeth, and a large number of nobility and gentry, male and female. The oldest victim was counsellor Dupin, aged 97; the youngest, Charles Dubost, aged 14. From 27 July to 15 Dec. 1794, only Robespierre and his accomplices (about 100) suffered by it.

REVUE DES DEUX MONDES, the French literary and historical periodical published on the 1st and 15th of each month, first appeared in 1831. It includes among its contributors the most eminent writers in France.

REYNARD THE FOX, "**REINEKE FUCHS**," a satirical epic in low German, in which beasts are actors and speakers, was first printed as Reineke Vos, at Lubeck in 1498, and professes to be written by Hinreck van Alkmer. It has been frequently translated. Goethe's version in High (or literary) German hexameters appeared in 1794. Jacob Grimm has shown that the subject-matter of this "Thier-sage" or "beast-fable" is very ancient, many incidents being found in Pilpay and other oriental writers. The early French had a "Roman de Renart," and "Renart le Nouvel." A poem, entitled "der Reinaert," in Flemish, was known in the 11th century; Caxton's translation in English prose was printed 1481; a poetic English translation of Goethe's version, by T. J. Arnold, appeared in 1855.

RHEGIUM (now Reggio), S. Italy, a Greek colony, flourished in the 5th century, B.C. It was held by the Campanian legion, 281-271, afterwards severely punished for its rebellion. Reggio was taken by Garibaldi, Aug. 1860.

RHEIMS (N. France). The principal church here, built before 406, rebuilt in the 12th century, is now very beautiful. The corpse of St. Remy, the archbishop, is preserved behind the high altar, in a magnificent shrine. The kings of France were crowned at Rheims; probably because Clovis, the founder of the French monarchy, when converted from paganism, was baptized in the cathedral in 496; the only kings not crowned here down to 1825, were Henry IV., Napoleon I., and Louis XVIII. Several ecclesiastical councils have been held here. The city was taken and retaken several times in the last months of the French war, 1814. RHETORIC. Rhetorical points and accents were invented by Aristophanes of Byzantium, 200 B.C. Rhetoric was first taught in Latin at Rome by Photius Gallus, about 87 B.C. He taught Cicero, who said "We are first to consider what is to be

said; secondly, how; thirdly, in what words; and lastly, how it is to be ornamented." A regius professor of rhetoric was appointed in Edinburgh, 20 April, 1762, when Dr. Blair became first professor.

RHINE (Latin, *Rhenus*; German, *Rhein*; French, *Rhin*), a river, about 760 miles long, rising in Switzerland, receiving the Moselle, Main, Meuse, Neckar, and other rivers, terminating in many arms in Holland, and falling into the German ocean. On its banks are Constance, Basel, Strasbourg, Spire, Mannheim, Cologne, Düsseldorf, Utrecht, and Leyden. The possession of the banks of the Rhine has been the cause of many wars, and it was crossed by the French above twenty times in a century. In the beginning of the revolutionary war, Custine invaded Germany by crossing it in 1792; and at the close of the war in 1815, France retained the left bank, but lost it at the close of the Franco-Prussian war, 1870-1 (*which see*). A navigation treaty with other powers was signed by France, 17 Oct. 1868. A central committee for the navigation exists, formed by members for Alsace, Lorraine, Baden, Bavaria, Hesse, Holland, and Prussia. Very great damage (about 4,000,000*l.*) and loss of life, caused by the rising of the river through rain during 1882.

Becker's German song "They shall not have it, the free German Rhine;" and Alfred de Musset's reply, in French, "We have had it, your German Rhine," appeared in 1841. Max Schneckenburger, author of "The Watch on the Rhine," died 1851.

RHINOPLASTY, an operation performed by dissecting a flap of skin from the forehead and placing it over the nose.

RHODE ISLAND (N. America), settled by Roger Williams about 1636, was taken in the war of independence by the British, 8 Dec. 1776; but was evacuated by them, 25 Oct. 1779. Capitals, Providence and Newport. Population in 1880, 276,531; 1900, 428,556; 1910 (est.), 500,000; see *United States*.

RHODES, an island on the coast of Asia Minor, is said to have been peopled from Crete, as early as 916 B.C. The Rhodians were great navigators, and institutors of a maritime code afterwards adopted by the Romans. The city was built about 408 and flourished 300-200 B.C.; see *Colossus*. Rhodes, long an ally of the Romans, was taken by the emperor Vespasian, A.D. 71. It was held by the Knights Hospitallers from 1309 to 1523, when it was conquered by the Turks, who still retain it. The knights retired to Malta (*which see*). Rhodes suffered severely by an earthquake on 22 April, 1863.

RHODESIA, the name given (1895) to the territories subject to the S. Africa company (after the rt. hon. Cecil Rhodes, "the great empire builder") born at Bishop's Stortford, 5 July, 1853; (died 26 March, 1902), comprising an area of 750,000 sq. miles; chief towns, Bulawayo (capital of Matabeleland) and Salisbury. Rhodesia is divided into two parts: *Northern Rhodesia*, first opened to British influence by the late Dr. Livingstone, subdivided into North-Eastern and North-Western Rhodesia (called also Barotseland) and still occupied by native tribes living under their own chiefs. The headquarters of the administrator of N.-E. Rhodesia are at Fort Jameson, and of the administrator of N.-W. Rhodesia at Kalomo. *Southern Rhodesia* is governed by an executive council, composed of the administrator of S.

RIGHTS, BILL OF. To the **PETITION OF
RIGHTS**, preferred 17 March, 1627-8, Charles I.
answered, "I will that right be done according to
the laws and customs of the realm." Both houses
addressed the king for a fuller answer to their
petition of rights, whereupon he gave them an
answer less evasive, "*Soit droit fait comme il est
desiré*," 7 June, 1628. The petition thus became a
statute 13 Car. I. c. 1. An important declaration
was made by the lords and commons of England to
the prince and princess of Orange on 13 Feb. 1689,
in an act "declaring the rights and liberties of the
subject, and settling the succession of the crown."
The Bill of Rights, virtually the same as the de-
claration, was passed by parliament. It totally
abolished the dispensing power of the crown, Oct.
1689. See *Claim of Right*.

Rings are now put upon women's fourth finger at marriage; but the Jews used them at the spousal or contract *before* marriage. Wedding-rings are to be of standard gold by statute, 1855.

Mr. Plimpton, an American, patented roller-skates in 1865; his right was affirmed on a trial for infringement 28 Jan. 1876. Roller skating very popular; hundreds of new skating rinks opened all over England. 1909-1910

RIPON (Yorkshire), an ancient town. About 661 an abbey cell was built here by Eata. Ripon was made a bishopric by archbishop Wilfred, in 690, but did not endure so. Income 4,200*l.* The cathedral was restored by sir G. G. Scott: the choir was reopened 27 Jan. 1869. The thousandth anniversary of its incorporation was celebrated 25-27 Aug. 1886. RITCHIE'S ACT, see *Local Government*.

RITUALISTS, a name given in 1866 to a party in the church of England, formerly termed Puseyites, who, by giving a more imposing character to public worship, by the use of coloured vestments, lighted candles, incense, &c., desired to revert to the practices of the church as set forth in the first prayer-book of Edward VI., and, as they contend, following the use of the early Christian church. An ecclesiastical exhibition was held during the church congress at York in Oct. 1866, but was not officially connected with it. The practices of the ritualists were censured in several episcopal charges in Dec. 1866; in two reports of the ritualistic commission, 19 Aug. 1867, and April, 1868, and by the judicial committee of the privy council on appeal, 23 Dec. 1868. See *Church of England and Trials*, 1867-9. At a general convocation of the American episcopal church at Philadelphia, 27, 28 Oct. 1868, after a warm discussion on ritualism, the discussion was adjourned. It was renewed at the convocation 10 Oct. 1874, and the ritualists were defeated by the evangelical party, a stringent canon on ceremonies being passed 27 Oct. The "Public Worship Regulation Act" was passed 7 Aug. 1874, for the repression of ritualism in England. Clerical declaration on ritual, see *Times*, 13 July, 1903. See *Public Worship and Church of England 1903 et seq.*

Royal commission "to inquire into the alleged breaches or neglect of the law relating to the conduct of divine service in the church of England, and to the ornaments and fittings of churches; and to consider the existing powers and procedure applicable to such irregularities, and to make such recommendations as may be deemed requisite for dealing with the aforesaid matters," rt. hon. sir M. Hicks Beach, bt., chairman, appointed . . . 20 April, 1904

Dean of Canterbury's appeal to the six first centuries as a *via media* to settle ritual differences in the church of England, published . . . 30 Jan. 1905

The commission reported in 1906, and among the recommendations was a reformation of the present system of ecclesiastical courts, the present court of appeal in ecclesiastical cases, namely:—the judicial committee of the privy council having failed to command the obedience of the clergy, the recommendation was that an appeal should lie from the provincial court to the crown, and that such appeals should be heard by a court of not fewer than 5 lay judges, each of whom must make a declaration that he is a member of the church of England. They also recommended with regard to the required adjustment of the law regulating the conduct of Divine service so as to secure greater elasticity and adaptability to the needs of modern times; the commissioners advise that letters of business be issued to both convocations giving them permission to deal with this subject.

ROAD MURDER. On the night of 29-30 June, 1860, Francis Savile Kent, four years old, was murdered, and his body hid in a garden water-closet at Road. His step-sister Constance Kent (aged sixteen), and the nurse Elizabeth Gough (the first suspected), were discharged for want of evidence. The coroner was severely blamed for charging the jury improperly, but the court of queen's bench, in Jan. 1861, refused to issue a writ for a new inquiry. Constance Kent, on 25 April, 1865, before sir Thomas Henry at Bow-street, and at her trial at Salisbury, on 21 July following, confessed herself to be guilty of the murder. Her punishment was commuted to penal servitude for life. Let out on ticket-of-leave, 18 July, 1885. Road is near Frome, Somerset.

ROADS, see *Roman Roads*. The first general repair of the highways of this country was directed about 1285. Acts were passed for the purpose in 1524 and 1555, followed by others in Elizabeth's and succeeding reigns. Roads through the Highlands of Scotland were begun by general Wade in 1726. London M'Adam's roads were introduced about 1818. Wooden pavements were tried with partial success in the streets of London: at Whitehall in 1839, and in other streets in 1840; asphalt pavement soon after; wood paving came into general use in the latter part of the 19th century. An act "for the better management of the highways" was passed in 1862 after much opposition; another, 16 Aug. 1878; also regulated the use of locomotives on roads; whilst another in 1903 regulated the speed of motor cars. Steam road-rollers were tried in 1867; used in London 18 March, 1868: see *Macadamising, Tolls, and Wooden Pavements*. Committee on Highways appointed, 18 March, 1903, report issued, 29 Sept. 1903. ROBBERS were punished with death by Edmund I.'s laws, which directed that the eldest robber should be hanged. Remarkable robbers in England were Robin Hood, 1189 (see *Robin Hood*), and Claud Du Val, "executed at Tyburn," says an historian quaintly, "to the great grief of the women," Jan. 1670. In Ireland, the famous MacCabe was hanged at Naas, 19 Aug. 1691. Gallopington Hogan, the rapparee, flourished at this period. Freney, the celebrated highwayman, surrendered himself, 10 May, 1749. Near Rochefort, the emperor Napoleon I. surrendered himself to capt. Maitland of the *Bellerophon*, 15 July, 1815.

ROCHELLE (W. France), a seaport on the Atlantic, belonging to the English for some time, but finally surrendered to the French leader, Du Guesclin, in 1372. As a stronghold of the Calvinist party, it was vainly besieged by the duke of Anjou in 1573; and was taken after a siege of thirteen

months by cardinal Richelieu in 1628. The duke of Buckingham was sent with a fleet and army to relieve it; but the citizens declined to admit him. He attacked the isle of Rhé, near Rochelle, and sailed, 22 July, 1627. He was repulsed 8 Nov. following.

Improved rockets were made by Hales in 1846. Boxer's life-saving rope-carrying rocket, for communicating with stranded vessels, described in 1878. See *Wrecks*, March, 1892.

ROGATION WEEK. Rogation Sunday, the Sunday before Ascension-day, received its title from the Monday, Tuesday, and Wednesday following it, called Rogation days, derived from the Latin *rogare*, to beseech. Extraordinary prayers and supplications for these three days are said to have been appointed in the third century, as a preparation for the devout observance of our Saviour's ascension on the next day succeeding to them, denominated Holy Thursday or Ascension-day. The whole week in which these days happen is styled Rogation week; and in some parts it is still known by the other names of Crop week, Grass week, and Procession week. The perambulations of parishes have usually been made in this week.

ROHAN, an illustrious family, descended from the ancient sovereigns of Brittany. Henri de Rohan, son-in-law of the great Sully, after the death of Henri IV. (14 May, 1610), became head of the Protestant party, and sustained three wars against Louis XIII. He eventually entered the service of the duke of Saxe-Weimar, and died of wounds received in battle in 1638. Of this family was the cardinal de Rohan; see *Diamond Necklace*.

A number of public records from the time of Richard III., kept in presses in this chapel, have been removed to the Record Office (*which see*). The Rolls chapel was pulled down in July, 1892.

In 1859 the Romagna threw off the temporal authority of the pope, and declared itself subject to the king of Sardinia, who accepted it in March, 1860. ROMAN LAW, see *Codes*; ROMAN LITERA-
TURE, see *Latin*.

ROMAN ROADS IN ENGLAND. Our historians maintain, but are mistaken, that there were but four of these roads. *Camden*. "The Romans," says Isidore, "made roads almost all over the world, to have their marches in a straight line, and to employ the people;" and criminals were frequently condemned to work at such roads, as we learn from Suetonius, in his life of Caligula. They were commenced and completed at various periods, between the 2nd and 4th centuries, and the Roman soldiery were employed in making them, that inactivity might not give them an opportunity to raise disturbances. *Bede*.

1st, WATLING-STREET, so named from Vitellianus, who is supposed to have directed it, the Britons calling him in their language *Guetalin* (from Kent to Cardigan Bay).

2nd, IKNIELD, or IKENILD-STREET, from its beginning among the *Iceni* (from St. David's to Tynemouth).

3rd, FOSSE, or FOSSE WAY, probably from its having Lee 1 defended by a fosse on both sides (from Cornwall to Lincoln).

4th, ERMIN-STREET, from *Irmunsul*, a German word, meaning Mercury, whom our German ancestors worshipped under that name (from St. David's to Southampton).

ROMAN WALLS. One was erected by Agricola (79 to 85) to defend Britain from the incursions of the Picts and Scots; the first wall extended from the Tyne to the Solway firth (80 miles); the second from the firth of Forth, near Edinburgh, to the firth of Clyde, near Dumbarton (36 miles). The former was renewed and strengthened by the emperor Adrian (121), and by Septimius Severus (208). It commenced at Bowness, near Carlisle, and ended at Wallsend near Newcastle. It had battlements and towers to contain soldiers. The more northern wall was renewed by Lollius Urbicus, in the reign of Antoninus Pius, about 140. Many remains of these walls still exist, particularly of the southern one.

ROMANCE, originally a composition in the Romance or Provençal idiom. The term in the middle ages was extended to narrative poetry in general. Heliodorus, a bishop of Tricca, in Thessaly, about 398, was the author of *Æthiopica* (relating to the loves of Theagenes and Charicleia), the first work in this species of writing. The first part of the "Roman de la Rose" was written by Guillaume de Lorres (1226-70); the second, a separate poem, by Jean de Meung (1285-1314), the Decameron of Boccaccio was published, 1358; Don Quixote, by Cervantes, 1605; Gil Blas, by Le Sage, 1715. See *English Language*.

ROME. The foundation of the city, by Romulus, was laid on the 20th April,* according to Varro, in the year 3961 of the Julian period (753 years before the birth of Christ, and in the fourth year of the sixth Olympiad. Other dates given: Cato, 751; Polybius, 750; Fabius Pictor, 747; Cincius, 728 B.C.). The Romans conquered nearly the whole of the then known world. In the time of Julius Cæsar, the empire was bounded by the Euphrates, Taurus, and Armenia on the east; by

Æthiopia on the south; by the Danube on the north; and by the Atlantic on the west. Numerous ecclesiastical councils have been held at Rome, from 197 to the present time. Population, 1872, about 240,000; 1910 (est.), 525,000. Chiefly through the exertions of Mr. John Henry Parker of Oxford, the Roman exploration fund was established, for the preservation of ancient architectural remains. The Italian government votes 1200*l.* a year for a similar purpose. The early history of Rome is legendary, and the dates *purely conjectural*.

* In its original state, Rome was but a small castle on the summit of mount Palatine; and the founder, to give his followers the appearance of a nation or a barbarian horde, was obliged to erect a standard as a common asylum for criminals, debtors, or murderers, who fled from their native country to avoid the punishment which attended them. From such an assemblage a numerous body was soon collected, and before the death of the founder, the Romans had covered with their habitations the Palatine, Capitoline, Aventine, and Esquiline hills, with Mounts Coelius and Quirinalis.

RÖNTGEN RAYS, see *Surgery*, 1896. Prof. W. C. Röntgen while experimenting with a Crooke's vacuum tube, electrically excited, and enveloped in a black covering, observed that some rays proceeding from the tube passed through the black paper and affected a fluorescent screen at a distance of two yards, 8 Oct. 1895. See *Vacuum*.

The continued researches proved that many substances opaque to ordinary light were transparent to these rays, as flesh, wood, &c.; the shadows of such objects thrown on a screen can be photographed; the interior of a dead monkey was photographed with great distinctness, *Lancet*, March, 1896. The movements of the bones in living animals were exhibited by these rays by means of a cinematograph, in 1897 *et seq.* These rays have the power of diselectrifying electrified bodies.

The Röntgen society founded, prof. Silvanus P. Thompson, president, June; first meeting in London, 5 Nov. 1897 (see *Radiographs*).

Experiments by Dr. Heineke in Leipzig show röntgen rays exert a harmful effect on the internal organs of the body, reported, 9 Dec. 1903.

N-rays, "a supposed novel series of radiations, whose properties comprise ability to pass through aluminium, wood, and other substances, and the brightening of an electric spark while being non-fluorescent and without photographic action," stated to be discovered by prof. Blondlot, of Nancy, in the course of his researches on röntgen rays; the *prix* Leconte of 50,000 francs awarded to prof. Blondlot for his discovery by the Academy of Sciences, 1904. ROSE, see under *Flowers*. The rose, a symbol of silence, gave rise to the phrase *sub rosa*, "under the rose;" said, by Italian writers, to have risen from the circumstance of the pope's presenting consecrated roses, which were placed over the confessionals at Rome, to denote secrecy, 1526. The pope sent a *golden rose* to the queen of Spain, which was given to her with much solemnity, 8 Feb. 1868, and to queen Victoria of Spain, 1906. A "national rose society" opened its first annual show, St. James's hall, 4 July, 1877; shows held at the Crystal palace.

ROSE, S WARS OF THE, between the Lancastrians (who chose the red rose as their emblem) and the Yorkists (who chose the white rose), 1455–1485. It is stated that in the Wars of the Roses there perished 12 princes of the blood, 200 nobles, and 100,000 gentry and common people. The union of the roses was effected in the marriage of Henry VII. with the princess Elizabeth, daughter of Edward IV. 1486.

See *Liberals*.

Richard II., who succeeded his grandfather Edward III. in 1377, was deposed and succeeded in 1399 by his cousin Henry IV. (son of John of Gaunt, duke of Lancaster, the fourth son of Edward III.), in prejudice to the right of Roger Mortimer (grandson of Lionel, duke of Clarence, Edward's third son), who was declared presumptive heir to the throne in 1385.

Roger's grandson, Richard duke of York, first openly claimed the crown in 1449.

Attempts at compromise failed, and the war began in 1455.

The Lancastrians were defeated at St. Albans; the protector Somerset was slain; a truce was made, and Richard was declared successor to Henry VI. 23 May, "

The war was renewed, and the Yorkists defeated the Lancastrians at Bloreheath 23 Sept. 1459.

The Yorkists eventually dispersed, and the duke was attainted.

He defeated his opponents at Northampton, took Henry prisoner, and was declared heir to the crown; but fell into an ambushade near Wakefield, and was put to death 31 Dec. 1460.

His son (Edward) continued the struggle; was installed as king 4 March, 1461.

Defeated the Lancastrians at Towton 29 March, "

Was deposed by Warwick, who restored Henry VI. Sept. 1470.

Edward defeated the Lancastrians at Barnet, 14 April, and finally at Tewkesbury 4 May, 1471.

The struggle ended with the defeat and death of Richard III. at Bosworth 22 Aug. 1485.

ROSETTA (in Egypt), taken by the French in 1798; and by the British and Turks, 19 April, 1801. The Turks repulsed the British here, 22 April, 1807. Near Rosetta was fought the battle of the Nile, 1 Aug. 1798; see *Nile*. Mehemet Ali rendered great service to his country by constructing a canal between Rosetta and Alexandria.

The *Rosetta Stone*, discovered by the French in 1799, was brought from Rosetta in a French vessel, from whence it was taken by Mr. Wm. R. Hamilton, who deposited it in the British Museum. In 1841, Mr. Letronne published the text and a translation of the Greek inscription. It is a piece of black basalt, about 3 ft. long and 2½ ft. wide, with an inscription in three languages, viz., hieroglyphics, modified hieroglyphics (demotic or enchorial), and Greek, setting forth the praises of Ptolemy Epiphanes (about 106 B.C.). It was studied by Dr. T. Young and especially by J. F. Champollion, whose works were published 1814-1845. Champollion's method was adopted by Rosellini, and extended by Lepsius, Bunsen, Birch, Brugsch, and others. Champollion discovered that the hieroglyphs represented sounds by an initial letter, and after studying the "Ritual of the dead," published a grammar and dictionary.

ROSICRUCIANS, a sect of mystical philosophers who appeared in Germany in the 14th century. It is asserted that their founder was a noble German monk named Christian Rosencreutz, born 1378, who travelled in Arabia, Egypt, Africa, and Spain; returned to Germany and founded the fraternity of the Rosy Cross, and died aged 102. The *Fama Fraternalitatis* and the *Confessio Rosæ Crucis*, 1615, the latter attributed to Johann Valentin Andreas and others, are important works. They swore fidelity, promised secrecy, and wrote hieroglyphically, and affirmed that the ancient philosophers of Egypt, the Chaldeans, Magi of Persia, and Gymnosophists of the Indies, taught the same doctrine.

ROSS, Cork (S. Ireland), a bishopric founded, it is supposed, by St. Fachnan, in 6th century. It was united to Cork in 1340, and Cloyne to both, by the Irish Church Temporalities act (1833); see *Bishops*; *New Ross*.

ROSTRUM (plural *rostra*), a beak, the name given to the prows of ships, which were affixed to

the front of the platform (hence termed *rostra*), erected between the comitium and the forum in Rome, whence the tribunes addressed the people. The custom is said to have begun with the ships of Antium, taken during the Latin war, which ended 33 B.C.

ROTA CLUB, a society who met at Miles's Coffee-house in New Palace-yard, Westminster, during the administration of Oliver Cromwell; their plan was that all the great officers of state should be chosen by ballot: and that a certain number of members of parliament should be changed annually by rotation, from whence they took their title. ROTHSCHILD FAMILY. Meyer Am-schel, or Anselm, was born at No. 148, Judengasse (Jew-lane), Frankfort, in 1743. In 1772 he began business as a money-lender and dealer in old coins, in the same house, over which he placed the sign of the red shield (in German, Roth Schild). Having had dealings with the landgrave of Hesse, that prince entrusted him with his treasure (said to have been 250,000*l.*) in 1806, when the French held his country. With this sum as capital, Anselm traded and made a large fortune, and restored the 250,000*l.* to the landgrave in 1815. At his death his sons continued the business as partners. His son, Nathan, began at Manchester in 1798, removed to London in 1803; and died immensely rich, 28 July, 1836. The baron, James, head of the family, died at Paris, 15 Nov. 1868.

ROTTERDAM, the second city in Holland. Its importance dates from the 13th century. The commerce of Antwerp was transferred to it in 1509. In 1572, Rotterdam was taken by the Spaniards by stratagem, and cruelly treated. It suffered much from the French revolutionary wars, and from inundations in 1775 and 1825. Desiderius Erasmus was born here in 1467. The museum and picture-gallery of Rotterdam were destroyed at the fire of the Schieland palace, 16 Feb. 1864. ROUND-HEADS. In the civil war which began in 1642, the adherents of Charles I. were called Cavaliers, and the friends of the parliament Round-heads. The term, it is said, arose from those persons who had a round bowl or dish put upon their heads, and their hair cut to the edge of the bowl; see *Cavaliers*.

ROYAL ACADEMY. A society of artists met in St. Peter's-court, St. Martin's-lane, about 1739, which Hogarth established as the society of Incorporated Artists, who held their first exhibition at the Society of Arts, Adelphi, 21 April, 1760. From this sprang the Royal Academy, in consequence of a dispute between the directors and the fellows. On 10 Dec. 1768, the institution of the present Royal Academy was completed under the patronage of George III.; and sir Joshua Reynolds, knighted on the occasion, was appointed its first president. *Leigh.* The first exhibition of the academicians (at Pall-Mall) was on 26 April, 1769, when 136 works appeared. In 1771 the king granted them apartments in old Somerset-house, and afterwards, in 1780, in new Somerset-house, where they remained till 1838, when they removed to the National Gallery. Among the professors have been Johnson, Gibbon, Goldsmith, Macaulay, and Hallam. Turner, the painter, gave funds to the academy for the award of a medal triennially for landscape-painting, which was awarded to Mr. N. O. Lupton in 1857. A commission of inquiry into the affairs of the academy, appointed in 1862, recommended various changes in July, 1863, which were carried into effect. The hundredth anniversary of the foundation of the academy was celebrated 10 Dec. 1868. The Royal Academy held its first exhibition in Burlington-house, Piccadilly, 3 May, 1869. The annual exhibition of pictures by the old masters, with some British, began 3 Jan. 1870. The money received has been devoted to the establishment of a professorship of chemistry and a laboratory, &c. In 1874 the exhibition included many of Landseer's pictures.

Sir Francis Chantrey, R.A., sculptor, died 25 Nov. 1841.

At the death of his wife, Jan. 1875, in conformity with his will, 105,000*l.* was bequeathed to the Academy, and invested in Consols (now 190*l.*) producing an income of about 2,100*l.* per annum, for the purchase of works of art for the nation, and other purposes. The collection, of some 120 pictures, since 1897 has been permanently located in the Tate gallery, Pimlico. The court of appeal upheld Mr. Justice North's decision that the works of sculpture purchased must be finished in marble or bronze, and not models, June, 1889.

The gallery containing the sculptures of John Gibson, bequeathed by him, was opened free, 27 Nov. 1876.

The number of the works of art exhibited in 1789 was about 620; in 1920, including sculptures, 1,922.

Rembrandt exhibition, 95 oil paintings and collection of drawings, opened, 31 Dec. 1898.

10,000*l.* bequeathed by the late lord Leighton constituted a trust fund as "The Leighton Bequest," the interest to be devoted to the adornment of public places, &c.; announced, 11 Feb. 1899.

Adverse criticism respecting the choice of pictures purchased by the trustees of the Chantrey fund leads to the appointment of a select committee to consider the subject, 1904. Select committee's report recommends that all purchases be made by a committee to consist of the president of the Royal Academy, a royal academician appointed by the council, and an associate of the Royal Academy nominated by the associates, 1905.

The king accepts at the Royal Academy the picture of the opening of the first parliament of the Australian commonwealth, 4 July, 1904.

ROYAL HUMANE SOCIETY (London), see *Humane Society*.

ROYAL INSTITUTION OF GREAT BRITAIN, the earliest of the kind in London, was founded 9 March, 1799, by count Rumford, sir Joseph Banks, earls Spencer and Morton, and several other noblemen and gentlemen. It received the immediate patronage of George III., and was incorporated 13 Jan. 1800, by royal charter, as "The Royal Institution of Great Britain, for the diffusing knowledge, and facilitating the general introduction of useful mechanical inventions and improvements, and for teaching, by courses of philosophical lectures and experiments, the application of science to the common purposes of life." It was enlarged and extended by an act of parliament in 1810; the original plan, as drawn up by count Rumford, in 1799, having been considerably modified. The members are elected by ballot, and pay ten guineas on admission, and five guineas annually, or a composition of sixty guineas.

The House (in Albemarle-street, Piccadilly) was purchased in June, 1799, and the present front was added by subscription in 1838. The Lecture theatre was erected in 1800-1, under the superintendence of Mr. T. Webster.

The Laboratory established in 1800; was rebuilt, with the modern improvements, 1872.

The Library was commenced in 1803, by the munificent subscriptions of the proprietors of the institution. The Museum contains original philosophical apparatus of Young, Cavendish, Davy, Faraday, and De la Rue. The first LECTURE was delivered 4 March, 1800, by Dr. Garnett, he being the first professor of natural philosophy and chemistry.

In Aug. he was succeeded by Dr. Thomas Young, so celebrated for his researches in optics, resulting in the discovery of the interference of light, and the establishment of the theory of undulation.

In Feb. 1801, Mr. (afterwards sir Humphry) Davy was engaged as assistant lecturer and director of the laboratory, and on 31 May, 1802, he was appointed professor of chemistry. By him the alkaline metals

potassium and sodium, were discovered in 1807; the nature of chlorine was determined in 1810, and the safety-lamp invented in 1815.

William Thomas Brande succeeded sir Humphry Davy as professor of chemistry in 1813, and held that office till his resignation in 1852, since which time, till his death (Feb. 1866), he was hon. professor.

In 1813 Michael Faraday (born 22 Sept. 1791), on the recommendation of sir H. Davy, was engaged as assistant in the laboratory, and in 1825 as its director; in 1827 he became one of the permanent lecturers of the institution. In 1820 he commenced those researches in electricity and magnetism which form an era in the history of science. In 1823-4 he discovered the condensability of chlorine and other gases; in 1831 he obtained electricity from the magnet; in 1845 he exhibited the two-fold magnetism of matter, comprehending all known substances, the magnetism of gases, flame, &c.; in 1850 he published his researches on atmospheric magnetism: died, 25 Aug. 1867.

John Tyndall, F.R.S., professor of natural philosophy, July, 1853, hon. professor, 9 May, 1887; died 4 Dec. 1893; eminent for his researches on magnetism, heat, glaciers, &c.; bequeathed 1,000*l.* to the Royal Institution, received Jan. 1898.

Lord Rayleigh, F.R.S., professor of natural philosophy, 5 May, 1887; elected hon. professor, 1905; is eminent for his researches on sound, light, &c. Professor sir J. J. Thomson, M.A., LL.D., D.Sc., F.R.S., 1905.

Edward Frankland, F.R.S. (after sir), professor of chemistry 1863-8, eminent for his discoveries in organic chemistry; he died, 9 Aug. 1899.

Sir James Dewar, F.R.S. (born 20 Sept. 1842), professor of chemistry, 9 April, and director of the laboratory, 7 May, 1877; eminent for his discoveries and researches in the liquefaction and solidification of gases at high temperatures, air, oxygen, hydrogen, &c., 1878 *et seq.*

In 1804, sir J. St. Aubyn and other gentlemen proposed to form a school of MINES at this institution; but the plan, although warmly supported by the members, was withdrawn for want of encouragement by the government and by mining proprietors.

The WEEKLY EVENING MEETINGS, on the Fridays, from January to June, commenced in 1826.

ENDOWMENTS. In 1833, John Fuller, esq., of Rosehill, endowed two professorships, of chemistry and physiology; the former bestowed on Mr. Faraday for life; succeeded by Dr. Wm. Odling, 1868-73; by Dr. John Hall Gladstone, 1874, died 7 Oct. 1902; by James Dewar, 1877. The latter on Dr. Roget for three years, to be filled up afterwards by triennial election.—The Fullerian professors of physiology have been P. M. Roget, R. E. Grant, T. R. Jones, W. B. Carpenter, W. W. Gull, T. W. Jones, T. H. Huxley (twice), R. Owen, J. Marshall, Michael Foster, Wm. Rutherford, Alfred H. Garrod, and E. A. Schäfer (1878-87). J. G. McKendrick, 1881-4; A. Gangee, 1884; G. J. The "Fund for the Promotion of Experimental Research" was founded on 6 July, 1863, by sir Henry Holland, Professor Faraday, sir R. I. Murchison, Dr. Bence Jones, and others.

In 1843 the establishment of a school of practical chemistry in the institution approved by profs. Faraday and Brande was proposed but failed.

On 2 July, 1894, the scheme was revived by Mr. Ludwig Mond, F.R.S. and M.R.I., who presented to the institution the house adjoining, with a proposal for its transformation into a laboratory, to be termed the DAVY-FARADAY RESEARCH LABORATORY. He supplied the funds necessary for the incidental expenses of the

work, and also gave an endowment sufficient to maintain a staff of professors and assistants, and to supply everything necessary for the prosecution of scientific research, especially in pure chemistry and physical science. The laboratory is an adjunct to the Royal Institution, and is open, conditionally, to independent private research. The conveyance and deed of trust dated 8 June, 1896. The laboratory is subject to a committee appointed by the managers of the institution, the first directors being lord Rayleigh and prof. James Dewar. Dr. Alexander Scott appointed superintendent, 1896. The laboratory was opened by the prince of Wales, after an historical address by Dr. Ludwig Mond, followed by experiments in liquid air, by prof. ROYAL SOCIETY (London). In 1645 several learned men met in London to discuss philosophical questions and report experiments; the *Novum Organon* of Bacon, published in 1620, having given great impulse to such pursuits. Some of them (Drs. Wilkins, Wallis, &c.), about 1648-9, removed to Oxford, and with Dr. (afterwards bishop) Seth Ward, the hon. Robert Boyle, Dr. (afterwards sir) W. Petty, and several doctors of divinity and physic, frequently assembled in the apartments of Dr. Wilkins, in Wadham college, Oxford. They formed what has been called the Philosophical Society of Oxford, which only lasted till 1690. The members were, about 1658, called to various parts of the kingdom, on account of their respective professions; and the majority coming to London, constantly attended the lectures at Gresham college, and met occasionally till the death of Oliver Cromwell, 3 Sept. 1658; *see Societies*, and *Scientific Papers*. "Record of Royal Soc." issued 1897.

The society was organised in 1660, and constituted by Charles II. a body politic and corporate, by the appellation of "The President, Council, and Fellowship of the Royal Society of London, for improving Natural Knowledge," 22 April, 1662.

Henry Oldenburg, the first secretary, an eminent philosopher, a native of Bremen, a friend of Milton, Boyle, Wilkins, Wallis, and Petty, died Sept. 1677.

Evelyn records the first anniversary meeting, St. Andrew's-day, 30 Nov. 1663.

The *Philosophical Transactions* begin 6 March, 1664-5.

In 1668 Newton invented his reflecting telescope (now in the possession of the society), and on 28 April, 1686, presented to the society the MS. of his *Principia*, which the council ordered to be printed. This was done under the superintendence and at the expense of Halley the astronomer, at that time clerk to the society.

The society met for some years at Gresham College, and afterwards at Arundel House (1666), where it came into possession of a valuable library, presented by Mr. Howard, grandson of its collector, the earl of Arundel. After various changes the fellows returned to Gresham College, where they remained till their removal to Crane-court, in a house purchased by themselves, 8 Nov. 1710.

RUBY MINES OF BURMAH. Tavernier (middle of 17th cent.) describes Burmah as a place where rubies and other precious stones are largely obtained, a country difficult of access. Similar accounts were given by Father Giuseppe d'Amato, about 1830. The largest stones were royal property. Mr. Bredemeyer had charge of these and other mines in 1868. Revenue about 1855, from 12,500*l.* to 15,000*l.* per annum. These mines are now British property (see under *Burmah*, 1885), and for the use of them a revenue is paid by the Shan tribes, 1887. RUGBY SCHOOL (Warwickshire), was founded in 1567 by Lawrence Sherif, a London tradesman; its arrangements were affected by the Public Schools act 1868. Dr. Thomas Arnold, the historian, entered on the duties of head-master here in August, 1828, and under him the school greatly prospered. He died 12 June, 1842. His successors were Drs. Tait, Goulburn, Temple, Hayman, Jex

Blake, Percival and H. A. James (since 1895). See *New Rugby*.

Dr. H. Hayman was opposed by the masters of the school, and after much dissension and discussion, was dismissed by the trustees, Dec. 1873, and Dr. Jex Blake elected in his room, Feb. 1874. Vice-Chancellor Malins decided against Dr. Hayman in his attempt to set aside his dismissal, but expressed his own opinion on "the grievous hardship of Dr. Hayman's case," 21 March, 1874.

Mr. Disraeli, the premier, presented Dr. Hayman to the living of Aldingham, Lancashire, April, 1874; he died, aged 81, 11 July, 1904.

"**RULE, BRITANNIA.**" The words are by James Thomson (altered by Mallet); the music, ascribed to Dr. Arne, is said by Schœlcher (in his life of Handel) to have been taken from an air in Handel's "Occasional Oratorio" composed 1746, but the song and music were really printed in Dr. Arne's masque of "Alfred," 1740. *Grove*.

RULING MACHINES, used for ruling paper with faint lines, for merchants' account-books, &c. They were invented by an ingenious Dutchman, resident in London, in 1782, and were subsequently greatly improved by Woodmason, Payne, Brown, and others. They were improved in Scotland in 1803. Herr F. A. Nobert devised a ruling machine in 1845 for the production of microscopical test plates, diffraction gratings, and micrometers, specimens of which were exhibited in 1851. The test plates contain bands of lines in a graduated series of fineness from 1000 to 5000 of a Paris line.

When he requested to have some one near him to take notes to help his memory, he was answered, that any of his attendants might assist him; upon which he said "My WIFE is here, and will do it for me." He was beheaded in Lincoln's-Inn-Fields, 21 July, 1683. Lady Russell survived him forty years, dying 29 Sept. 1723, in her eighty-seventh year. His attainder was reversed, 1 Will. III. 1689.

RUSSIA, the eastern part of ancient Sarmatia. The name is generally derived from the Roxolani, a Slavonic tribe. Ruric, a Varangian chief, appears to have been the first to establish a government, 862. His descendants ruled amid many vicissitudes till 1598. The progress of the Russian power under Peter the Great and Catherine II. is unequalled for rapidity in the history of the world. The established religion of Russia is the Greek church, with toleration of other sects, even Mahometans. By an imperial ukase, in 1802, six universities were established, viz., at St. Petersburg, Moscow, Wilna, Dorpat (in Livonia), Charcov, and

Kasan; but literature made little progress till the 19th century, the native publications being very few, and the best books being translations. The Russian language, though not devoid of elegance, is, to a foreigner, of very difficult pronunciation; the number of letters and diphthongs is forty-two. The Anglo-Russian Literary Society, with library, &c., set up at the Imperial Institute, 1893. The population of the empire in 1867, 82,159,630; 1st general census of the empire, total, 129,211,113, 9 Feb. 1897; 1908, 155,433,300. By the first Russian budget (1862), the estimated revenue was 34,500,000*l.*; expenditure, 37,850,000*l.*; 1892, revenue, 118,025,000*l.*; expenditure, 112,549,000*l.* Budget revenue and expenditure, 1910 (est.), 279,787,000*l.*; National debt, 1908, 871,206,000*l.* Imports, 1908, 97,940,578*l.*; exports, 106,246,300*l.*; from the United Kingdom, 12,774,983*l.*, to the United Kingdom, 23,225,221*l.* Peace strength of army about 1,200,000; available in time of war about 4,000,000. 44,595 miles of railway working 1909.

RUSSO-JAPANESE WAR.—The war between Japan and Russia was due to three principal causes: the rights of the Japanese in Manchuria; the independence of Corea; and the independence of China, all these interests being imperilled by the rapid extension of the Russian power. The conflict between China and Japan, 1894-95, resulted in the recognition by China of the independence of Corea, and the cession to Japan of Port Arthur and the Liao-tung peninsula; the latter advantage was, however, lost to Japan by the action of Russia, supported by France and Germany, on the ground that its possession by the Japanese would "constitute a perpetual menace to the capital of China, and render the independence of Corea illusory." Japan failed in her attempt to obtain pledges from Russia that neither Port Arthur nor the Liao-tung peninsula would be occupied by the forces of that power; assurances were, however, given "that Russia had no designs whatever on Manchuria"; but Russia refused to embody these assurances in a treaty on the ground that to do so would be an imputation on her *bona fides*. In 1898, Russia obtained from China a lease over Port Arthur and Ta-lien-wan, together with railway concessions

(granted 23 March); Russian forces were landed (28 March), the Trans-Siberian railway was rapidly extended south to Port Arthur, fortifications were erected, garrisons established, and Manchuria treated as if it were virtually a Russian province. In return for her support given to China after the relief of Peking, 1900, Russia sought, but unsuccessfully, to obtain a convention securing her special rights in Manchuria, and ultimately agreed to evacuate two provinces of Manchuria on 8 Oct. 1903. The promised evacuation was not carried out, and on 30 Oct. 1903, Russian troops re-occupied Mukden, and a great number of troops were sent into Manchuria. This action of Russia in maintaining her occupation of Manchuria, notwithstanding her treaty with China and the repeated assurances given to the powers by Russia, together with aggressive action on the Ya-lu in Korean territory, caused great apprehension to Japan, as threatening the independence of Corea and the safety of Japan, especially if Manchuria were annexed by Russia. In a despatch dated 28 July, 1903, M. Kurino, the Japanese minister at St. Petersburg, was instructed by baron Komura, Japanese foreign minister, "to approach the Russian government in a spirit of conciliation and frankness, with a view to the conclusion of an understanding" on these questions, and "to a definition of their respective interests in those regions." The Japanese proposals were stated in the following terms in a despatch from Tokio, dated 3 Aug. 1903:—

- I. A mutual agreement to respect the independence and territorial integrity of the Chinese and Korean empires, and to maintain the principle of equal opportunity for the commerce and industry of all nations in those countries.
- II. Reciprocal recognition of Japan's preponderating interests in Corea and Russia's special interests in railway enterprises in Manchuria, and of the right of Japan to take in Corea and of Russia to take in Manchuria such measures as may be necessary for the protection of their respective interests as above defined, subject, however, to the provisions of Article I.
- III. Reciprocal undertaking on the part of Russia and Japan not to impede the development of those industrial and commercial activities respectively of Japan and Russia in Corea and of Russia in Manchuria, which are not inconsistent with the stipulations of Article I.
- IV. Reciprocal engagement that in case it is found necessary to send troops by Japan to Corea, or by Russia to Manchuria, for the purpose either of protecting the interests mentioned in Article II., or of suppressing insurrection or disorder calculated to create international complications, the troops so sent are in no case to exceed the actual number required, and are to be forthwith recalled as soon as their missions are accomplished.
- V. Recognition on the part of Russia of the exclusive right of Japan to give advice and assistance in the interest of reform and good government in Corea, including necessary military assistance.

The following counter proposals were submitted on behalf of Russia, 3 Oct. 1903:—

- I. Mutual engagement to respect the independence and territorial integrity of the Korean empire.
- II. Recognition by Russia of Japan's preponderating interests in Corea, and of the right of Japan to give advice and assistance to Corea tending to improve the civil administration of the empire without infringing the stipulations of Article I.
- III. Engagement on the part of Russia not to impede the commercial and industrial undertakings of Japan in Corea, nor to oppose any measures taken for the purpose of protecting them, so long as such measures do not infringe the stipulations of Article I.

- IV. Recognition of the right of Japan to send for the same purpose troops to Corea, with the knowledge of Russia, but their numbers not to exceed that actually required, and with the engagement on the part of Japan to recall such troops as soon as their mission is accomplished.
- V. Mutual engagement not to use any part of the territory of Corea for strategical purposes, nor to undertake on the coasts of Corea any military works capable of menacing the freedom of navigation in the straits of Corea.
- VI. Mutual agreement to consider that part of the territory of Corea lying to the north of the 30th parallel as a neutral zone, into which neither of the contracting parties shall introduce troops.
- VII. Recognition by Japan of Manchuria and its littoral as in all respects outside her sphere of interest.

The proposal of Russia that Manchuria should be regarded as outside the Japanese sphere of interest was, in view of the important political and commercial interests of Japan in that country, rejected by Japan 30 Oct. 1903; other amendments, including one relating to a neutral zone, in Manchuria as well as in Corea, were proposed by Japan. Russia, in response to the protest of the Japanese government respecting the delay of the Russian government in replying to its communication, reaffirmed the proposals of 3 Oct., but omitting Article VII., 11 Dec. 1903. In reply, 21 Dec. 1903, the Japanese government stated that Russia's exclusion of Manchuria from the negotiations nullified them entirely, the negotiations having been expressly undertaken to remove every cause for misunderstanding respecting both Corea and Manchuria; Russia was asked to reconsider the question; the neutral-zone clause to be omitted. The Russian government reply, 6 Jan. 1904, proposing to insert the following article in the agreement, "Recognition by Japan of Manchuria and its littoral as being outside her sphere of interests, while Russia within the limits of that province will not impede Japan or other powers in the enjoyment of rights and privileges acquired by them under existing treaties with China, exclusive of the establishment of settlements." This article was subject to the understanding that the articles respecting a neutral zone, and the prohibition of Korean territory for strategical purposes, were conceded by Japan. The final proposals of the Japanese government were presented to Russia, 13 Jan. 1904, and comprised the following modifications of the Russian terms:—

- I. The elimination from Article V. of the words "not to use any part of the territory of Corea for strategical purposes."
- II. The elimination from Article VI. as to a neutral zone.
- III. The acceptance of the final Article concerning Manchuria, provided that Russia agreed to respect the territorial integrity of China in Manchuria; not to impede Japan or other Powers, within the limits of Manchuria, in the enjoyment of rights and privileges acquired by them under the existing treaties with China; to recognise Corea and its littoral as being outside the Russian sphere of influence.
- IV. The recognition by Japan of Russia's special interests in Manchuria, and of the right of Russia to take measures necessary for the protection of those interests.

Owing to the dilatory tactics of Russia the patience of the Japanese government became exhausted, and becoming convinced that no hope existed of a peaceable settlement of the questions at issue, and having regard also to the preparations being made with both her army and navy by Russia, the Japanese government at Tokio announced, 6 Feb. 1904, through their minister at

Dr. Morrison, correspondent of the *Times* at Peking, after visiting Daini and Port Arthur, by permission of the Japanese headquarters, records his opinion that the surrender of Port Arthur by gen. Stössel was not justified by the condition of the fortress, and strongly condemns the Russian capitulation in view of the fact that 25,000 able-bodied soldiers, well clad and well nourished, and capable of making a sortie, were found by the Japanese in the fortress; that there was ample food for three months; that there was fuel in abundance, 70,000 tons of coal being stored in the dockyard, besides large quantities of firewood; that there was no serious failure of ammunition; that the number of buildings destroyed or injured in Port Arthur was comparatively small, the Japanese having directed their fire on the docks, workshops, and the ships in the harbour. Of the 14,000 cases in the hospital from all classes of the population, only a small proportion were wounded. In Dr. Morrison's opinion, "no more discreditable surrender has been recorded in history." He states that the heart and soul of the defence was gen. Koudrachenko, who was killed 18 Dec. 1904, and that but for him gen. Stössel would have capitulated some weeks earlier . . . 25 Jan. "

ATTLE OF HEI-KOA-TAI.—The Russian second army, 85,000 strong, with 350 guns, under gen. Gripenberg, crosses the frozen river Hun-ho, and attacks the Japanese left; village of Hei-koa-tai captured by the Russians, 25 Jan.; Sandepu, bravely defended by a small force of Japanese, in spite of a fierce conflict, in which the Russians sustain heavy losses; left position strengthened by marshal Oyama, who assumes the offensive, and after a long struggle, 27 Jan., drives the Russians across the Hun-ho; estimated losses—Russian, 10,000; Japanese, 7,000, 29 Jan. BATTLE OF MUKDEN.—The Japanese forces comprised the third army, under gen. Nogi, on the left (looking northward); the second army, under gen. Oku, to the right of the third army; the fourth army, under gen. Nodzu, in the centre; the first army, under gen. Kuroki, on the right; and the right flank detachment of reservists under gen. Kawamura. The Japanese line extended nearly 100 miles from W. to E., under the direction of marshal Oyama. The Russian forces comprised the second army under gen. Kaulbars (looking southward); the centre under gen. Bilderling; and the first army under gen. Linevitch, with a detachment under gen. Rennenkampf, the whole commanded in chief by gen. Kuropatkin.

The general idea of the Japanese operations was the threatening of the Russian left under gen. Linevitch, the real object the attack on the Russian right and an extended out-flanking movement. Gen. Kuropatkin (whose forces were about 400,000 men and 1,500 guns, with a strongly entrenched position on the S. and S.E. of Fushan, 26 miles east of Mukden), misled by the Japanese attack on his left, where his strongest forces were placed, failed to realise the true Japanese objective, until too late to readjust his forces. (For convenience of reference this battle, one of the greatest of modern times, is divided into 5 sections, representing the successive stages of the conflict.)

I. The Japanese commence offensive operations on the Russian left by the advance of gen. Kawamura over the frozen roads and rivers, 19 Feb.; he gains the Ching-ho-cheng defile, the Tai-tse river having been crossed, and a fierce conflict waged for two days with the Russians, who are driven out of their entrenchments, 24 Feb.; Japanese first army, under gen. Kuroki, moves forward from the Pen-hsi-hu district upon Kuo-tu-ling, and forces the Russians from their advanced positions about 10 miles N. and N.W. of Pen-hsi-hu; the fourth army, under gen. Nodzu, advances on the Sha-ho, gaining ground and threatening the Russian position, with the result that gen. Kuropatkin's attention was directed to the defence of his centre and left . . . 19-28 Feb. 1905

II. Gen. Oku, with the Japanese second army, advances and deploys between the Sha-ho and the Hun; gen. Nogi, with the third army on the left of gen. Oku, rapidly marches between the Hun and the Liao in a northerly direction, overcoming all the counter-attacks of the Russians, 28 Feb. gen. Kuropatkin becomes aware of this movement, 1 March, but measures taken by him proved to be inadequate and too late, his forces being driven back on the night towards Mukden; gen. Nogi begins his turning movement on the west, between the Hun and Liao rivers, marching rapidly in a northerly direction, 26 Feb.; advances at first without encountering opposition, marches nearly due N. to Hsin-min-lun, 33 miles west of Mukden, 1 March; swinging round, gen. Nogi marches eastward on a front of 15 miles, keeping touch with gen. Oku, at Lik-wan-pau, and pushing towards the railway; second Russian army, under gen. Kaulbars, is forced to face westward on a line running from Machlapu to N.N.E.; the fourth and first Japanese armies, under generals Nodzu and Kuroki respectively, make sustained efforts to prevent the Russian troops from withdrawing in the centre and the left to meet the decisive attack . . . 28 Feb.-4 March, "

III. Russian army by 5 March was held fast in the centre, driven back on the left and completely turned on the right, gen. Kuroki having forced the left of the Russian entrenchments on the Sha-ho, 5 March; Russian reserves attack gen. Oku and penetrate a short distance along the Hsin-min-tun-road, but are then repulsed, 5 March; gen. Nodzu dislodges the Russians from their earthworks S. of the Sha-ho, 2-6 March; gen. Nogi's line extends its envelopment of the Russian forces to the N. of Mukden; the fortified positions of Machuntun and Tita, S. and S.E. of Fushan, reached by gen. Kawamura, 28 Feb., are the scene of a desperate conflict, gen. Kuropatkin bringing up his reserves

to these positions; after 8 days of fierce fighting the Japanese take Machuntun, 8 March: gen. Kuropatkin decides to withdraw his centre and left behind the Hun and attack generals Oku and Nogi with all available forces from the armies of generals Kaulbars and Bilderling, 8 March; railway N. of Mukden cut by the Japanese under gen. Nogi, 5-8 March, 1905

IV. Russian first army under gen. Linevitch effects its retreat to the line of the Hun without serious loss, and takes up a defensive position there; situation of the Russian army at Mukden becomes most critical, owing to the exhaustion of the second Russian army under gen. Kaulbars, and the arrival at Mukden of the third army under gen. Bilderling, which causes a great accumulation of troops in a confined space and their exposure to the concentrated fire of the Japanese, who draw in upon the town from all sides except the N.E.; a gallant attempt is made by gen. Kuropatkin, who leads an attack of 65 battalions, checking the advance of generals Oku and Nogi, 9 March; gen. Nodzu, having crossed the Sha-ho, sweeps on to the Hun, and penetrates the Russian line; Kuisan, E. of Mukden, occupied by the Japanese on the north, while gen. Nogi fights to establish himself across the line of the Russian retreat, 9 March; gen. Kuropatkin, to avoid the destruction or capture of the second and third Russian armies, gives the order for a general retreat, 9 March; Tita taken by the Japanese, 9 March, and the Russians in this part of the field fly to the N. of Fushan, 8-9 March, "

V. General Nodzu crosses the Hun, 10 March; Japanese occupy Mukden, 10 March; a large number of the Russian troops, owing to the enveloping character of the Japanese attacks, are unable to escape; gen. Nogi occupies the line of the Puhö directly across the main line of retreat and astride all the roads leading from Mukden to the N.; the remnant of the Russian army escapes over the hills in disorder, gen. Linevitch alone retaining his formations, and showing a bold front against gen. Kuroki, 10 March; Fushan position carried by the Japanese, and the Russians retire towards Tieling, 10 March; parties of Russians in the adjacent villages and positions around Mukden continue to offer resistance, but are driven from all the country 26 miles N. of Mukden, and the Russians, broken and routed, flee in great disorder to Tieling, 12 March, 10-12 March, "

(Russian loss, 30,000 killed, 100,000 wounded, 50,000 prisoners; Japanese casualties, 52,500 killed and wounded. Immense captures of prisoners, arms, ammunition, provisions, etc.) Adm. Rozhdestvensky's fleet leaves French waters, 16 March, "

The Japanese expostulate with the French government that the Russians are using this station as a naval base; as a result the Russian fleet leaves Kamranh bay under pressure from France, and goes to Hon-Kohe bay, 26 April, "

BATTLE OF TSU SHIMA.—This, the greatest naval battle since Trafalgar (21 Oct. 1805), was fought when the Russian Baltic fleet, under adm. Rozhdestvensky, entering the Straits of Tsu Shima, between Corea and Japan, was attacked by the Japanese fleet under adm. Togo, and practically annihilated. A fog at first prevailed, when adm. Rozhdestvensky's main fleet, steaming in two columns, the battleships to starboard and cruisers to port, drew up to Tsu Shima in the forenoon of 27 May. The fog cleared in the afternoon, when the Russian fleet was sighted by the Japanese scouts. Immediately on receiving the report that the Russian fleet was in sight the combined squadrons of the Japanese started for attack, and met the Russian squadron near Okino Shima, to the S.E. of Tsu Shima. The battle began between 2 and 3 p.m., a strong breeze blowing and a high sea running. Before the engagement commenced adm. Togo signalled from the flagship *Mikasa* to the Japanese fleet: "The fate of the Empire depends on this effort. Let every man do his utmost." Although in-

ferior in the number of their battleships the skilful tactics and superior range of their guns gave the Japanese the superiority, and enabled them to inflict a crushing defeat on the Russians. The battle lasted until the afternoon of 28 May, and included a general engagement, and a torpedo attack on the night of 27 May, breaking up the defeated Russian fleet. The *Kaiaz Souwaroff*, the flagship of adm. Rozhdestvensky, was blown up; the admiral himself, seriously wounded, was rescued by a Russian torpedo-boat destroyer (afterwards captured), and taken prisoner; adm. Fülkersahm was killed in the conning tower of the *Oslabya*; and rear-adm. Nebogotoff was taken prisoner; 21 of the ships of the Russian fleet were sunk, viz., the battleships *Kniaz Souwaroff*, *Borodino*, *Oslabya*, *Alexander III.*, *Navarin*, and *Sissol Veliky*; the cruisers *Dimitri Donskoi*, *Admiral Nakhimoff*, *Svietlana*, *Vladimir Monomakh*; a coast defence ship the *Admiral Oushakoff*; the special service ships *Russi Ural*, *Anastasy*, *Kamchatka*, and the *Ilutish*; and 5 torpedo-boat destroyers. 5 Russian ships were captured—the battleships *Nikolai I.* and the *Orel*; the coast defence ships *Admiral Apraxine* and *Admiral Seniavin*; and 1 torpedo-boat destroyer. 9 Russian ships escaped; 5 cruisers, of which number the *Aurora*, *Jemchug*, and *Oleg* (with adm. Enquist on board wounded) escaped to Manila, and were interned; the *Almaz* succeeded in reaching Vladivostok; the *Izumrud* was wrecked in Vladimír bay; 2 special service ships escaped to Shanghai, 1 torpedo-boat destroyer to Shanghai, and another to Vladivostok. The Russian loss is estimated at 4,000 killed or drowned; 7,282 officers and men taken prisoners. The Japanese in the engagement lost 3 torpedo boats, 116 officers and men were killed and 538 wounded; the Japanese flagship *Mikasa* sustained the heaviest losses, 27-28 May, 1905

Japanese navy department, the necessity for secrecy no longer existing, announce the loss of the battleship *Yashima* by striking a mine while blockading Port Arthur, 15 May, 1904, and other naval losses hitherto withheld, i.e., the torpedo-boat destroyer *Abatsuki*, sunk by a mine while engaged on blockading duty before Port Arthur, 17 May; the gunboat *Oshima* sunk after a collision while co-operating with the army off the Liao-tung peninsula, 17 May; the t.b.-d. *Haya-tori*, mined and sunk while blockading Port Arthur, 3 Sept.; the gunboat *Atago* sunk by striking a rock before Port Arthur, 6 Nov.; the cruiser *Takasago* mined and sunk while blockading Port Arthur, 12 Dec. 1904. 31 May, "

 Many of the Japanese terms were accepted, but Russia firmly rejected the Japanese proposals for a war indemnity, the limitation of Russia's naval forces in the Far East, the surrender of the Russian ships interned in foreign ports, and the cession of Sakhalin; a deadlock resulted; president Roosevelt intervenes and addresses a direct personal appeal to the czar; ultimately the Japanese commissioners, acting under instructions from Tokio, withdraw their demand for an indemnity, the limitation of Russian naval power in the Far East, the surrender of the interned ships, and offer to cede half of the island of Sakhalin; on these terms an agreement was arrived at 29 Aug. "

* The following are the principal articles of the Treaty of Peace:—

Article II.—His majesty the emperor of Russia recognises the preponderant interest, from political, military, and economic points of view, of Japan in the empire of Corea, and stipulates that Russia will not oppose any measures for its government, protection, or control that Japan will deem necessary to take in Corea in conjunction with the Korean government; but Russian subjects and Russian enterprises are to enjoy the same status as the subjects and enterprises of other countries.

Article III.—It is mutually agreed that the territory of Manchuria shall be simultaneously evacuated by both Russian and Japanese troops. All rights acquired by private persons and companies shall remain intact.

Article IV.—The rights possessed by Russia in conformity with the lease to Russia of Port Arthur and Dalny, together with the land and waters adjacent, shall pass over entirely to Japan, but the properties and rights of Russian subjects are to be safeguarded and respected.

The respective portions of the line shall be employed only for commercial and industrial purposes. The rights of private parties or private enterprises, however, are to be respected. Both parties to this treaty remain absolutely free to undertake what they may deem fit on the expropriated ground.

RUSSO-TURKISH WAR.* The Russian and French governments having each taken a side in the dispute between the Greek and Latin churches as to the exclusive possession of the *Holy Places (which see)* in Palestine, the Porte advised the formation of a mixed commission, which decided in favour of the Greeks, and a firman was promulgated accordingly, 9 March, 1853: to this decision the French acceded.

The Russians make further claims, and prince Menschikoff (who arrived at Constantinople 28 Feb. 1853), by various notes (between 22 March and 18 May), demands that a convention should be signed by the sultan granting to the czar such a protectorate over the Greek Christians in Turkey,

make a junction of the lines which they own at Kouangtchengtse.

Article VIII.—It is agreed that the lines of the Manchurian railway shall be worked with a view to ensuring commercial traffic between them without obstruction.

Article IX.—Russia cedes to Japan the southern part of Saghalin Island as far north as the fiftieth degree of north latitude, together with the island depending thereon. The right of free navigation is assured in the bays of La Perouse and Tartary.

Article XI.—Russia shall make an agreement with Japan, giving the Japanese subjects the right to fish in Russian territorial waters in the seas of Japan, Okhotsk, and Behring.

Article XIII.—The Russians and Japanese reciprocally engage to exchange prisoners of war, paying the real cost of the keep of the same, such cost to be supported by documents.

* In 1844, when the czar was in England, he conversed with the duke of Wellington and lord Aberdeen (whom he had known many years) respecting the dissolution of the Turkish empire; and on his return he embodied his views in a memorandum drawn up by count Nesselrode, which was transmitted to London, but kept secret till March, 1854. In January and February of that year the czar had several conversations on the subject with the British envoy at St. Petersburg, sir G. H. Seymour, in one of which (Jan. 14) he compared Turkey to a "sick man" in a state of decrepitude, on the point of death, and made proposals to the British government as to the disposal of his property. He stated frankly that he would not permit the British to establish themselves at Constantinople; but said in another conversation, he would not object to their possessing Egypt. The purport of these conversations was conveyed in despatches to lord John Russell, who replied that the British government declined to make any provision for the contingency of the fall of Turkey. The czar made similar proposals to the French government with the same result.

RUTHERFURD'S ACT, LORD (13 & 14
 Vict. c. 36), for simplifying law proceedings in
 Scotland, passed 1850.

RUTHVEN, RAID OF, a term applied to the
 seizure of the person of James VI. of Scotland by
 William Ruthven, earl of Gowrie, and other nobles,
 in 1582, to compel the king to dismiss his favourites,
 Arran and Lennox. Ostensibly for this, Gowrie
 was judicially put to death by his two opponents in
 1584.

RYE-HOUSE PLOT, a plot (some think
 pretended) to secure the succession of the duke of
 Monmouth to the throne in preference to the duke
 of York (afterwards James II.), a Roman catholic.
 Some of the conspirators are said to have projected
 the assassination of the king, Charles II., and his
 brother. This design is said to have been frus-
 trated by the king's house at Newmarket accident-
 ally taking fire, which hastened the royal party
 away eight days before the plot was to take effect,
 22 March, 1683 ; see *Newmarket*. The plot was
 discovered 12 June following. Lord William
 Russell on 21 July, and Algernon Sidney on 7 Dec.
 following, suffered death for being concerned in this
 conspiracy. Both were illegally convicted. The
 name was derived from the conspirators' place of
 meeting, the Rye-house at Broxbourne, Hertford-
 shire.

S.

SAALFELD (Saxony, N. Germany). Here the Prussians, under prince Louis of Prussia, were defeated and their leader slain by the French under Lannes, 10 Oct. 1806.

SAARBRÜCK, the Roman *Augusti Muri* or *Saravon*, an open town on the left bank of the Saar, in Rhenish Prussia, founded in the tenth century, long subject to the bishops of Metz, afterwards ruled by counts (about 1237), and by the house of Nassau about 1380. It was captured by the French and retaken by the Germans 1676, reunited to France 1794-1814, and ceded to Prussia, 1815. On 2 Aug. 1870, it was bombarded by the French under Frossard (between 11 and 1 in the daytime), and the Prussians in small force were dislodged, and the town occupied by the French general Bataille. The mitrailleuses were said to be very effective. On the 6 Aug. the Prussian generals Gœben and Von Steinmetz, with the first army, recaptured Saarbrück, after a sanguinary conflict at the village of Spichenen. The loss was great on both sides. The French general François was killed, and the 2nd corps under Frossard nearly destroyed. The French retreated to Metz.

SABÆANS, the ancient inhabitants of Yemen, in S. Arabia; in the Old Testament called Sheba, *Gen. x. 28, Job vi. 19, &c.* The queen of Sheba is mentioned as having visited Solomon. The Sabæans were a wealthy and powerful people, carrying on an extensive trade of commodities as gold, ivory, spices, &c., obtained from India and Africa. In the 8th cent. B.C. "the people of Saba" paid tribute to Tiglath-Pileser and Sargon, kings of Assyria. A Roman expedition, under Elius Gallus, unsuccessfully invaded the country of the Sabæans, 4 B.C. Their religion included the worship of the sun and moon, and other deities.

SABBATAI ZEVI, a false prophet, and the founder of a sect of semi-Christians and semi-Jews in the middle of the 17th cent. He announced the beginning of a Messianic reign, and it is said that in 1664 he had some 80,000 followers. He was put to death by the sultan of Turkey in 1677.

SABBATARIANS. Traces exist of Sabbatarii, or Sabbathaires, among the sects of the 16th century on the continent. Upon the publication of the "Book of Sports" in 1618, a violent controversy arose among English divines on two points: first, whether the Sabbath of the fourth commandment was in force among Christians; and secondly, whether, and on what ground, the first day of the week was entitled to be distinguished and observed as "the Sabbath." In 1628, Theophilus Brabourne, a clergyman, published the first work in favour of the Seventh-day or Saturday, as the true Christian Sabbath. He and several others suffered great persecution for this opinion; but after the restoration there were three or four congregations observing the last day of the week for public worship in London, and seven or eight in the country parts of England. In 1851 there were three Sabbatarian or Seventh-day Baptist congregations in England; but in America (especially in the New England states) they are more nume-

rous.—Joseph Davis suffered imprisonment in 1670. He and his son bequeathed property to maintain the sect; and litigation respecting its disposal was settled by vice-chancellor Stuart in conformity with their intentions in June, 1870. Very few Sabbatarians then remained.

SABBATH, Heb. from *shabath*, "to rest." In the Decalogue the Sabbath is commanded to be observed as a day of rest for man and beast, the reason assigned being that God "rested the seventh day" from his labours in the work of creation; see *Gen. ii.*; *Exod. xx. 8*; *Isaiah lviii. 13*; and as a commemoration of the deliverance of the Israelites from bondage in Egypt, *Deut. v. 15*. The observance of the Sabbath by the Jews is first mentioned after the exodus of the Israelites from Egypt, but no direct evidence of its having been kept in patriarchal times is to be found in the Pentateuch (*which see*), although the formula "Remember" with which the fourth commandment begins might seem to imply that the observance of the Sabbath was familiar to the Israelites, but had fallen into neglect. In the later history of the Jews after the captivity the Sabbath was kept with great strictness, and the sanctity of the day guarded by many stringent rules. The Mishna, for example, enumerates 39 principal works which are forbidden on the Sabbath, and to each of these are attached several minor ones which might lead to breaking of the Sabbath. To such a degree was the holiness of the seventh day esteemed by the Jews that when Jerusalem was stormed by Ptolemy I. on a Sabbath the inhabitants would not stir to defend themselves. The early Christian Church observed the first day of the week in commemoration of the resurrection of Jesus Christ, and this gradually took the place of the Jewish Sabbath. The earliest law by which the observance of the first day of the week was ordained is the edict of Constantine, 321. The religious solemnization of the seventh day was not peculiar to the Jews. Prof. Sayce, "Ancient Empires of the East," states:—"In Babylonia and Assyria the week of seven days was an Accadian or Babylonian invention, the days of the week being dedicated to the moon, sun, and five planets. The 7th, 14th, 21st, and 28th days of the lunar month were kept like the Jewish Sabbath, and were actually so named in Assyrian. They were termed *dies nefasti* in Accadian, rendered 'days of completion (of labour)' in Assyrian; the Assyrian *Sabbatu* or 'Sabbath' itself being further defined as meaning 'completion of work' and 'a day of rest for the soul.'"—See *Sunday*.

SABBATICAL YEAR: a Jewish institution, 1491 B.C. *Exodus xxiii.* During every seventh year the very ground had rest, and was not tilled; and every forty-ninth year all debts were forgiven, slaves set at liberty, and estates, &c., that were before sold or mortgaged, returned to their original families, &c.

SABELLIANISM, from Sabellius (of Ptolemais in Egypt), who flourished in the 3rd century, and who taught that there was but *one* person in the Godhead, the other persons of the Trinity being but different names of the same person. This doctrine was condemned at a council at Rome, 260.

SABINES, an ancient people of central Italy, from whom the Romans, under Romulus, took away their daughters by force, having invited them to some public sports or shows on purpose. When the Sabines determined to revenge this affront, the women became mediators to their fathers in behalf of their husbands, the Romans, and a lasting peace was made between them, 750 B.C. The Sabines, who had supported the Samnites in their war with Rome, were thoroughly defeated by M. Curius Dentatus, and their lands annexed 290 B.C., and eventually the Sabines were combined with the Roman people.

SACCHARINE, see *Benzole*.

SACCHAROMETER, an instrument for determining the amount of sugar in solutions. Soleil, an optician, of Paris, in 1847 made use of rotary polarised light for this purpose in a saccharometer, since improved by Duboseq.

SACRAMENT (from *sacramentum*, an oath, obligation, also mystery). The Christian sacraments are baptism and the Lord's Supper. The council of Trent, in 1547, affirmed the doctrine of the schoolmen that there are seven sacraments: baptism, the Lord's Supper, confirmation, penance, holy orders, matrimony, and extreme unction. The name was given to the Lord's Supper by the Latin fathers. The wine was restricted to the clergy about the beginning of the 12th century. Communion in one kind only was authoritatively sanctioned by the council of Constance, 15 June, 1415. Henry VII. of Germany was poisoned by a priest by the consecrated wafer, 24 Aug. 1313. The sacramental wine was poisoned by the gravedigger of the church at Zurich, by which sacrilegious deed a number of persons lost their lives, 4 Sept. 1776. In 1614 members of both houses of parliament were ordered to take the sacrament, as a guard against the introduction of Roman Catholics. In 1673 the Test act was passed; repealed in 1828; see *Transubstantiation*.

"Society of the Blessed Sacrament" (English churchmen), London, founded, 1860; "Confraternity of the Blessed Sacrament," founded 1862; the two united, 1867.

SACRED BOOKS OF THE EAST. The publication of translations of the sacred books of the religion of the Brahmans, Buddhists, and Mohammedans, and of the followers of Khung-fu-tze and Lao-tze, edited by professor Max Müller, began in 1879. About 30 volumes have been published.

SACRED HARMONIC SOCIETY, see *Music*.

SACRED HEART OF JESUS; a form of devotion said to have been instituted in England in the seventeenth century, and much promoted by Marguerite Marie Alacoque, an enthusiastic French visitation nun who lived at Paray-le-Monial. She asserted that Christ had appeared to her,

and taken out her heart, placed it in his own, glowing in flame, and then returned it. She died in 1690. Many churches have been dedicated to the Sacred Heart; the most splendid is that erected on Montmartre, in Paris, 1874-91, at the cost of about 1,000,000*fr.* The festival of the Sacred Heart is held on Friday (in England, the Sunday) after the octave of Corpus Christi. A cloistered order of nuns of the Sacred Heart was founded by father Varin and Mme. Barat in 1800; it has numerous houses in Europe, America, and Australia. The chief of these in England is at Rochampton, and in Ireland at Roscrea.

SACRED WARS.—I. Declared by the Amphictyons against Cirrha, near Delphi, for robbery and outrage to the visitors to the oracle, 595 B.C. Cirrha was razed to the ground, 586.—II. Between the Phocians and Delphians for the possession of the temple at Delphi, 448, 447.—III. The Phocians, on being fined for cultivating the sacred lands, seized the temple, 357. They were conquered by Philip of Macedonia, and their cities depopulated, 346. See *Crusades*.

SACRIFICE was offered to God by Abel, *Gen.* iv. 4. Sacrifices to the gods were introduced into Greece by Phoroneus, king of Argos, 1773 B.C. Human sacrifices had their origin among primitive tribes. All sacrifices to the true God were to cease with the sacrifice of Christ, 33 A.D. *Heb.* x. 12-14. Pagan sacrifices were forbidden by the emperor Constantius II. 341.

SACRILEGE. In 1835, the punishment (formerly death) was made transportation for life. By 23 & 24 Vict. c. 96, s. 50 (1861), breaking into a place of worship and stealing therefrom was made punishable with penal servitude for life.

SACRIPORTUS (Latium, Italy). Here Sylla defeated the younger Marius and Papirius Carbo with great slaughter, B.C. 82, and became dictator, 81.

SADDLES. In the earlier ages the Romans used neither saddles nor stirrups. Saddles were in use in the 3rd century, and are mentioned as made of leather in 304, and were known in England about 600. Side-saddles for ladies were introduced by Anne, queen of Richard II., in 1388. *Stow*.

SADDUCEES, a Jewish sect, said to have been founded by Sadoc, a scholar of Antigonus, about 200 B.C., who, misinterpreting his master's doctrine, taught that there was neither heaven nor hell, angel nor spirit; that the soul was mortal, and that there was no resurrection of the body from the dead. The Sadducees rejected the oral law, maintained by the Pharisees. See *Matt.* xxii. 23; *Acts* xxiii. 8.

SADLER'S WELLS (N. London), so called after Mr. Sadler, who built an orchestra to entertain the invalids who used the waters medicinally, 1683. In time the orchestra was enclosed, and the building became a place for dramatic performances.

The theatre was opened in 1765. Eighteen persons were trampled to death at this theatre, on a false alarm of fire, 15 Oct. 1807; see under *Theatres*. Now (1910) a music-hall.

SAFETY LAMP. One was invented in 1815 by sir Humphry Davy, to prevent accidents which happen in coal and other mines. The safety-lamp is founded on the principle that flame, in passing through iron-wire meshes, loses so much of its heat as to be incapable of igniting inflammable gases. The father of all safety-lamps was Dr. Reid Clanny, of Sunderland, whose invention and improvements are authenticated in the *Transactions of the Society of Arts* for 1817. The "Geordy," constructed by George Stephenson, the engineer, in 1815, is said to be the safest. A miner's electric light, by M.M. Dumas and Benoit, was exhibited in Paris on 8 Sept. 1862. On 14 Aug. 1867, safety-lamps were rigidly tested by several mining engineers, and serious doubts thrown upon their complete efficacy. Col. Shakespear's safety lamp (light extinguished by opening) exhibited at Royal Institution, &c., May, 1879. Messrs Fleuss and Foster's new safety mining lamp approved, Jan. 1884.

Mr. J. Wilson-Swan's electric safety lamp, weighing 64 lb. exhibited at Aberdeen meeting of British Association, Sept. 1885.

Mr. Charles D. Aria's safety lamp reported successful; the supply of mineral oil is isolated from the burner, 1889.

The Thornbury miners' lamp (patented 16 Feb. 1889) tried at Aldwarke Main Collieries by Mr. C. E. Rhodes, and subjected to experiments by prof. Dewar and sir Frederick Abel, who declare that this lamp fulfils the conditions required by the royal commission in 1886. Paraffin and other mineral oils may be used in this lamp, reported Nov. 1889.

H. Davis in 1897 patented a method of lighting miners' safety oil lamps by an electric spark applied from outside the lamp, and Paterson and others have applied the same method in other ways with the object of being able to light the lamps in the mine without matches and flame lights and danger of explosion.

Many inventors have given their attention to the improvement of electric safety lamps for miners, and one of the most recent, 19-8-1909, is the "Fors."

SAFFRON (*saffran*, French; *saffrano*, Italian), the flower of crocus, was first brought to England in the reign of Edward III. by a pilgrim, about 1339, probably from Arabia, as the word is from the Arabic *saphar*. *Miller*. It was cultivated in England in 1582.

SAGAS. Early Icelandic tales, dated from the 10th century. See *Eddas*.

SAGE (*Sauge*, French; *Salvia*, Latin), a wholesome herb. *Mortimer*. The Mexican sage, *Salvia mexicana*, was brought from Mexico, 1724. The blue African sage, *Salvia africana*, and the golden African sage, *Salvia aurea*, were brought to England from the Cape of Good Hope in 1731.

SAGUNTUM, or **ZACYNTHUS**, now Murviedro, in Valencia, E. Spain, renowned for the dreadful siege it sustained, 219 B.C. The citizens, after performing incredible acts of valour for eight months, chose to be buried in the ruins of their city rather than surrender to Hannibal. They burnt themselves, with their houses, and the conqueror became master of a pile of ashes, 218 B.C.

SAHARA, a great sandy desert, North Africa, south of Barbary States. A project for making an inland sea here was entertained in 1883, and the construction of a railway was proposed in Algeria, Oct. 1890. A large natural reservoir of water at

El Golea, in the desert, was discovered early 1891. M. Foureau's 12 years' exploration, rich in scientific results; see *French West Africa*, 1898-1900. M. SALADS are stated to have been in use in the middle ages; lettuces are said to have been introduced into England from the Low Countries, 1520-47.

SALAMANCA (W. Spain), taken from the Saracens 861. The university was founded 1240, and the cathedral built 1513. Near here the British and allies, commanded by lord Wellington, totally defeated the French army under marshal Marmont, 22 July, 1812. The loss of the victors was most severe, amounting in killed, wounded, and missing, to nearly 6,000 men. Marmont left in the victor's hands 7,141 prisoners, 11 pieces of cannon, 6 stands of colours, and 2 eagles. This victory was followed by the capture of Madrid. Population, about 35,000.

SALAMIS (near Athens). In a great sea-fight here, 20 Oct. 480 B.C., Themistocles, the Greek commander, with only 310 sail, defeated the fleet of Xerxes, king of Persia, which consisted of 1,000 sail.—Near Salamis, in Cyprus, the Greeks defeated the Persian fleet, 449 B.C.; and Demetrius Poliorcetes defeated the fleet of Ptolemy and his allies, 306 B.C.

SALASSI, a turbulent Alpine tribe, were thoroughly subdued by Terentius Varro, 25 B.C., and a Roman colony established in their territories (now Aosta).

SALDANHA BAY, S. Atlantic Ocean; northward of the Cape of Good Hope. Here on 17 Aug. 1796, a Dutch squadron, under admiral Lucas, was captured by vice-admiral sir George Keith Elphinstone, without resistance; sir George was created lord Keith.

SALERNO (Salernum, S. Italy), an ancient Roman colony. Its university, with a celebrated school of medicine, reputed to be the oldest in Europe, was founded by Robert Guiscard the Norman, who seized Salerno in 1077.

SALIQUE or **SALIC LAW**, by which females are excluded from inheriting the crown of France, is said to have been instituted by Pharamond, 424, and ratified in a council of state by Clovis I., the real founder of the French monarchy, in 511. *Hénault*. This law, introduced into Spain by the Bourbons 1700, was formally abolished by decree 29 March, 1830; and on the death of Ferdinand VII. his daughter succeeded as Isabella II., 29 Sept. 1833; see *Spain*. By this law also Hanover was separated from England, when queen Victoria ascended the English throne, 1837.

SALISBURY (Wilts), founded in the beginning of the 13th century, on the removal of the cathedral hither from Old Sarum. National councils or parliaments were repeatedly held at Salisbury, particularly in 1296, by Edward I.; in 1328, by Edward III.; and in 1384. Henry Stafford, duke of Buckingham, was executed here by order of Richard III., in 1483.—On **SALISBURY PLAIN** is Stonehenge (*which see*). This plain was estimated at 500,000 acres. On it were so many cross roads, and so few houses to take directions from, that Thomas, earl of Pembroke, planted a tree at each milestone from Salisbury to Shaftesbury, for the traveller's guide. The autumn military manoeuvres took place on Salisbury Plain, Aug., Sept. 1872; again 31 Aug. 1898, and since; see under *Army*.—The first seat of the **BISHOPRIC** was at Sherborne, St. Aldhelm being prelate, 705. Herman removed the seat to Old Sarum, about 1072; and the see was removed to Salisbury by a papal bull, in 1217. It has yielded to the church of Rome one saint and two cardinals. The building of the cathedral commenced 28 April, 1220, and was completed in 1258. This edifice is reckoned one of our finest ecclesiastical erections. Its spire, the loftiest in the kingdom, was considered in danger in April, 1864, and subscriptions were begun for its immediate repair. The choir was re-opened, after restoration by sir G. G. Scott, 1 Nov. 1876; spire and turrets restored under sir Arthur Blomfield, March, 1898. The bishopric is valued in the king's books at 1,367*l.* 11*s.* 8*d.* Present income 5,000*l.* Population, 1891, 15,980; 1901, 17,117; 1909 (est.), 22,065.

SALT (chloride of sodium, a compound of the gas chlorine and the metal sodium) is procured from the rocks in the earth, from salt-springs, and from sea-water. The famous salt-mines of Wielitzka, near Cracow in Poland, have been worked 600 years. The salt-works in Cheshire, called the *Wiches* (Nantwich, Northwich, and Middlewich), were of great importance in the time of the Saxon heptarchy. The salt-mines of Staffordshire were discovered about 1670. Salt duties were first exacted in 1702; they were renewed in 1732; reduced in 1823; and in that year were ordered to cease in 1825. During the French war the duty reached to 30*l*. per ton. For the salt-tax in France see *Gabelle*. The government salt monopoly in India was abolished in May, 1863, by sir C. Trevelyan. Since 1797 salt has been largely employed in the manufacture of chloride of lime or bleaching powder (by obtaining its chlorine), and soap (by obtaining its soda). On this are based the chemical works of Cheshire, Lancashire, and other places. See under *Alkalies*.

Much distress in the salt districts of Cheshire through the subsidence of land, 1887-8. The proprietors of the Cheshire salt mines combined to form a "trust" or syndicate in the autumn of 1888; central office, Northwich; the trade being nearly ruined by great competition, first meeting 27 Sept. 1888.

SALT-PETRE (from *sal petrae*, salt of the rock), or Nitre, is a compound of nitric acid and potash (nitrogen, oxygen, and potassium), and hence is called nitrate of potash. It is the explosive ingredient in gunpowder, many detonating powders, and lucifer matches. Boyle in the 17th century demonstrated that salt-petre was composed of aqua fortis (nitric acid) and potash; the discoveries of Lavoisier (1777) and Davy (1807) showed its real composition. Its manufacture in England began about 1625. During the French revolutionary war, the manufacture was greatly increased by the researches of Berthollet.

SALUTE AT SEA. It is a received maxim at sea, that he who returns the salute always fires fewer guns than he receives, which is done even between the ships of princes of equal dignity; but the Swedes and Danes return the compliment without regarding how many guns are fired to them. The English claim the right of being saluted first in all places, as sovereigns of the seas; the Venetians claimed this honour within their gulf, &c. See *Flag*, and *Naval Salute*.

SALVADOR, SAN, one of the Bahamas, and the first point of land discovered in the West Indies or America by Columbus. It was previously called Guanahani, or Cat's Isle, and Columbus (in acknowledgment to God for his deliverance) named it San Salvador when he first saw it, 11 Oct. 1492. The capital, San Salvador, was destroyed by an earthquake, 16 April, 1854, and is now abandoned.

SAMARITANS. Samaria was built by Omri, 925 B.C.; and became the capital of the kingdom of Israel. On the breaking up of that kingdom (721 B.C.), the conqueror Shalmaneser placed natives of other countries at Samaria. The descendants of these mixed races were abominable to the Jews, and much more so in consequence of the rival temple built on Mount Gerizim by Sanballat the Samaritan, 332 B.C., which was destroyed by John Hyrcanus, 130 B.C.; see *John* iv. & viii. 48, and *Luke* x. 33. Being much abused, the privilege of sanctuary was limited by the pope in 1503 (at the request of Henry VII.), and much reduced in 1540. In London, persons were secure from arrest in certain localities: these were the Minories, Salisbury - court, Whitefriars, Fulwood's - rents, Mitre-court, Baldwin's-gardens, the Savoy, Clink, Deadman's-place, Montague-close, and the Mint. This security was abolished 1697, but lasted in some degree till the reign of George II. (1727).

SANSULOTTES, a term of reproach applied

to the leaders of the French republicans about 1790,

on account of their negligence in dress, and after-

wards assumed by them with pride. The comple-

mentary days of their new calendar were named by

the Mountain party *Sansculottides*.

SANSKRIT, the language of the Brahmins of

India, spoken at the time of Solomon, has been

much studied of late years. Sir Wm. Jones, who

published a translation of the poem Sakuntalā, in

1783, discovered that a complete literature had been

preserved in India, comprising sacred books (the

Vedas), history and philosophy, lyric and dramatic

poetry. Texts and translations of many works have

been published by the aid of the East India Com-

pany, the Oriental Translation Fund, and private

liberality. The professorship of Sanskrit at Ox-

ford was founded by colonel Boden. The first pro-

fessor, H. H. Wilson, appointed in 1832, translated

part of the Rig-veda Sanhitā, the sacred hymns of the Brahmins, and several poems, &c. A. A. Macdonell, M.A., appointed Boden professor of Sanskrit, 1899. Professor Monier Williams (elected 1860, knt. 1886, died 11 April, 1899) published an English and Sanskrit dictionary, 1851. Professor Max Müller published his history of Sanskrit Literature in 1859, and edited the original text of the Vedas (he died 28 Oct. 1900). Philologists have discovered an intimate connection between the Sanskrit, Persian, Greek, Latin, Teutonic, Slavonian, Celtic, and Scandinavian languages. Prof. Buehler, eminent Oriental scholar, professor of Sanskrit at Vienna, drowned in the lake of Constance, 8 April, 1898; Dr. Peter Peterson, of Bombay, an eminent Sanscritist, dies Sept. 1897.

SANTA CRUZ (Teneriffe, Canary Isles). Here admiral Blake, by daring bravery, entirely destroyed sixteen Spanish ships, secured with great nautical skill, and protected by the castle and forts on the shore, 20 April, 1657. *Clarendon*. In an unsuccessful attack made upon Santa Cruz by Nelson, several officers and 141 men were killed, and the admiral lost his right arm, 21 July, 1797.* See *Virgin Isles*.

SANTANDER. A thriving Spanish port in the Bay of Biscay; it has suffered by war, and was sacked by Soult, 1808. Population, 1897, city, 50,640; province, 203,673; 1910, (est.), city, 63,750; province, 321,750.

Gamazo and others, 7 Nov. 1893; see *Mansion House Funds*, 1893.

A second explosion in the vessel, 18 workmen, &c. killed, 21 March; ship blown up by order, 30 March, 1894.

SANTIAGO DE COMPOSTELLA (N.W. Spain) was sacked by the Moors in 995, and held by them till it was taken by Ferdinand III. in 1235. The order of Santiago, or St. James, was founded about 1170 to protect pilgrims to the shrine of St. James the Greater (Acts xii. 2), said to be buried in the cathedral. The town was taken by the French in 1809, and held till 1814.—**SANTIAGO**, the capital of Chili, S. America, founded by Valdivia in 1541, has suffered much by earthquakes, especially in 1822 and 1829. Population, 1885, 189,332; 1899, 320,633; 1907, 332,725. See *Spanish-American war*.

At a festival in honour of the Virgin Mary, 8 Dec. 1863, when the church of the Campana, brilliantly illuminated, was crowded, the combustible ornaments took fire, and above 2,000 persons, principally women, perished. On 20 Dec. the government ordered the church to be razed to the ground. See *Chili*, 1891.

SAPPERS AND MINERS, a name given in 1812 to the non-commissioned officers and privates of the corps of Royal Engineers. *Brande*.

* Captain Fremantle, the friend of Nelson, and his companion in most of his brilliant achievements, was also wounded in the arm immediately before Nelson had received his wound in the same limb. The following note, addressed to the lady of Captain Fremantle (who was on board with her husband at the time he wrote), has been preserved, as being the first letter written by the hero with his left hand:—"MY DEAR MRS. FREMANTLE,—Tell me how Tom is, I hope he has saved his arm. *Mine* is off; but, thank God! I am as well as I hope he is. Ever yours, "HORATIO NELSON."

SAPPHIC VERSE, invented by Sappho, the lyric poetess of Mitylene. She was equally celebrated for her poetry, beauty, and a hopeless passion for Phaon, a youth of her native country, on which last account it is said she threw herself into the sea from Mount Leucas, and was drowned, about 590 B.C. The Lesbians, after her death, paid her divine honours, and called her the tenth muse. Some consider the story fabulous.

SAPPHIRE, a precious stone of an azure colour, and transparent; in hardness it exceeds the ruby, and is next to the diamond. One was placed in the Jewish high priest's breast-plate, 1491. Thamas Kouli Khan is said to have possessed a sapphire valued at 300,000*l.*, 1733. Artificial sapphires were made in 1857 by M. Gaudin. Equal parts of alum and sulphate of potash were heated in a crucible. Mr. Pierpont Morgan presents two sapphires, one reported to be the largest and the other the most beautiful in the world, to the Nat. Hist. museum, New York, July, 1902.

SARABAND. A stately dance invented by Sarabanda, a dancer of Seville, in the 16th century.

SARACENS, a name of doubtful origin, popularly applied in the middle ages and since to the Arabs, Moors, and other Mahometans who conquered the East, Spain, Sicily, and parts of Africa, and resisted the Crusaders. See *Mahometanism*.

SARAGOSSA (N.E. Spain), anciently Cæsarea Augusta, founded 27 B.C., was taken by the Goths, 470; by the Arabs, 712; by Alfonso of Spain, 1118. Here Philip V. was defeated by the archduke Charles, 20 Aug. 1710. On 17 Dec. 1778, 400 of the inhabitants perished in a fire at the theatre. Saragossa, after successfully resisting the French in 1808, was taken by them after a most heroic defence by general Palafox, 20 Feb. 1809. The inhabitants, of both sexes, resisted until worn out by fighting, famine, and pestilence. Population, 1887, 92,407; 1900, 100,000; 1910 (est.), 116,125.

This was the greatest check the British suffered in the war.

SARAWAK, see *Borneo*.

SARDINIA, an island in the Mediterranean, successively possessed by the Phenicians, Greeks, Carthaginians (about 500 B.C.), Romans (238), Vandals (A.D. 456), Saracens (720-40), Genoese (1022), Pisans (1165), Aragonese (1352), and Spaniards. From settlers belonging to these various nations the present inhabitants derive their origin. Victor Amadeus, duke of Savoy, acquired Sardinia in 1720, with the title of king; see *Savoy*. Population of the Sardinian dominions in 1858, 5,194,807; of Sardinia alone, 1887, 723,833; 1901, 789,314; 1910, (est.) 865,000.  From this point the kings of Sardinia became kings of united Italy. See *Italy*.]

SARMATIA, the ancient name for the country in Asia and Europe between the Caspian Sea and the Vistula, including Russia and Poland. The Sarmatæ or Sauromatæ troubled the early Roman empire by incursions. After subduing the Scythians they were subjugated by the Goths, in the 3rd and 4th centuries. They joined the Huns and other barbarians in invading Western Europe in the 5th century.

SARNO (S. Italy). Near this river, Teias, king of the Goths, was defeated and slain by Justinian's general Narses, March, 553.

SARUM, OLD (Wiltshire), an ancient British town, the origin of Salisbury (*which see*). Although completely decayed, it returned two members to parliament till 1832.

SASSANIDES, descendants of Artaxerxes or Artashir, whose father, Babek, was the son of Sassan. He revolted against Artabanus, the king of Parthia; defeated him on the plain of Hormuz, 226; and re-established the Persian monarchy. This dynasty was expelled by the Mahometans, 652; see *Persia*.

SATAN, see *Devil Worship*.

SATIRE. About a century after the introduction of comedy, satire made its appearance at Rome in the writings of Lucilius, called the inventor of it, 116 B.C. *Lucy*. The Satires of Horace (35 B.C.), Juvenal (about A.D. 100), and Persius (about A.D. 60), are the most celebrated in ancient times, and those of Churchill (1761) and Pope (1729), in modern times. Butler's "*Hudibras*," satirizing the presbyterians, first appeared in 1663. *Satire Menippée*, a celebrated satirical pamphlet, partly in verse and partly in prose, attacking the policy of the court of Spain and the league, written in the style of the biting satires of the cynic philosopher

Menippus. The first part, "*Catholicon d'Espagne*," by Leroy, appeared in 1593; the second, "*Abregé des Etats de la Ligue*," by Gillot, Pithou, Rapin, and Passerat, appeared in 1594. *Bouillet*.

SATRAPIES, divisions of the Persian empire, formed by Darius Hystaspes about 516 B.C.

SATTARA (W. India) was long a flourishing state, founded by Sevajee about 1646; subjugated by the Maharrattas about 1749; conquered by the British, 1818; ruled by a rajah under the protection of the company. The last rajah died without issue in 1848; when the country was annexed.

SATURDAY (the last, or seventh day of the week; the Jewish Sabbath; see *Sabbath*). It was so called from an idol worshipped on this day by the Saxons, and according to Versteegan, was named by them Saterne's day. *Pardon*. It is more probably from Saturn, *dies Saturni*. *Saturday Review*, an independent literary weekly journal, was first published, 3 Nov. 1855. See *Hospital and Lifeboat*.

SATURN, the planet, ascertained to be about 900 millions of miles distant from the sun, and its diameter to be about 77,230 miles. One of the 10 satellites was discovered by Huyghens (25 March, 1655); four by Cassini (1672-84); two by sir William Herschel (1789), one by Bond and Lassell (1848), and one by prof. Pickering in Arizona, U.S. (18 March, 1899). The 10th satellite was discovered by prof. Pickering, 29 April, 1905. The ring was observed by Galileo, about 1610; its annular form determined by Huyghens, about 1655. Cassini discovered that the ring consisted in fact of two concentric rings, the inner brighter than the outer, in 1675. An inner ring was detected in 1850 by Dawes in England (29 Nov.), and by Bond in America. The ring, or series of concentric rings, is now considered to be composed of a multitude of small satellites.

SATURNALIA, festivals in honour of Saturn, father of the gods, were instituted long before the foundation of Rome, in commemoration of the freedom and equality which prevailed on the earth in his golden reign. Some, however, suppose that the Saturnalia were first observed at Rome in the reign of Tullus Hostilius (673-640 B.C.), after a victory obtained over the Sabines: whilst others suppose that Janus first instituted them in gratitude to Saturn, from whom he had learned agriculture. Others assert that they were first celebrated after a victory obtained over the Latins by the dictator Posthumius, when he dedicated a temple to Saturn, 497 B.C. During these festivals no business was allowed, amusements were encouraged, and distinctions ceased.

SAVAGE CLUB, instituted by various literary men, in 1857, facetiously terming themselves "*savages*," on account of their freedom from conventionalism.

SAVAGE ISLAND was discovered by capt. Cook in 1774, and so named because of the fierce attack made by the natives on his party. The island has long been a field of missionary enterprise; the inhabitants, about 5,000, are now Christians, and it was ceded to Great Britain by the Samoa agreement, Nov. 1899.

See *Cannibal*, 1910.

SAVANDROOG or **SEVERNDROOG** (My-sore, S. India), a strong fortress, was captured by the British, 2 April, 1755, and 21 Dec. 1791.

SAVANNAH, a city and port of Georgia on the river Savannah, U.S.A., founded in 1733, and incorporated, 1789; it was taken by the British in the American war in 1778, and by gen. Sherman, the northern general, 21 Dec. 1864. Pop. 1900 54,244; 1910 (est.), 70,000.

SAVINGS BANKS. The first of these was instituted at Berne, in Switzerland, in 1787, by the name of *caisse de domestiques*, being intended for servants only; another was set up in Basel, in 1792, open to all depositors. The rev. Joseph Smith, of Wendover, began a Benevolent Institution in 1799; and in 1803-4, a "charitable bank" was instituted at Tottenham by Miss Priscilla Wakefield. The rev. Henry Duncan established a parish bank at Ruthwell in 1810. One was opened in Edinburgh in 1814. The benefit clubs, among artisans, having accumulated stocks of money for their progressive purposes, a plan was adopted to identify these funds with the public debt of the country, and an extra rate of interest was held out as an inducement; hence were formed savings' banks to receive small sums, returnable with interest on demand.

Rt. hon. Geo. Rose developed the system, and brought it under parliamentary control, 1816.

Acts to consolidate and amend previous laws relating to savings' banks were passed in 1828 and 1847; extended to Scotland in 1835; again consolidated and amended in 1863, 1880, and 1887.

On 20 Nov. 1851, the number of savings' banks in Great Britain and Ireland was 574, besides above 20,000 friendly societies and charitable institutions. The depositors (in the banks) were 1,092,581, while the societies embraced a vast but unknown number of persons: the amount of deposits was 32,893,511*l*.

Pope Pius VII. was kept here by Napoleon I., 1809-12. Soap is said to have been invented here, and hence its French name *savon*.

SAVOY, the ancient *Sapaudia* or *Sabaudia* formerly a province in N. Italy, east of Piedmont. It became a Roman province about 118 B.C. The Alemanni seized it in A.D. 395, and the Franks in 490. It shared the revolutions of Switzerland till about 1043, when Conrad, emperor of Germany gave it to Humbert, with the title of count. Count Thomas acquired Piedmont in the 13th century. Amadeus, count of Savoy, having entered his dominions, solicited Sigismund to erect them into a duchy, which he did at Cambray, 19 Feb. 1416. Victor-Amadeus, duke of Savoy, obtained the kingdom of Sicily from Spain, by a treaty, in 1713, but afterwards exchanged it with the emperor for the island of Sardinia, with the title of king, 1720. The French subdued Savoy in 1792, and made it a department of France, under the name of Mont Blanc, in 1800. It was restored to the king of Sardinia in 1814; but with Nice annexed to France in 1860, in accordance with a vote by universal suffrage, 23 April, 1860. The annexation was censured in England.

SAVOY PALACE (London), was built by Peter of Savoy, uncle of Eleanor, queen of Henry II., in 1245, on land granted to him. He gave it to the fraternity of Mountjoy (Monte Jovis), from whom it was purchased by queen Eleanor for her son Edmund. Here resided John, king of France, when a prisoner, 1357 *et seq.* The Savoy was burnt by Wat Tyler and his followers, 1381. It was restored as an hospital of St. John the Baptist by Henry VII. about 1505. The fruitless CONFERENCE of bishops and eminent puritans for the revision of the liturgy was held at the Savoy, April-July, 1661. The hospital was dissolved in 1702. The buildings (used as a military prison) were removed to make way for Waterloo-bridge and its approaches, 1817-19. The privilege of sanctuary which the ancient chapel formerly possessed, and which was much abused, was abolished by parliament in 1697. The chapel after several restorations, was destroyed by fire, 7 July, 1864, and was rebuilt at queen Victoria's expense, and re-opened 26 Nov. 1865.

SAW. Invented by Dædalus. *Pliny*. Invented by Talus. *Apollodorus*. Talus, it is said, having found the jaw-bone of a snake, employed it to cut through a piece of wood, and then formed an instrument of iron like it. Saw-mills were erected in Madeira in 1420; at Breslau in 1427. Norway had the first saw-mill in 1530. The bishop of Ely, ambassador from Mary of England to the court of Rome, describes a saw-mill there, 1555. The attempts to introduce saw-mills in England were violently opposed, and one erected by a Dutchman in 1663 was forced to be abandoned. Saw-mills were erected near London about 1770. The circular saw was introduced into England about 1790. The *saw-gin* for separating cotton wool from the pod, invented by Eli Whitney, an American, in 1793, led to the immense growth of cotton in the southern states of the Union. Powis and James's band-saw was patented in 1858.

SCOTTISH HISTORY society founded in Edinburgh in 1886.

SCREW, was known to the Greeks. The pumping-screw of Archimedes, or screw-cylinder

for raising water, invented about 236 B.C., is still in use. It is stated that with the assistance of the screw, one man can press down or raise up as much as 150 men can do without it.—The SCREW-PROPELLER consists of two or more twisted blades, like the vanes of a windmill, set on an axis, running parallel with the keel of a vessel, and revolving beneath the water at the stern. It is driven by a steam-engine or electric motor. The principle was shown by Hooke in 1681, and afterwards by Du Quet, Bernoulli, and others. Patents for propellers were taken out by Joseph Bramah in 1784; by Wm. Lyttelton in 1794; and by Edward Shorter in 1799. But these led to no useful result. In 1836 patents were obtained by Francis Pettit Smith (knighted July, 1871; died, 12 Feb. 1874) and captain John Ericsson (died, aged 86, March, 1889); and to them the successful application of the screw-propeller must be attributed. The first vessels with the screw were the *Archimedes*, built on the Thames in 1838 by H. Wimshurst, and the *Rattler*, built in the United States (1844), and tried in England in 1845. Double screw-propellers are now employed.

No appeal for funds except by prayer has been made, but without application 1,791,722*l*. was received from voluntary contributions up to 31 May, 1909. Income for year ending 31 May, 1909, 31,406*l*.; expenses, 29,733*l*.; balance in hand, 2,506*l*.

SCRUTIN (French for ballot). In *scrutin de liste* the voter-writes on his paper as many names as there are persons to be elected, for instance for the whole department. In *scrutin d'arrondissement*, the members are elected separately. The adoption of one of these modes was much discussed in France in 1875. The conservatives prefer the latter, the radicals the former. See *France*, Nov. 1875. The *scrutin de liste* was adopted in the elections of 1848, 1849, 1871, and 1875.

M. Bardoux's bill for adopting the *scrutin de liste* (warmly advocated by M. Gambetta), was passed by the chamber of deputies (243-235), 18 May, 1881; rejected by the senate (148-114), 9 June, 1881; again rejected, Jan. 1882.

M. Waldeck-Rousseau's bill for the *scrutin de liste* passed by the deputies (412-99), 24 March, finally passed, 8 June, 1885.

The bill for the restoration of the *scrutin d'arrondissement* passed by the chamber 11 Feb. and senate 13 Feb. 1880.

The *scrutin de liste* was adopted by the Italian chamber, 14 Feb. 1882.

SCULLABOGUE, see *Massacres*, 1798.

SCULPTURE is said to have begun with the Egyptians. Bezaleel and Aholiab built the tabernacle in the wilderness, and made all the vessels and ornaments, 1491 B.C., and their skill is recorded as the gift of God. *Exod.* xxxi. 3. Dipænus and Scyllis, statuarys at Crete, established a school at Sicyon. Pliny speaks of them as being the first who sculptured marble, and polished it; all statues

before their time being of wood, 568 B.C. Alexander gave Lysippus the sole right of making his statues, 326 B.C. He left no less than 600 pieces, some of which were so highly valued in the age of Augustus, that they sold for their weight in gold. Sculpture did not flourish among the Romans, and in the middle ages with some fine exceptions, was generally degraded. With the revival of painting, it revived also; and Donato di Bardi, born at Florence, A.D. 1383, was the earliest professor among the moderns. An institute of sculptors was established in 1861. The society of British sculptors was inaugurated 26 Jan. 1904. See *Royal Academy and Statues*.

SCUTAGE or **ESCUAGE**. The service of the shield (scutum) is either uncertain or certain. Escuage uncertain is where the tenant by his tenure is bound to follow his lord; and is called Castleward, where the tenant is bound to defend a castle. Escuage certain is where the tenant is set at a certain sum of money to be paid in lieu of such uncertain services. The first tax levied in England to pay an army, 5 Hen. II. 1159. *Cowel*.

SCUTARI, Asiatic Turkey, opposite Constantinople, of which it is a suburb. It was anciently called *Chrysopolis*, golden city, in consequence, it is said, of the Persians having established a treasury here when they attempted the conquest of Greece. Near here Constantine finally defeated Licinius, 323. The hospital was occupied by the sick and wounded of the Anglo-French army, in 1854-5, whose sufferings were much alleviated by the kind exertions of Miss Florence Nightingale and a band of nurses under her, aided by a large fund of money (£15,000.) subscribed by the public. Explosion of powder magazine by lightning, about 150 killed, 8 June, 1883. Population, 1901, about 82,400.

SCYLLA and **CHARYBDIS**. Two sea-monsters who, according to the Homeric legend, dwelt on the opposite sides of a narrow sea-strait. Scylla had 12 feet, 6 long necks and mouths, with 3 rows of sharp teeth in each mouth, and barked like a dog. Charybdis, who dwelt under a cliff, three times a day sucked down the sea and threw it up again. Ulysses sailed by these monsters, but lost 6 of his crew, who were seized by Scylla. In later times, the name of Charybdis was applied to a "race" or rapid in the straits of Messina, regarded as specially dangerous to navigators, because in avoiding it they ran the risk of being wrecked on Scylla, a rock opposite. Hence the proverb: "To shun Charybdis and fall into Scylla."

SCYTHIA, situate in the most northern parts of Europe and Asia. The boundaries were unknown to the ancients. The Scythians made several irruptions upon the more southern provinces of Asia, especially 624 B.C., when they remained in possession of Asia Minor for twenty-eight years, and at different periods extended their conquests in Europe, penetrating as far as Egypt; see *Tartary*.

SEAL FISHERY ACT, passed 14 June, 1875; another act, 29 June, 1893, see *Behring Straits*. Seal fisheries (N. Pacific) act, relating to Russia, passed, 27 June, 1895.

SEALS or **SIGNETS**. Engraved gems were used as such by the Egyptians, Jews, Assyrians, and Greeks; see *Ecod.* xxviii. 14. Ahab's seal was used by Jezebel, 899 B.C. (1 *Kings* xxi. 8). The Romans in the time of the Tarquins (about 600 B.C.) had gemmed rings. They sealed rooms, granaries, bags of money, &c. The German emperor, Frederick I. (A.D. 1152) had seals of gold, silver, and tin. Impressions of the seals of Saxon kings are extant; and the English great seal is attributed to Edward the Confessor (1041-66). "A seal with armorial bearings before the 11th century, is certainly false." *Fosbroke*. The most ancient English seal with arms on it is said to be that of Richard I. or John. White and coloured waxes were used. Our present sealing-wax, containing shellac, did not come into general use in Germany and England until about 1556. Red wafers for seals came into use about 1624; but

were not used for public seals till the 18th century. A seal acquired by the British Museum made of black hematite, thought to be Hittite, found at Yuzgat in Asia Minor, announced Nov. 1886.

SEAMEN. In consequence of the great loss of life by wrecks of merchant vessels, attributed to bad ships and overloading, a commission of inquiry was agreed to by parliament on the motion of Mr. S. Plimsoll, 4 March, 1873.

The report issued in September tended to justify the public apprehensions, but suggested no remedy. The report presented to parliament, 2 July, 1874, condemned the existing insurance system, and recommended increased responsibility of owners and others, and strengthening the powers of the Board of Trade for investigation.

SEAS. The claim of England to rule the British seas is of very ancient date. Arthur is said to have assumed it, and Alfred afterwards supported this claim. It was maintained by Selden, and measures were taken by government in consequence, 8 Chas. I. 1633. The Dutch, after the death of Charles I., made some attempts to obtain it, but were roughly treated by Blake and other admirals. Russia and other powers of the north armed to avoid search, 1780; again, 1800; see *Armed Neutrality and Flag*. The international rule of the road at sea was settled in 1862; (new rules were issued in 1870 and 19 Aug. 1884). Mr. Wm. Stirling Lacon proposed to reduce the rules from 749 words to 144, for simplicity and security. His form had been nine times before parliament, 1873. Revised rules issued by the admiralty in a "Fleet Circular," Nov. 1885.

The British Board of Trade appointed a committee to consider measures for the establishment of a "new rule of the road at sea" . . . 1 Aug. 1890

The committee adopted the regulations recommended by the Washington conference in 1889 (see *Navigation Laws*), in spite of much opposition from the Chamber of Shipping of the United Kingdom, the General Shipowners' Society of London, the committee of Lloyd's, and other kindred bodies; reported . . . Dec. 1894

Committee appointed by the board of trade, March, 1895; report issued, the new rules supported but simplification recommended, April, 1896; another committee appointed respecting collisions at sea, May, 1897; final report 13 May; rules to be enforced . . . 1 July, 1897

SEA SERPENT, GREAT, the name given to an animal popularly believed to exist, especially in deep tropical seas, but much controverted by zoologists, sir Richard Owen and others.

SEASONS. The four natural divisions of the year.

In the north temperate regions in 1910 the spring quarter began 21 March, 0 p.m.; the summer, 22 June, 8 a.m.; the autumn, 23 Sept. 11 p.m.; the winter, 22 Dec. 5 p.m. See *Lapland seasons under Year*.

SEBASTIAN, ST. (N. Spain), was taken by the French, under the duke of Berwick, in 1719. It was besieged by the British and allied army under Wellington. After a most heavy bombardment, by which the whole town was laid nearly in ruins, it was stormed by general Graham (afterwards lord Lynedoch), and taken 31 Aug. 1813.—On 5 May, 1836, the fortified works, through the centre of which ran the high road to Hernani, were carried by the English auxiliary legion under general Evans, after very hard fighting. The British naval squadron, off St. Sebastian, under lord John Hay, lent very opportune aid to the victors in this contest.—A vigorous assault was made on the lines of general De Lacy Evans, at St. Sebastian, by the Carlists, 1 Oct. 1836. Both parties fought with bravery. The Carlists were repulsed, after suffering severely. The loss of the Anglo-Spanish force was 370 men and 37 officers, killed and wounded. General De Lacy Evans was slightly wounded. See under *Leagues*. Population, 1887, 29,047; 1900, 37,812; 1910 (est.), 44,000.

SEBASTOPOL or SEVASTOPOL, a town and once a naval arsenal, at S.W. point of the Crimea, formerly the little village of Aktiar. The buildings were commenced in 1784, by Catherine II. after the conquest of the country. The town is built in the shape of an amphitheatre on the rise of a large hill flattened on its summit, according to a plan laid down before 1794, which has been since adhered to. The fortifications and harbour were constructed by an English engineer, colonel Upton, and his sons, since 1830. This place underwent eleven months' siege, by the English and French in 1854 and 1855. Immediately after the battle of the Alma, 20 Sept. 1854, the allied army marched to Sebastopol, and took up its position on the plateau between it and Balaklava, and the grand attack and bombardment commenced 17 Oct. 1854, without success.* After many sanguinary encounters by day and night, and repeated bombard-

* In consequence of the sufferings and disasters of the army in the winter of 1854-5, the Sebastopol Inquiry Committee was appointed, and the Aberdeen administration resigned, Feb. 1855. The committee sat from 1 March to 15 May, lord Aberdeen being the last person examined. Its report was presented 18 June. Mr. Roebuck, the chairman, moved on 17 July that the house should pass a vote of severe reprobation on every member of the Aberdeen administration. On 19 July his motion was lost by a majority of 107 against it. In 1855 the government sent sir John M'Neill and col. Tulloch to inquire into the state of the armies in the Crimea. Their report was presented to parliament in Feb. 1856. A commission was appointed to consider the statements in the report (which were very unfavourable to many officers), but the substance of the report was unshaken.

ments, a grand assault was made on 8 Sept. 1855, upon the Malakhoff tower and the Redans, the most important fortifications to the south of the town. The French succeeded in capturing and retaining the Malakhoff. The attacks of the English on the great Redan and of the French upon the little Redan were successful, but the assailants were compelled to retire after a desperate struggle with great loss of life. The French lost 1646 killed, of whom 5 were generals, 24 superior and 116 inferior officers, 4500 wounded, and 1400 missing. The English lost 385 killed (29 being commissioned and 42 non-commissioned officers), 1886 wounded, and 176 missing. In the night the Russians abandoned the southern and principal part of the town and fortifications, after destroying as much as possible, and crossed to the northern forts. They also sank or burnt the remainder of their fleet. The allies found a very great amount of stores when they entered the place, 9 Sept. The works were utterly destroyed in April, 1856, and the town was restored to the Russians in July; gen. Todleben, the able defender, died 1 July, 1884, and was buried here; his monument uncovered 28 June, 1890. See *Russo-Turkish War*. Population of Sebastopol, 1885, 33,803; 1897, 50,710; 1910 (est.), 65,000. Made a naval port, Sept. 1895; new dock, opened, 18 May, 1898. Monument to adm. Nakhimoff unveiled by the czar, 30 Nov. 1898.

Organised revolt of the naval and military forces and workmen 24 Nov. 1905

SECEDERS; SECESSION CHURCH, see *Berghers*.

SECONDARY EDUCATION, see *Educations*.

SECONDARY OF LONDON, an ancient office, resembling that of under-sheriff in counties. The place was purchaseable till early in the present century, when it was bought up by the corporation.

SECRETARIES OF STATE. The earliest authentic record of a secretary of state is in the reign of Henry III., when John Maunsell is described as "*Secretarius Noster*," 1253. *Rymer*. Towards the close of Henry VIII.'s reign, two secretaries were appointed; and upon the union with Scotland, Anne added a third as secretary for Scotch affairs; this appointment was afterwards laid aside; but in the reign of George III. the number was again increased to three, one for the American department. In 1782 this last was abolished by act of Parliament; and the secretaries were appointed for home, foreign, and colonial affairs. When there were but two secretaries, one held the *portefeuille* of the Northern department, comprising the Low Countries, Germany, Denmark, Sweden, Poland, Russia, &c.; the other, of the Southern department, including France, Switzerland, Italy, Spain, Portugal, and Turkey; the affairs of Ireland belonging to the elder secretary; both secretaries then equally directed the home affairs. *Beatson*. There are now six secretaries—home, foreign, colonial, war, (in 1858) India, and (in 1885) Scotland, all in the cabinet. Secretary of State for Scotland act passed 14 Aug. 1885, amended 1887, explained 1889. See *Administrations*, and separate articles.

The Chartered Institute of Secretaries. This body was founded in 1891, and in 1902 obtained a royal charter when it had a membership of 1,500, its present

membership being 3,505. It consists of secretaries of joint stock companies and other public bodies. The institute has branches in Manchester, Newcastle, Birmingham, Sheffield, and South Africa.

SECRET SOCIETIES, *Assassins, Fenians, Ribbonism, Vehmie Tribunal, Rosicrucians, Illuminati, Carbonari, Mary-Anne, Nihilists.*

SECTS, RELIGIOUS, see under *Worship*, and their respective titles.

SECULAR GAMES (*Ludi Sæculares*), very ancient Roman games, celebrated on important occasions. Horace wrote his "*Carmen Sæculare*" for their celebration in the reign of the emperor Augustus (17). They took place again in the reign of Claudius (47), of Domitian (88), and for the last time, of Philip (248).

SECULARISM, a name given to the principles advocated by G. J. and Austin Holyoake, about 1846, and subsequently by Mr. Bradlaugh (died 30 Jan. 1891). Mr. G. J. Holyoake died 22 Jan. 1906.

Its central idea is free, not lawless thought, and it considers scepticism to be scrutiny. It advocates liberty of action without injury to others. It is not against Christianity, but independent of it. Its standard is utilitarian; it is the religion of the present life only; teaching men to seek morality in nature, and happiness in duty. Messrs. Austin and G. J. Holyoake and other secularists repudiated atheism.

SECURITY FROM VIOLENCE ACT, passed in 1863, appointed whipping as part of the punishment for attempts at garroting.

SEDAN, an ancient fortified city in the valley of the Meuse, N.E. of France, the seat of a principality long held by the dukes of Bouillon. On 6 July, 1641, a victory was gained at La Marfée, near Sedan, by the count of Soissons and the troops of Bouillon and other French princes, over the royal army supporting Richelieu; but the count was slain on 23 June, 1642. The duke was arrested in the midst of his army, and was made to cede Sedan to the crown. The protestant university was abolished after the revocation of the edict of Nantes, 22 Oct. 1685. Around this place a series of desperate conflicts on 29, 30, and 31 Aug. between the French army of the north, under marshal MacMahon (about 150,000 men) and the greater part of the three German armies under the king and crown-prince of Prussia and the crown-prince of Saxony (about 250,000 men) was brought to a close on 1 Sept. 1870.

The emperor Napoleon was present during the battle, and, it is said, stood at Igé, near Sedan, exposed for four hours on 1 Sept. to the German grenades. The impossibility of further resistance was then evident. The Germans had contracted their circle close round Sedan; their formidable artillery held all the heights, from which they could at pleasure wholly destroy the town and the army, and only 2000 men were in a condition to respond to their commander's call, and to make a supreme effort to break through the enemy with the emperor and escape to Montmédy.

At first general de Wimpffen (called to the command when MacMahon was wounded) indignantly rejected the terms offered by the victor, and the emperor had a fruitless interview with count Bismarck to endeavour to mitigate them.

On 2 Sept. the emperor wrote in autograph to the king of Prussia. "*Mon frère, n'ayant pu mourir à la tête de mes troupes, je dépose mon épée au pied de votre majesté. NAPOLEON.*" A capitulation of Sedan and the whole army therein was signed by generals Von Moltke and De Wimpffen at the château of Bellevue, near Frenois, at 11.30 a.m., and at 2 p.m. an interview took place between the king and the emperor.

The conflict was principally carried on by the artillery, in which the Germans had the advantage, not only in number (600 to 500), but also in weight, range, and

precision. The carnage was awful, and the field the next day was a mass of shattered bones, torn flesh, and coloured rags.

About 25,000 French prisoners were taken in the battle, and 83,000 surrendered the next day, together with 70 mitrailleurs, 400 field-pieces, and 150 fortress guns. About 14,000 French wounded were found lying in the neighbourhood, and about 3000 escaped into Belgium and laid down their arms. Among the killed was lieut.-col. Pemberton, a correspondent of the *Times*, who had approached too near the conflict.

The French emperor and his suite arrived at Wilhelmshöhe, a castle near Cassel appointed for his residence (formerly inhabited by his uncle Jerome, when king of Westphalia), in the evening of 5 Sept.

In a letter dated 12 May, 1872, the emperor Napoleon took upon himself the whole responsibility of the surrender of Sedan.

SEDAN CHAIRS (so called from Sedan), were first seen in England in 1581. One used in the reign of James I., by the duke of Buckingham, caused great indignation, and the people exclaimed that he was employing his fellow-creatures to do the service of beasts. Sedan chairs came into London in 1634, when sir Francis Duncomb obtained the sole privilege to use, let, and hire a number of such covered chairs for fourteen years. They came into very general use in 1649.

SEDANGS, a tribe dwelling on the borders of Annam. M. de Mayreana, an ex-officer of the French navy, having made himself their king, came to Paris. He was set aside, and the Sedangs were brought under French protection by the French resident-general in Indo-China; reported Oct. 1889.

SEDGEMOOR (Somersetshire), where the duke of Monmouth (natural son of Charles II. by Lucy Walters), who had risen in rebellion on the accession of James II., was completely defeated by the royal army, 6 July, 1685. The duke was made a prisoner in the disguise of a peasant, at the bottom of a ditch, overcome with hunger and fatigue. He was tried and beheaded on 15 July following.

SEDITION. Sedition acts were passed in the reign of George III. The proclamation against seditious writings was published May, 1792. The celebrated Sedition bill passed Dec. 1795. Seditious societies were suppressed by act, June, 1797. The Seditious Meetings and Assemblies' bill passed 31 March, 1817. In Ireland, during the Roman Catholic and Repeal agitation, acts or proclamations against sedition and seditious meetings were published from time to time until 1848.

SEEDS. An act was passed to prevent the adulteration of seeds (a common practice), 11 Aug. 1869; amended in 1878.

SEGEDIN, or SZEGEDIN, Hungary. Here was concluded a treaty between Ladislaus IV. and Amurath II., 12 July, 1444. It was treacherously annulled at the instigation of cardinal Julian, who with Ladislaus perished in the fatal battle of Varna, 10 Nov. 1444. See *Varna*.

SEICENTO, see under *Italian*.

SEIDLICE (Poland), where a battle was fought 10 April, 1831, between the Poles and Russians. The Poles obtained the victory after a bloody conflict, taking 4000 prisoners and several pieces of cannon; but this success was soon followed by fatal reverses. Massacre, see *Russia*, Sept. 1906.

SEISMOMETER (from *seismos*, Greek for earthquake), an apparatus for measuring the violence of the shocks. One is described by Mr. Robert

Mallet in his work on earthquakes, published in 1858. Further advances described by prof. J. Milne, at the Royal Institution, 12 Feb. 1897. Dr. Ehlert's apparatus adopted as the standard system for international investigations, see *Switzerland*, Jan. 1899. Drs. Vicentini and Vacher improve their micro-seismograph for recording earthquake movements, vertical and horizontal, March, 1899.

A seismological society founded in Japan . . . 1880

An earthquake investigation committee formed in Japan, prof. Kikuchi and Dr. F. Omori, president and secretary, June, 1892; 32 vols. published, valuable information of seismic phenomena, &c., see *Nature* . . . 18 April, 1901

SELA, see *Petra*.

SELBORNE SOCIETY, for the preservation of birds, plants, and pleasant places, originated in the Selborne league (afterwards society) formed by Mr. and Mrs. G. A. Musgrave in Nov. 1885. It has included the plumage league since Jan. 1886 (see under *Birds*).

SELDEN SOCIETY, founded 29 Jan. 1887, for the study of English legal history, and publication of ancient MSS. and books, by lords justice Fry, Coleridge, and Lindley, and other eminent lawyers. John Selden, legal antiquary, born 16 Dec. 1584, died 30 Nov. 1654.

SELECT-MEN, the earliest officers of the townships formed by the first colonists of New England about 1635.

SELENIUM, a grayish-white elementary substance (chemically resembling sulphur), discovered in the stone iolite by Berzelius, in 1817.

The variation in its resistance to the electric current when subjected to light was observed by Mr. Willoughby Smith in 1873, and utilised in the photophone (which see). Dr. C. Wm. Siemens constructed a "selenium eye."

SELEUCIA (Syria), made the capital of the Syrian monarchy by its builder, Seleucus Nicator, 312 B.C. On the fall of the Seleucidæ, it became a republic, 65 B.C. It was taken by Trajan, A.D. 116; several times given up and retaken; subjugated by the Saracens, and united with Ctesiphon, 636.

Opinions vary as to its commencement. To reduce it to our era (supposing it to begin 1 Sept. 312 B.C.), subtract 311 years 4 months.

SENATE (*Senatus*). In the ancient republics the government was divided between the *senatus* (from *senis*, old; in Greek, *gerousia*, from *gerōn*, old), an assembly of elders, and the popular assembly (*comitia*, Latin; *ecclesia*, Greek), the king being merely the executive. The Roman senate, said to have originally been composed of 100 members, was raised to 300 by Tarquinius Priscus; to about 600 by Sylla, about 81 B.C.; and to 900 by Julius Cæsar. It was reformed and reduced to 600 by Augustus; and gradually lost its power and dignity under the emperors. The mere form existed in the reign of Justinian. A second senate, formed at Constantinople by Constantine, retained its office till the 9th century. S.P.Q.R. on the Roman standard stood for "Senatus Populusque Romanus," "the Roman senate and people." A *senatus consultum* was a law enacted by the senate.

The French senate was created by the constitution of the year 8, promulgated 24 Dec. 1799, to watch over the administration of the laws. The number of senators was raised gradually from 60 to 137. The senate was replaced by the chamber of peers in 1814; re-established by Napoleon III. 14 Jan. 1852; and abolished 5 Sept. 1870. Its re-establishment was proposed in 1873. Establishment of a senate of 300 voted; 225 to be elected for 9 years by the departments; 75 (for life) by national assembly, 22 Feb. 1875.

In the 4th Edward III. it was enacted, “that a parliament should be holden every year once.” This continued to be the statute-law till 16th Charles I. 1641, when an act was passed for holding parliaments once in three years at least; repealed in 1664. The Triennial act was re-enacted in 1694. Triennial parliaments thence continued till the 2 Geo. I. 1716, when, in consequence of the allegation that “a popish faction were designing to renew the rebellion in this kingdom, and the report of an invasion from abroad,” it was enacted that “the then parliament should continue for seven years.” This *Septennial act*, entitled “an act for enlarging the continuance of parliaments” (1715 in the statutes, 4to, given as 1 Geo. I. stat. 2, c. 38), was passed 7 May, 1716; see *Parliaments*. Several unsuccessful motions have been made for its repeal; one in May, 1837; again 24 Feb. 1880, and 8 April, 1892 (188-142).

SEPTUAGINT VERSION OF THE BIBLE. Lat. *Septuaginta*, “seventy,” the Alexandrian and oldest Greek version of the Old Testament. So named from the story of its origin in the letter of Aristæas, “purporting to have been written by a Greek of Alexandria at the time when the event occurred. Aristæas states that Ptolemy Philadelphus, king of Egypt (284-247 B.C.), when engaged in making a collection of the laws of all nations for the great Alexandrine library, was advised by his librarian, Demetrius Phalæreus, to have the Jewish Scriptures translated into Greek; how the king sent an embassy to Jerusalem to request the help of the wise men of Israel; how 72 learned Jews, 6 from each tribe, came to Alexandria and were sent to labour in the seclusion of the Island of Pharos; and how in 72 days they dictated to Demetrius a translation of the whole Scriptures,”

which soon became the authorised Bible of the Greek-speaking Jews. Although this story is mythical, it is possible that the Septuagint was translated by Egyptian Jews from the Hebrew by command of Ptolemy, probably for the gratification of his own literary curiosity; modern criticism, however, affirms that the Septuagint version is the work not only of different translators, but of different periods, the Pentateuch being first translated, and subsequently the other books. The Septuagint was in use up to the time of Jesus Christ, when it had almost superseded the original Hebrew text. Most of the citations in the New Testament from the Old Testament are taken from the LXX. The principal MSS. of the Septuagint are the Alexandrine codex, in the British Museum; the Vatican codex, in Rome; and the Sinaitic codex, which is defective, in St. Petersburg.

SEWERS, see *Cloaca Maxima*. An act was passed in 1847 enforcing the conveyance of the sewage of houses in London into the public sewers. The commissioners of sewers in London were superseded by the metropolitan commissioners of sewers, nominated by the government. They abolished the large brick sewers, introducing pipe drains, and turned the contents of 30,000 cesspools into the river Thames. The necessity for purifying the defiled river led to the construction of a new system of drainage, under the superintendence of the Metropolitan Board of Works. The main drainage (the plan of Mr. J. W. Bazalgette) consists of the northern high-level, middle-level, and low-level, and southern high-level and low-level. On 14 March, 1865, the works were said to be completed, except the low-level sewer on the north side, which was waiting for the completion of the Thames embankment, &c. On 4 April, 1865, the prince of Wales started the engines which commenced lifting the waters of the southern outfall, at Crossness Point, near Erith. The main drainage works of the metropolis (82 miles), were finally completed Aug. 1875. The sewage is carried 14 miles down the river. Total cost, 4,500,000*l.*

City Commission of Sewers, after 230 years' existence, absorbed by the corporation of London, by act passed, 1897; final meeting . . . 4 Jan. 1898

 Royal Commission, 5th report, deals with methods of purification of sewerage in towns, issued as a blue book 11 Sept. 1908

The Metropolitan Main Drainage system is (1909) the most complete and costly scheme for the sewerage of a great city ever accomplished. The works consist of two entirely distinct series of intercepting sewers, one for the districts to the north of the river, the other for those in the south, each being carried to outfalls in the Thames at Barking and Crossness respectively. Capital cost has amounted to nearly twelve millions, and the yearly cost of maintenance, management, etc., is something like a quarter of a million pounds.

Sewage treated 1908-9, 103,519,940,158 gallons; daily average 283 616,274 gallons; 24,992 tons of lime and 6,065 tons of Proto-sulphate of iron used; 2,583,000 tons of sludge sent to sea. Total capital outlay on main drainage of London up to 31 March 1909, 11,259,388l. Main drainage committee report March, 1909

SEWING-MACHINE. It is said that Thomas Saint patented one for boots and shoes in 1790. Similar inventions are ascribed to Duncan (1804); Adams and Dodge (American, 1818); Thimonnier (French, 1834); and Walter Hunt (1834). The first really practical sewing-machine was the invention of Elias Howe, an American mechanic, of Cambridge, in Massachusetts, about 1841, who died at Brooklyn, 2 Oct. 1867, aged 47. It is now known under an improved form as Thomas's shuttle machine, by whom it was introduced into England in 1846. Many improvements have been since made and new machines invented.

SHAKERS, an English sect, now chiefly found in America, arose in the time of Charles I., and derived its name from their voluntary convulsion. It existed for a short time only, but was revived by James Wardlaw in 1747, and still more by Ann Lee (or Standless), expelled quakers, about 1757. The sect emigrated to America, May, 1772, and settled near Albany, New York, 1774. They denounce marriage as sinful, regard celibacy as holy, oppose war, disown baptism and the Lord's supper, and use dancing as part of their worship. *Marsden*.

Above a hundred English persons, incorrectly termed shakers, settled in the New Forest, near Lymington, Hampshire, on property obtained for them by a Miss Wood in 1872; not paying the interest of a mortgage they were ejected in severe weather, and suffered much; end of Dec. 1874. They were called Girlingites, from Mrs. Girling, a leader among them, who died 18 Sept. 1886. The community then gradually dispersed.

SHAKSPEARE'S PLAYS. William Shakspeare was born at Stratford-upon-Avon, Warwickshire, (23) April, 1564, and died 23 April, 1616. [An act to incorporate the Trustees and Guardians of Shakspeare's birthplace was passed 26 March, 1891.] The first collected edition of his works is dated 1623 [a facsimile of this edition was published, 1862-5]; the second, 1632; the third, 1664; the fourth, 1685; all in folio.

Shakspeare's first plays were probably produced about 1590, and soon after represented, himself frequently taking a part at the "Theatre," or the "Curtain," near Shoreditch, E. London, and after 1594, at the new "Globe" theatre, Bankside, Southwark, of which Shakspeare himself was part proprietor. It was of a horse-shoe form, partly covered with thatch. After it was licensed, the thatch took fire, through the negligent discharge of a piece of ordnance, and the whole building was consumed, 29 June, 1613. The house was crowded to excess, to witness the play of *Henry VIII.*, but the audience escaped unhurt.

SHAKSPEARE'S JUBILEE, projected by David Garrick, was celebrated at Stratford-upon-Avon, 6-8 Sept. 1769. A similar festival was kept 23 April, 1836. The *tercentenary* of Shakspeare's birth was celebrated, with many festivities, at Stratford-upon-Avon, 23-29 April, 1864.

SHAKSPEARE'S HOUSE. In 1847, a number of persons of distinction interested themselves for the preservation of the house in which Shakspeare was born, then actually put up for sale: they held a meeting at the Thatched-house tavern, London, 26 Aug. in that year, and took measures for promoting a subscription set on foot by the Shakspearian Club at Stratford-upon-Avon; and a committee was appointed to carry out their object. In the end Shakspeare's house was sold at the Auction Mart in the city of London, where it was "knocked down" to the United Committee of London and Stratford for the large sum of 3,000l. 16 Sept. 1847. In 1856, a learned oriental scholar, John Shakspeare (no relation of the poet), gave 2,500l. to purchase the adjoining house, that it might be pulled down, in order to ensure the poet's house from the risk of fire.

The hon. Ignatius Donnelly, an American, reports his discovery of a cryptogram of Francis Bacon in the text of one of the plays in the folio of 1623, and thereon asserts his belief that Bacon was the author of the Shakspeare plays, autumn 1887. His book entitled "The Great Cryptogram: Francis Bacon's cipher in the so-called Shakspeare Plays" was published in 1888. Mr. Donnelly died, 2 Jan. 1901; controversy renewed, see Press, 6 Jan. 1902.

SHERIFF, or *shire-reeve*, governor of a shire or county. London had its sheriffs prior to William I.'s reign; but some say that sheriffs were first nominated for every county in England by William in 1079. According to other historians, Henry Cornhill and Richard Reynere were the first sheriffs of London, 1 Rich. I., 1189. The nomination of sheriffs, according to the present mode, took place in 1461. *Stow*. Anciently sheriffs were hereditary in Scotland, and in some English counties, as Westmoreland. The sheriffs of Dublin (first called bailiffs) were appointed in 1308, and obtained the name of sheriff by an incorporation of Edward VI. 1548. Thirty-five sheriffs were fined, and eleven excused in one year, rather than serve the office for London, 1734; see *Bailiffs*. The high sheriffs of the counties of England and Wales, except Middlesex and Lancaster, are nominated on the morrow of St. Martin, Nov. 12. This somewhat vice-regal office, of Saxon origin, has gradually lost much of its importance.

The sheriffs' act passed 1887

SHILLING. The value of the ancient Saxon coin of this name was fivepence, but it was reduced to fourpence about a century before the conquest. After the conquest the French *solidus* of twelve pence, in use among the Normans, was called *shilling*. The true English shilling was first coined, some say, in small numbers, by Henry VII., 1504. *Ruding*. A peculiar shilling, value nine pence, but to be current at twelve, was struck in Ireland, 1560; and a large but very base coinage in England for the service of Ireland, 1598. Milled shillings were coined 13 Chas. II. 1662; see *Coins*.

SHIMOSE POWDER. An explosive of great power, employed by the Japanese in the Russo-Japanese war, 1904-5.

SHIP-BUILDING, &c., according to the Greek legends, began with the Egyptians, and ancient drawings of their rude vessels are extant. The Greeks, Phœnicians, and Carthaginians were skilful shipbuilders, and Solomon's "navy of ships" (1 *Kings* ix, 26), was doubtless constructed by Tyrians, 992 B.C. The ships of Tarshish (probably in Spain), are mentioned in *Psalms* xlviii. 7, *Isaiah* ii. 16, &c. The Romans built their first fleet of boats, by copying a Carthaginian vessel wrecked on their coast, 260 B.C. The dangers of navigation are described in *Psalms* cvii. 23-30 and *Acts* xxvii. Strong vessels were constructed by the Norsemen for invasion and piracy in the 5th century A.D. *et seq.*, and by the Venetians and other Italians, for commerce and war in the Middle Ages. The first double-decked ship built in England was of 1000 tons burthen, by order of Henry VII., was called the *Great Harry*, and cost 14,000*l.* *Stow*. Port-holes and other improvements were invented by Descharges, a French builder at Brest, in the reign of Louis XII., about 1500. Ship-building was treated as a science by Hoste, 1696. In the second half of the 19th century great progress was made in ship-building. Wood gave place to iron and steel, and only small vessels are now constructed of wood alone.

SHIPKA, see *Schipka*.

SHIP-MONEY was first levied about 1007, to form a navy to oppose the Danes. This impost, levied by Charles I. in 1634-6, was much opposed, and led to the revolution. He assessed London in seven ships, of 4000 tons, and 1560 men; Yorkshire in two ships, of 600 tons or 12,000l.; Bristol in one ship of 100 tons; Lancashire in one ship, of 400 tons. Among others, John Hampden refused to pay the tax; he was tried in the Exchequer in 1636. The judges declared the tax legal, 12 June, 1637. Ship-money was included in the grievances complained of in 1641. The five judges, who had given an opinion in its favour, were imprisoned. Hampden received a wound in a skirmish with prince Rupert, at Chalgrove, 18 June, and died 24 June, 1643.

SHIPPING, BRITISH. Shipping was first registered in the river Thames in 1786; and throughout the empire in 1787. In the middle of the 18th century, the shipping of England was but half-a-million of tons. In 1830, the number of ships in the British empire was 22,785. The merchant shipping act of 1854 was amended in 1867; see *Merchant Shipping Act, Navy, and Navigation Acts. Steam Navigation. Trials*, 1893.

SHIP-RAILWAY, see *Railways*, Oct. 1889.

SHIPWRECKS, see *Wrecks*.

SHIRES, see *Counties*.

SHIRTS are said to have been first generally worn in the west of Europe early in the 8th century. *Du Fresnoy*. Woollen shirts were commonly worn in England until about 1253, when linen, but of a coarse kind (fine coming at this period from abroad), was first manufactured in England by Flemish artisans. *Stow*.

SHODDY, a kind of soft woollen goods, manufactured from old woollen rags, or the refuse, to which new wool is added, is stated to have been first manufactured about 1813, at Batley, near Dewsbury, Yorkshire.

SHOEBLACK SOCIETY Brigades (Blue, Red, and Yellow) were established at various times, especially in 1850, by Mr. John MacGregor, "Bob Roy," in connection with the Ragged School Union.

SHOEBURYNESSE (Essex). Some ground here, purchased in 1842 and 1855, by an act of parliament in 1862 was set apart as "ranges for the use and practice of artillery," and a school for gunnery was established; see *Cannon*, note. Experiments with Mr. Whitworth's projectiles on 12 Nov. 1862, showed their great improvement in form and material. Shells were sent through $5\frac{1}{2}$ inch plate and the wood-work behind it. It was objected, that they might not do this with ships in motion. The National Volunteer Artillery Association began their annual meetings here in July, 1865.

During shell experiments with a new sensitive fuse, col. Francis Lyon (the inventor), col. Fox-Strangways, capt. Francis M. Good-Adams, and four others were killed, 26 Feb. 1885.

SHOES, among the Jews were made of leather, linen, rush, or wood. Moons were worn as ornaments in their shoes by Jewish women. *Isaiah* iii. 18. Pythagoras would have his disciples wear shoes made of the bark of trees; probably that they might not wear what were made of the skins of animals, as they refrained from the use of everything that had life. The Romans wore an ivory crescent on their shoes; and Caligula enriched his with precious stones. In England, about 1462, the people wore the beaks or points of their shoes so long that they encumbered themselves in walking, and were forced to tie them up to their knees; the fine gentlemen fastened theirs with chains of silver or silver gilt, and others with laces. This was prohibited, on the forfeiture of 20s. and on pain of being cursed by the clergy, 7 Edw. IV. 1467; see *Dress*. Shoes, as at present worn, were introduced about 1633. The buckle was not used till 1668. *Stow*; *Mortimer*. The buckle-makers petitioned against the use of shoe-strings in 1791. A strike of London shoe-makers respecting wages, April, 1884; strike at Raunds, 1905. See *Strikes*.

SHOP-TAX enacted in 1785; caused so great a commotion, particularly in London, that it was deemed expedient to repeal it in 1789. The statute whereby *shoplifting* was made a felony, without benefit of clergy, was passed 10 & 11 Will. III. 1699. This statute has been repealed.

SHORE, JANE, the mistress of Edward IV. and afterwards of lord Hastings. She did public penance in 1483, and was afterwards confined in Ludgate; but upon the petition of Thomas Hymore, who agreed to marry her, king Richard III., in 1484, restored her to liberty; and sir Thomas More mentions having seen her. *Harleian MSS*.

Bolts are mentioned in 1413; and in 1418 Henry V. ordered his clerk of the ordnance to get 7000 stone shot made at the quarries at Maidstone. Since then chain, grape, and canister shot have been invented, as well as shells of many kinds; see *Bombs* and *Cannon*. For Palliser's chilled shot, see *Cannon*.

SICILIAN VESPERS, the term given to the massacre of the French (who had conquered Sicily, 1266), commenced at Palermo, 30 March, 1282.

On Easter Monday conspirators assembled at Palermo; and while the French were engaged in festivities, a Sicilian bride passed by with her train. One Drochet, a Frenchman, used her rudely, under pretence of searching for arms. A young Sicilian stabbed him with his own sword; and a tumult ensuing, 200 French were instantly murdered. The populace ran through the city, crying out, "Let the French die!" and, with-

out distinction of rank, age, or sex, slaughtered all of that nation they could find, to the number of about 8000. Even the churches proved no sanctuary, and the massacre became general throughout the island.

It was taken by the Russians, 30 June, 1829, and held some years by them as a pledge for the payment of a large sum by the Porte; but was eventually returned. In 1854 it was again besieged by the Russians, 30,000 strong, under prince Paskiewitch, and many assaults were made. SILK. The culture of the silkworm and the manufacture of silk is attributed to the Chinese. Ptolemy called the northern part of China (afterwards known as *Cathay*) *Seres* ("the people who furnish silk"), from the Chinese name for the silkworm *szu* or *see*, from which is derived the Greek word *ser*, "silkworm." A Chinese work, called the "Silkworm Classic," states that Se-ling-she, the principal queen of the Emperor Hwang-te (2640 B.C.), was the first person to rear silkworms, and that the emperor invented robes and garments of silk. The Chinese themselves assign a still higher antiquity to the culture of the silkworm. Silkworms were introduced into Europe (552) by two Persian monks, who brought them from China to Constantinople; and their culture was encouraged by the Roman emperor Justinian. Wrought silk was brought from Persia to Greece, 325 B.C. Known at Rome in Tiberius's

time, when a law passed in the senate prohibiting the use of plate of massive gold, and also forbidding men to debase themselves by wearing silk, fit only for women. Silk was at first of the same value with gold, weight for weight, and was thought to grow in the same manner as cotton on trees. Silkworms were brought from India to Europe in the 6th century. Charlemagne sent Offa, king of Mercia, a present of two silken vests, 780. The manufacture was encouraged by Roger, king of Sicily, at Palermo, 1146, when the Sicilians not only bred the silkworms, but spun and wove the silk. The manufacture spread into Italy and Spain, and also into the south of France, a little before the reign of Francis I. about 1510; and Henry IV. propagated mulberry-trees and silkworms throughout the kingdom, about 1600. In England, silk mantles were worn by some noblemen's ladies at a ball at Kenilworth castle, 1286. Silk was worn by the English clergy in 1534. Manufactured in England in 1602; and broad silk wove from raw silk in 1620. Brought to perfection by the French refugees in London at Spitalfields, 1688. A silk-throwing mill was made in England, and fixed up at Derby, by sir Thomas Lombe, merchant of London, modelled from the original mill then in the king of Sardinia's dominions, about 1714. He obtained a patent in 1718, and died 3 Jan. 1739. Six new species of silkworm were rearing in France, 1861.* In 1857 Mr. Lister (lord Masham 1891) discovered a useful method of spinning native chassum, or Indian silk-waste; since then many important improvements in dressing and spinning waste silk have been discovered.

The Silk association of Great Britain and Ireland begun, 1886-7; first exhibition St. James's-square, London, S.W. (opened by the duchess of Teck), 6-21 May, 1890; others since. See *Italy*, May, 1890.

SILKWORM DISEASE. In 1853 the annual produce of sericulture in South France was estimated at about 4,680,000*l.* Soon after a disease broke out in the worms, which reduced the value of the silk crop to about one-third that amount. In 1858 a commission was appointed to inquire into the nature of the disease, then termed *pêtrine*; and M. Quatrefages, in 1860, proved that it is hereditary, contagious, and infectious. M. Filippi discovered in the blood of the diseased worms a multitude of cylindrical corpuscles, since named *panhistophyton*, which Pasteur, who took up the study in 1865, demonstrated to be parasitical, and the cause of the disease. He subsequently devised a way by which the organic germs may be got rid of and the disease extirpated.

The manufacture of a fabric from wood pulp, invented by count Hilaire de Chardonnet about 1893, and carried on at Besançon, reported very successful; dress and other fabrics of this material sold in London, summer of 1896.

World's production of raw silk in 1904 amounted to 19,368,000 kilograms (about 42,670,000 *lbs.*); estimated production for 1909-10, 40,100,000 *lbs.*

Import of silk into the United Kingdom. In 1908, 1,110,481 *lbs.* raw; 809,610 *lbs.* thrown and spun; value raw, 667,267*l.*; thrown and spun, 628,563*l.*; manufactured silk imported, 11,621,609*l.*

SILURES, a British tribe, occupying the counties of Monmouth and Hereford, was subdued by the Roman general Ostorius Scapula, 50; see *Shropshire*. From this tribe is derived the geological term "Silurian strata," among the lowest of the palæozoic or primary series, from their occurrence in the above-mentioned counties. *Murchison's "Siluria"* was published 1849.

* In 1858, M. Guérin-Mèneville introduced into France a Chinese worm termed the *Cynthia Bombyx*, which feeds on the *Ailanthus glandulosa*, a hardy tree of the oak kind. The *cynthia* yields a silk-like substance termed *Ailantine*. It was brought to Turin by Fantoni in 1856.

SILVER exists in most parts of the world, and is found mixed with other ores in various mines in Great Britain. The silver mines of South America were at one time the richest in the world, but the mines discovered in the United States of North America in 1858 *et seq.* far exceeded them in richness. Silver was discovered in the State of Nevada in 1858, and subsequently in most of the Pacific States and territories, viz., Colorado, Utah, Montana, and Arizona, the greatest producer being Colorado, next being Nevada. The most celebrated mines in the United States are the Comstock lode, Washoe county, West Nevada (formerly part of the territory of Utah), and the Eureka and Richmond mines, Nevada. The Comstock lode was discovered in 1859, and in 20 years had produced silver and gold valued at 325,000,000 dollars. Then its galleries and shafts were 250 miles in length. Round this lode grew up Virginia City. A mine was discovered in the district of La Paz in 1660, which was so rich that the silver of it was often cut out with a chisel. In 1749, one mass of silver weighing 370 *lbs.* was sent to Spain. From a mine in Norway, a piece of silver was dug, and sent to the Royal Museum at Copenhagen, weighing 560 *lbs.*, and worth 1,680*l.* In England silver plate and vessels were first used by Wilfrid, a Northumbrian bishop, a lofty and ambitious man, 709. *Tyrrell*. Silver knives, spoons, and cups were great luxuries in 1300; see *Mirrors*. The act of 1816 restricted the use of silver as legal tender to 40*s.* Estimated annual production of silver throughout the world, 1477 tons; value, 37,360,000*l.* (1910). Pattinson's process for obtaining silver from lead ore was introduced in 1829. See *Bimetallism*, *Bullion*, *Coins*, *Goldsmiths*, *Mirrors*, *Plate*, *India*, 1876. *United States*, 1878, 1890-5; *Trials*, Nov. Dec. 1895.

SIMNEL CONSPIRACY, see *Rebellions*, 1486.

SIMONIANs, a sect named after the founder, Simon Magus, the first heretic, about 41. A sect of social reformers called **ST. SIMONIAN**s, after their founder, Claude H. comte de St. Simon (born 1760), sprang up in France in 1819, and attracted considerable attention; the doctrines were advocated in England, particularly by Dr. Prati, who lectured upon them in London, 24 Jan. 1834. St. Simon died in 1825, and his follower, Père Enfantin, died 1 Sept. 1864.

SIMONY (trading in church offices) derives its name from Simon desiring to purchase the gift of the Holy Spirit (*Acts* viii. 18, 19). It is forbidden in England by the canon law, and by statute 31 Eliz. c. 6, "for the avoiding of simony and corruption in presentations, collations, and donations of and to benefices," &c., 1588-9; and by statute of 12 Anne 2, stat. 12 (1713). The rev. James John Merest was convicted of simony, 26-29 Nov. 1869, and deprived.

The bishop of Peterborough (Dr. Magee) moved for a committee on the laws relating to simony: appointed 21 April, 1874

SIMPLON, a mountain road, leading from Switzerland into Italy, constructed by Napoleon in 1801-7. It winds up passes, crosses cataracts, and passes by galleries through solid rock, and has eight principal bridges. The number of workmen employed at one time varied from 30,000 to 40,000. The new Simplon tunnel boring operations began 13 Nov. 1898; Herr Brandt, the chief engineer, died, Nov. 1899. The piercing of the tunnel completed 24 Feb. 1905. The new tunnel, which is 21,576 yards, or a little over 12½ miles in length, is the largest in the world. It is almost straight from end to end, from Brigue, in Switzerland, to Iselle, in Italy. The portion finished is one of the two tunnels. The finished tunnel is egg-shaped, about 6 yards high and 4½ broad. The distance apart of the two tunnels is about 50 yards. The frontier line passes almost exactly in the middle of the tunnel. The average height of the mountain above the tunnel is 3,470 ft.; the highest point, situated on the Italo-Swiss frontier, being 7,004 ft. above the level of the tunnel. The original cost of the tunnel was estimated at 2,800,000*l.*, but in view of the enormous difficulties encountered, the price was raised to 3,140,000*l.* The new tunnel shortens the journey between Calais and Milan most materially. The distance by the Mont Cenis Tunnel is 680 miles, and by the St. Gotthard Tunnel 665 miles, whereas by the Simplon Tunnel it is reduced to 585 miles.

The first train for ordinary passenger service passed through the tunnel, 25 Jan.; formal opening by the king of Italy and the president of the Swiss republic 19 May, 1906

Second tunnel to be a foot wider than the first decided upon 26 Aug. 1907

SINKING FUND. First projected by sir Robert Walpole to redeem the debt to the bank of England; act passed in 1716. The act establishing the sinking fund of Mr. Pitt, devised by Dr. Price, was passed in March, 1786. A then estimated surplus of 900,000*l.* in the revenue was augmented by new taxes to make up the sum of 1,000,000*l.* which was to be invariably applied to the reduction of the national debt. The fallacy of the scheme was shown by Dr. Hamilton in 1813. In July, 1828, the sinking fund was limited to one-fourth of the actual surplus of revenue.

A new sinking fund was established by act passed 2 Aug. 1875. The annual charge of the national debt of the year ending 31 March, 1877, to be 27,700,000*l.*; subsequent years to be 28,000,000*l.* This act was temporarily suspended in 1897; again during the S. African war in 1900 and 1901; restored 1902. 3,500,000*l.* was taken from the sinking fund by the budget of 1909-10.

SINOPE, an important Greek colony on the Euxine, after resisting several attacks was conquered by Mithridates IV., king of Pontus, and made his capital. It was the birth-place of Diogenes, the cynic philosopher. On 30 Nov. 1853, a Turkish fleet of seven frigates, three corvettes, and two smaller vessels, was attacked by a Russian fleet of six sail of the line, two sailing vessels, and three steamers, under admiral Nachimoff, and totally destroyed, except one vessel, which conveyed the tidings to Constantinople. Four thousand lives were lost by fire or drowning, and Osman Pacha, the Turkish admiral, died at Sebastopol of his wounds. In consequence of this act (considered treacherous) the Anglo-French fleet entered the Black Sea, 3 Jan. 1854.

SION COLLEGE AND HOSPITAL, situated on the site of a nunnery, which, having fallen to decay, was purchased by William Elaynge, a citizen and mercer, and converted into a college and hospital, called from his name Elaynge Spital. In 1340 he changed it to an Austin priory, which was afterwards granted by Henry VIII. to sir John Williams, master of the jewel-office, who, with sir Roland Hayward, inhabited it till its destruction by fire. In 1623, Dr. Thomas White having bequeathed 3000*l.* towards purchasing and building a college and almshouse on the ancient site, his executors erected the present college. It is held by two charters of incorporation, 6 Chas. I. 1630 and 16 Chas. II. 1664. It contains a valuable library (easily

accessible to the public), and an almshouse for ten men and ten women. New buildings erected on the Thames Embankment; memorial stone laid 21 April, 1885; opened by the prince of Wales (afterwards king Edward VII.), 15 Dec. 1886.

SIRENE, an instrument for determining the velocity of aerial vibrations corresponding to the different pitches of musical sounds, was invented by baron Cagniard de la Tour of Paris in 1819. The principle was shown in an apparatus exhibited by Robert Hooke before the Royal Society, 27 July, 1681.

SIX CLERKS, officers of the court of chancery, who were anciently *clerici* or *clergy*. They were to conform to the laws of celibacy, and forfeit their places if they married; but when the constitution of the court began to alter, a law was made to permit them to marry; statute 24 & 25 Hen. VIII. 1533. The six clerks continued for many years officers of the chancery court, and held their offices in Chancery-lane, London, where proceedings by bill and answer were transacted and filed, and certain patents issued. *Law Dict.* The six clerks were discontinued by 5 & 6 Vict. c. 103, 1841.

They at first supported the catholic league, and attempted to overthrow Henry III. in 1587, but vacillating in their policy, and committing many crimes, their power was annihilated by Mayenne in 1591, and several of them were executed.

SLAVERY. The traffic in men came from Chaldaea into Egypt, Arabia, and all over the East. In Greece, in the time of Homer, all prisoners of war were treated as slaves. The Lacedaemonian youths, trained up in the practice of deceiving and butchering slaves, were from time to time let loose upon them to show their proficiency; and once, for amusement only, murdered, it is said, 3,000 in one night, see *Helots*. Alexander, when he razed Thebes, sold the whole people for slaves, 335 B.C. There were 400,000 slaves in Attica, 317 B.C. In Rome slaves were often chained to the gate of a great man's house, to give admittance to the guests invited to the feast. By one of the laws of the XII. Tables, creditors could seize their insolvent debtors, and keep them in their houses, till by their services

or labour they had discharged the sum they owed. Cæcilius Isidorus left to his heir 4,116 slaves, 12 B.C. The first Janissaries were Christian slaves, 1329.

SLAVERY IN ENGLAND. Laws respecting the sale of slaves were made by Alfred. The English peasantry were commonly sold for slaves in Saxon and Norman times; children were sold in Bristol market like cattle for exportation. Many were sent to Ireland and to Scotland. Under the Normans the vassals (termed villeins, of and pertaining to the *vill*) were devisable as chattels during the feudal times.

Severe statutes were passed in the reign of Richard II., 1377 and 1385; the rebellion of Wat Tyler, 1381, arose partly out of the evils of serfdom.

A statute was enacted by Edward VI. that a runaway, or any one who lived idly for three days, should be brought before two justices of the peace, and marked V with a hot iron on the breast, and adjudged the slave of him who bought him for two years. He was to take the slave and give him bread, water, or small drink, and refuse meat, and cause him to work by beating, chaining, or otherwise; and, if within that space, he absented himself fourteen days, was to be marked on the forehead or cheek, by a hot iron, with an S, and be his master's slave for ever; second desertion was made felony. It was lawful to put a ring of iron round his neck, arm, or leg. A child might be put apprentice, and, on running away, become a slave to his master . . . 1547

Queen Elizabeth ordered her bondsmen in the western counties to be made free at easy rates . . . 1574

Serfdom was finally extinguished in 1660, when tenures in capite, knights' service, &c., were abolished.

A slave named Somerset, brought to England, was, because of his ill state, turned adrift by his master. By the charity of Mr. Granville Sharp he was restored to health, when his master again claimed him. A suit was the consequence, which established, by decision of the Court of King's Bench, in favour of Somerset, that slavery could not exist in Great Britain.

SLAVERY IN UNITED STATES. Before the war of independence all the states contained slaves. In 1783 the statement in the Massachusetts Bill of Rights, "All men are born free and equal," was declared in the supreme court at Boston to bar slave-holding in that state. SLAVE TRADE. The slave trade from Congo and Angola was begun by the Portuguese in 1481. From then the commerce in man brutalised a tract fifteen degrees on each side of the equator, and forty degrees wide, or of 4,000,000 of square miles; and men and women were bred for sale to the Christian nations, and war carried on to make prisoners for the Christian market. The Abbé Raynal computed (1777) that, at the time of his writing, 9,000,000 of slaves had been consumed by the Europeans. The slave-trade is now approaching extinction.

In 1768 the slaves taken from Africa amounted to 104,100. In 1786 the annual number was about 100,000. In 1807 it was shown by documents, produced by government, that since 1792 upwards of 3,500,000 Africans had been torn from their country, and had either perished on the passage or been sold in the West Indies.

The ship *Carl* (owner, Dr. James P. Murray; master, Joseph Armstrong) left Melbourne for South Sea isles; it anchored off Malakolo, Solomon's and Bougainville isles and kidnapped many natives as labourers for the Fiji isles; while about 20 miles from land, the prisoners rose and attempted to set fire to the ship; were fired

SLAVONIA or **SCLAVONIA**, a province of Austria, derives its name from the Slavs, a Sarmatian people who replaced the Avars in Pannonia early in the 9th century. In 864 Cyril and Methodius, Greek missionaries, preached here, and adapted the Greek alphabet to the Slavonian language; the letters of which have since been a little altered. The country, after having been held at times by the Greeks, Turks, and Hungarians, and the cause of sanguinary conflicts, was ceded finally to Hungary in 1699, at the peace of Carlowitz. Deputies from the Slavonian provinces of Austria were entertained at Moscow and St. Petersburg, May, 1867. The Croatian-Slavonian diet, at Agram, was dissolved, May, 1867. It protested against incorporation with Hungary. The Slavonian family of languages includes Russian, Polish, Servian, Bohemian, Bulgarian, Wendic, Slovak, and Polabic. SLEEPING SICKNESS. A new malady noticed among the natives of Uganda by Dr. A. Cook in 1901. It spread rapidly and by April, 1908, it was estimated that 200,000 natives of the protectorate had perished by the disease in the preceding five or six years. Nothing was known of sleeping sickness prior to 1901. The home government took prompt measures to institute enquiries concerning

its nature, and through the instrumentality of the Royal society, Col. Dr. Bruce, of the Army medical corps, went to Uganda to investigate in Feb. 1903. He announced his conviction that the disease was due to the introduction of an animal parasite by the agency of a species of tsetse fly. April, 1904. Dr. Bruce's discovery was abundantly confirmed. The flies were not known to be carriers of the disease before 1901.

SLING. In *Judges* xx. 16, is mentioned the skill of the Benjamite slingers (about 1406 B.C.), and with a sling David slew Goliath 1063 B.C. (1 Sam. xvii.). The natives of the Balearic isles (Majorca, Minorca, and Iviça) were celebrated slingers, and served as mercenaries in the Carthaginian and Roman armies. Slings are said to have been used by the Huguenots at the siege of San- cerre, in 1672, to economise their powder.

SMALLPOX, *variola* (diminutive of *varus*, a pimple), a highly contagious disease, supposed to have been introduced into Europe from the East by the Saracens. Rhazes, an Arabian, described it accurately, about 900. From Europe it was carried

to America, soon after its discovery, and raged there with great severity, destroying the Indians by thousands. In 1694, queen Mary of England died of smallpox, as did in 1711 and 1712 the emperor of Germany, the dauphin and dauphiness of France and their son, in 1730 the emperor of Russia, in 1741 the queen of Sweden, and in 1774 Louis XV. of France. It is stated that in the middle of the 18th century two millions perished by it in Russia. In London in 1723 one out of fourteen deaths was caused by smallpox, and in France in 1754 the rate was one in ten. For the attempts to alleviate this scourge, see *Inoculation*, introduced into England in 1722, and *Vaccination*, announced by Dr. Jenner in 1798. *Smallpox Hospital*, established 1746. Smallpox raged in parts of London, and thousands died, 1870-1; a temporary hospital was established at Hampstead (*which see*). Many parents were fined for opposing the vaccination of their children, 1870-98. SMITHFIELD, WEST, in the heart of London, was once a favourite walk of the London citizens, outside the city walls. Sir W. Wallace was executed here, 23 Aug. 1305. On 15 June, 1381, Wat Tyler was met by Richard II. at this place, and was stabbed by Walworth the mayor. Many tournaments were also held here. In the reign of Mary (1553-8), many persons perished by fire; and Bartholomew Leggatt, an Arian, was burnt here, 18 March, 1612.—Bartholomew fair was held here till 1853.—This place is mentioned as the site of a cattle market as far back as 1150. The space devoted to this purpose was enlarged from about three acres to four and a half, and in 1834 to six and a quarter. The ancient regulations were called the "statutes of Smithfield." In one day there were sometimes assembled 4,000 beasts and 30,000 sheep. The annual amount of the sales was about 7,000,000*l.*

See second paragraph below.

The contracted space of the market, the slaughtering places adjoining, and many other nuisances, gave ground to much dissatisfaction, and after investigation, an act was passed appointing metropolitan market commissioners with powers to provide a new market, slaughtering places, &c.; and to close the market at Smithfield. . . 1 Aug. 1851

It includes the U. S. national museum, the zoological park, and the astrophysical observatory, and publishes and freely distributes scientific memoirs and reports. The library was burnt on 25 Jan. 1865. Professor

Joseph Henry, the first secretary, died, 13 May, 1878; succeeded by Mr. Spencer F. Baird, died, 19 Aug. 1887; succeeded by Professor S. P. Langley. SMOLENSKO (Russia). The French in most sanguinary engagements here were three times repulsed, but ultimately succeeded in entering Smolensko, and found the city, which had been bombarded, burning and partly in ruins, 16, 17 Aug. 1812. Barclay de Tolly, the Russian commander-in-chief, incurred the displeasure of the emperor Alexander because he retreated after the battle, and Kutusoff succeeded to the command.

SMUGGLING. The customs duties, instituted to enable the king to afford protection to trade against pirates, afterwards became a branch of public revenue, and gave rise to much smuggling. The Smugglers' act was passed in 1736, and its severity was mitigated in 1781 and 1784. A revision of these statutes took place 1826 and 1835.

SNEEZING. The custom of saying "God bless you" to the sneezer originated, according to Strada, among the ancients, who, through an opinion of the danger attending it, after sneezing made a short prayer to the gods, as "Jupiter, help me." The custom is mentioned by Homer, the Jewish rabbis, and others, and is found among savages. Polydore Vergil says it took its rise at

the time of the plague, 558, when the infected fell down dead sneezing, though seemingly in good health.

In 1839 there were imported 1,622,493 lbs. of snuff, of which 196,305 lbs. were entered for home consumption; the duty was 88,263*l.*; see *Tobacco*. SOAP is a salt, a compound of a fatty acid with an alkali, soda or potash. The Hebrew *bôrith*, translated soap, is merely a general term for cleansing substances. *Job* ix. 30; *Jer.* ii. 22. Pliny declares soap to be an invention of the Gauls, though he prefers the German to the Gallic soap. Nausicaa and her attendants, Homer tells us, washed clothes by treading upon them with their feet in pits of water. *Odyssey*, book vi. The Romans used fuller's earth. *Savon*, the French word for soap, is ascribed to its having been manufactured at Savona, near Genoa. The manufacture of soap began in London in 1524, before which time it was supplied by Bristol at one penny per pound. The duty upon soap, imposed in 1711, after several reductions from 3*d.* per pound, was totally repealed in 1853. It then produced, according to the chancellor of the exchequer, Mr. Gladstone, about 1,126,000*l.* annually. Exported from the United Kingdom: 1880, 391,808 cwts.; 1890, 96,930 cwts.; 1900, 874,214 cwts.; 1905, 1,230,520 cwts.; 1908, 1,205,920 cwts.

SOBRAN (N.W. India). The British army, 5,000 strong, under sir Hugh (afterwards viscount) Gough, attacked the Sikh force on the Sutlej, 10 Feb. 1846. The enemy was dislodged after a fearful contest, and all their batteries taken; and in attempting the passage of the river by a floating bridge in their rear, the weight of the masses that crowded upon it caused it to break down, and thousands of Sikhs were killed, wounded, or drowned. The British loss was 2,338 men.

SOCIALISM, which proposes the re-organisation of society for the benefit of the community, and advocates the doctrine of the equal right of all to the material conditions of existence, was warmly advocated in London, 24 Jan. 1834, by Robert Owen. He had, beginning at New Lanark, in Scotland, about 1801, established a settlement at New Har-

mony in America in 1824. He died 17 Nov. 1858, aged 90. The French socialists, termed *Communists*, became a powerful political body in that country, were implicated in the revolution of 1848, and made an insurrection at Paris, 1871. See *France*, *Germany*, 1878 *et seq.*, *Positive Philosophy*, and *Working-men*. See *Individualism*. Socialism in England is represented by the Social Democratic federation, the Fabian society, and the Independent Labour party, and in a modified form, by the Christian Social union; in Germany by the Social Democrats; in France by the Workmen's party and the Republican socialists. Socialism is also active in Austria, Italy, Belgium, Denmark.

SOCIETY ISLANDS, Pacific Ocean, discovered by De Quiros in 1606; re-discovered by capt. Wallis, 1767, who gave Otaheite or Tahiti the name of King George's Island. Capt. Cook, who visited them in 1769 and 1777, named them Society Islands in honour of the Royal Society; they now belong to France. An insurrection in Raiatea suppressed, 3 Jan. 1897. by his superiority to all other creatures; 2. That Christ was not a mediator; 3. That hell will endure for a time, after which the soul and body will be destroyed; 4. That it is unlawful for princes to make war. *Hook*. The Socinians established a church at Rakow, in Poland, and made proselytes in Transylvania, 1563. They were expelled from Poland in 1658. The Rakovian catechism was published in 1574; see *Unitarians*.

SOCIOLOGY, a term applied by Comte to the study of mankind in their social relations; it recommends the prevention of national wars by arbitration, and the settlement of the war of classes by boards of conciliation. SODIUM, a remarkable metal, first obtained in 1807 by sir Humphry Davy, from soda (which was formerly confounded with potash, but proved to be a distinct substance by Duhamel in 1736). This metal, like potassium, was obtained by the agency of the electric battery. In consequence of Deville's improved processes, sodium manufactured by Bell Brothers, of Newcastle, at 10s. a pound (1868). It is an important agent in the modern production of aluminium. Common salt (chloride of sodium) is a compound of sodium and chlorine. Mr. H. Y. Castner's (of New York) new process for the enlarged production of sodium, and through sodium of aluminium and magnesium, announced in June, 1887. His works were set up at Oldbury, near Birmingham; he died Oct. 1899. See *Alkalies* and *Aluminium*.

SODOM AND GOMORRAH (Palestine), with their inhabitants, were destroyed by fire from heaven, see *Gen. xix.*

SOISSONS (France), capital of the Gallic Suessiones, was subdued by Julius Cæsar, 57 B.C. It was held by Syagrius, after his father Ægidius, till his defeat by Clovis, A.D. 486. Several councils have been held at Soissons (in 744, 1092, 1122). Its academy was established in 1674. During the Franco-Prussian war, Soissons, after three weeks' investment and four days' bombardment, surrendered to the Germans under the grand-duke of Mecklenburg, 16 Oct. 1870. 99 officers, 4,633 men, 128 guns, &c., were said to be taken.

SOLAR SYSTEM, nearly as now accepted, is said to have been taught by Pythagoras of Samos, about 529 B.C. He placed the sun in the centre, and all the planets moving in elliptical orbits round it—a doctrine superseded by the Ptolemaic system (*which see*). The system of Pythagoras, revived by Copernicus (1543), is called the Copernican system. Its truth was demonstrated by sir Isaac Newton in 1687. See *Planets*.

SOLEBAY or **SOUTHWOLD BAY** (Suffolk), where a fierce naval battle was fought between the fleets of England and France on one side, and the Dutch on the other, the former commanded by the duke of York, afterwards James II., 28 May, 1672. The English lost four ships, and the Dutch three; but the enemy fled, and were pursued to their coasts. The earl of Sandwich was blown up, and thousands were killed and wounded.

SOLFERINO (in Lombardy), the site of the chief struggle on the great battle of 24 June, 1859, between the allied French and Sardinian army commanded by their respective sovereigns, and the Austrians under general Hess; the emperor being present. The Austrians, after their defeat at Magenta, gradually retreated across the Mincio, and took up a position in the celebrated quadrilateral, and were expected there to await the attack. But the advance of Garibaldi on one side, and of prince Napoleon and the Tuscans on the other, induced them to recross the Mincio and take the offensive, on 23 June. The conflict began early on the 24th, and lasted fifteen hours. At first the Austrians had the advantage; but the successful attack of the French on Cavriana and Solferino

changed the fortune of the day, and the Austrians, after desperate encounters, were compelled to retreat. The French attribute the victory to the skill and bravery of their emperor and the generals MacMahon and Niel; the Austrians, to the destruction of their reserve by the rifled cannon of their adversaries. The Sardinians maintained a fearful contest of fifteen hours at San Martino, it is said against double their number. Loss of the Austrians, 630 officers, and 19,311 soldiers; of the allies, 8 generals, 935 officers, and 17,305 soldiers killed and wounded. This battle closed the war; preliminaries of peace being signed at Villa Franca, 12 July. On 24 June, 1870, on the site of the battle, three ossuaries, containing the bones of thousands of the slain, were consecrated in the presence of representatives of Austria, France, and Italy. The Ossuary tower inaugurated, and a colossal statue of king Victor-Emmanuel, unveiled by king Humbert, 15 Oct. 1893.

SOMERSET-HOUSE (London), formerly a
palace, founded on the site of several churches
and other buildings levelled in 1549, by the pro-
tector Somerset, whose residence fell to the crown
after his execution, 22 Jan. 1552. Here resided at
times queen Elizabeth, Anne of Denmark, and
Catherine, queen of Charles II. Old Somerset-
house, a mixture of Grecian and Gothic, was de-
molished in 1775, and the present edifice, from a

design by sir William Chambers, was erected for public offices. The Royal Academy of Arts first assembled in the apartments given to the members by the king, 17 Jan. 1771. The Royal Society met here, 1780-1857; and apartments here were also held by the Society of Antiquaries and the Geological Society; all three now at Burlington House. Large suites of government buildings were erected in 1774. The Navy-office, Pipe-office, Victualling and other offices, were removed herein 1788, and various government departments since. The east wing forming the King's College (see *King's College*) was completed in 1833. By an act passed in 1854, the offices of the duchy of Cornwall were transferred to Pimlico.

SOMERS-TOWN, a populous district in St. Pancras parish, N. London: named after earl Somers, whose family acquired the property about 1695. The building began about 1786; and many French refugees settled in it. Much of the district has been occupied by the railway companies.

SOMNATH GATES, the gates of an ancient Hindoo temple at Guzerat, which was destroyed by Mahmoud of Ghuznee in 1025. The priests wished to preserve the idol; but Mahmoud broke it to pieces and found it filled with diamonds, &c. He carried the gates to Ghuznee. When that city was taken by general Nott, 6 Sept. 1842, lord Ellenborough ordered the gates to be restored after an exile of 800 years, and issued a proclamation much censured at the time. The gates are made of sandal wood, and are described and figured in the *Archæologia* of the Society of Antiquaries, vol. xxx.

SOMOFORM, an anæsthetic composed of chloride, bromide, and iodide of ethyl, possesses the property of producing complete insensibility in 30 to 60 seconds. First used 1902.

SONATA (Italian, sound-piece), the highest form of instrumental music, consisting of three or four movements, intending to express diverse kinds of human feelings.

It was developed from the *suite*, varied dance music (Tartini, 1624, and others). The form fixed by Corelli (1653-1713), was adopted and modified by Scarlatti, the Bachs, Handel, Mozart, Haydn, and culminated in the master-pieces of Beethoven (1770-1827). Fine sonatas have been composed by Dussek, M. Clementi, Weber, Schubert, Mendelssohn, Schumann, Wm. Sterndale Bennett, Chopin, Liszt, and Rubinstein.

SONNET, a poem in fourteen lines, with rhymes adjusted by rules, was invented, it is said, by Guido d'Arezzo, about 1024. The most celebrated sonnets are those by Petrarch (about 1327), Shakespeare (1609), Milton (about 1650), and Wordsworth (1820).

SONNITES, the orthodox Mahometans who now possess the Turkish empire; see *Mahometanism*.

SONTHALS, a tribe of Northern India, brought to Bengal about 1830, where they prospered, till, partly from the instigation of a fanatic, and partly from the exactions of money-lenders, they broke out into rebellion in July, 1855, and committed fearful outrages. They were quite subdued early in 1856, and many were removed to the newly-conquered province of Pegu.

SOPHIA, ST. (in Constantinople). The first church was dedicated to St. Sophia (holy wisdom) by Constantius II., 360; this having been destroyed, the second, the present edifice, was founded by

Justinian, 531, and dedicated 537. Since the Mahometan conquest in 1453, it has been used as an imperial mosque. Its length is 269 feet, and its breadth 243 feet. Six of its pillars are of green jasper, from the temple of Diana, at Ephesus; and of porphyry, from the temple of the Sun, at Rome. Four minarets were added by Selim II., who reigned in 1566. The interior of the dome is beautifully ornamented with mosaic work.

SOPHISTS, teachers of youth in Athens, who were censured by Socrates, and consequently were instrumental in causing his judicial murder, 399 B.C. The controversy against them was carried on by Plato and his disciples.

SORBONNE, a society of ecclesiastics at Paris, founded by Robert de Sorbonne in 1252. The members lived in common, and devoted themselves to study and gratuitous teaching. They soon attained a European reputation as a faculty of theology, their judgment being frequently appealed to, from the 14th to the 17th centuries. The influence of the Sorbonne was declining when the society was broken up in 1789. The buildings are now devoted to education. The new Sorbonne buildings were opened on 5 Aug. 1889; this is the virtual reconstruction of the university of Paris. Gymnastic education introduced, 1892.

SOUND, see *Acoustics*.

SOUND DUTIES. Till the year 1857 no merchant ship was allowed to pass the Sound (a narrow channel separating Zealand from Sweden) without clearing at Elsinore and paying toll. These duties had their origin in an agreement between the king of Denmark and the Hanse towns (1348), by which the former undertook to maintain lighthouses, &c., along the Cattegat, and the latter to pay duty for the same. The first treaty with England in relation to this was in 1450; other countries followed. In 1855 the United States

determined to pay the dues no more; and in the same year the Danish government proposed that these dues should be capitalised; which was eventually agreed to, the sum being 30,476,325 rix-dollars. In Aug. 1857, the British government paid 10,126,855 rix-dollars (1,125,206 £) to the Danes as their proportion.—The passage of the Sound was effected, in defiance of strong fortresses, by sir Hyde Parker and lord Nelson, 31 March, 1801; see *Baltic Expedition*.

SOUNDINGS AT SEA. Captain Ross, of H.M.S. *Edipus*, in 1840, took extraordinary soundings at sea. In the latitude 33° S. and longitude 9° W. about 300 miles from the Cape of Good Hope, 2,266 fathoms were sounded; the weight employed amounted to 450 lbs. On 13 July, 1857, lieut. Joseph Dayman, in the North Atlantic Ocean, lat. 51° 9' N., long. 40° 2' W., in sounding, found a bottom at 2,424 fathoms. 3,875 fathoms was taken by the *Challenger*, capt. Nares, 1873, in the North Atlantic, north of St. Thomas's. See also *Deep Sea Soundings*.

SOUTH AUSTRALIA was visited by capt. Sturt in 1830, and explored shortly after by capt. Parker and Mr. Kent, the former of whom was killed by the natives. The boundaries of the province were fixed by 4 & 5 Will. IV. c. 95 (1834); and it was occupied 26 Dec. 1836, by capt. Hindmarsh, the first governor. It was colonised according to Mr. E. Gibbon Wakefield's scheme, which was carried out by the South Australian Colonisation Association. The colony for several years underwent severe trials through the great influx of emigrants, land-jobbing, building speculations, &c., which produced almost universal bankruptcy in 1839. In five years after, by the energy and liberality of Sir George Grey, the colonists had overcome their difficulties, and the prosperity of the colony appeared fully established. In 1842 the highly productive Burra Burra copper mines were discovered, and large fortunes were suddenly realised; but in 1851 the discovery of gold in New South Wales and Victoria almost paralysed this province by drawing off a large part of the labouring population. Very little gold was found in South Australia; but a reaction took place in favour of the copper mines and agriculture, &c. Before the discovery of gold, little trade existed between Adelaide (the capital of South Australia, pop. 1904, 170,729) and Melbourne; but in 1852 gold was transmitted from the latter to the former to the amount of 2,215,167*l.* principally for breadstuffs, farm produce, &c. SOUTHERN CONFEDERATE STATES, see *Confederates*.

SOUTHERN CONTINENT. The Southern Ocean was first traversed by Magellan in 1520; and explored by Wallis and Carteret in 1766; and by Cook in 1773 and 1774. Of the southern continent little more is known than that it is ice-bound, and contains active volcanoes. It was dis-

covered in the first instance by capt. John Biscoe, on 27 Feb. 1831, in lat. $65^{\circ} 57' S.$, long. $47^{\circ} 20' E.$, extending east and west 200 miles.—This he named Enderby Land, after the gentleman who had equipped him for the voyage. Capt. Biscoe also discovered Graham's Land on 15 Feb. 1832, situated in lat. $67^{\circ} 1' S.$, long. $71^{\circ} 48' W.$ The Messrs. Enderby equipped three other expeditions in search of the southern continent, the last (in connection with some other gentlemen) in 1838, when capt. Balleny had command, who, on 9 Feb. 1839, discovered the Balleny Islands, in lat. $67^{\circ} S.$, long. $165^{\circ} E.$, and in March, 1839, Sabrina Land, in lat. $65^{\circ} 10' S.$, long. $118^{\circ} 30' E.$ In 1840, a French expedition, under the command of admiral D'Urville, and an American expedition, under the command of commodore Wilkes, greatly added to our knowledge in respect to the existence of a southern continent, and this was again increased by the expedition which sailed from England in 1839, under the command of capt. sir James Clark Ross, who discovered Victoria Land in 1841, and subsequently penetrated as far south as $78^{\circ} 11'$. SOUTHPORT, Lancashire, a watering place, founded in 1792 on a sandy waste, has rapidly progressed, now possessing an esplanade 3 miles long, and many fine buildings. It was made a municipal borough in 1867. Population, 1901, 48,083; 1909 (est.), 54,069.

SOUTH-SEA BUBBLE commenced with the establishment of the South-sea company in 1710, which was at first unwisely and afterwards dishonestly managed. It exploded in 1720, ruining thousands of families; and the directors' estates, to the value of 2,014,000*l.*, were seized in 1721 and sold. Mr. Knight, the cashier, absconded with 100,000*l.*; but he compounded the fraud for 10,000*l.*, and returned to England in 1743. Almost all the wealthy persons in the kingdom had become speculators; the artifices of the directors having raised the shares, originally 100*l.*, to the price of 1000*l.* A parliamentary inquiry took place in Nov. 1720, and Aislabie, chancellor of the exchequer, and several members of parliament were expelled the house in 1721; see *Law's Bubble*.

SOUTHWARK (S. London) was governed by its own bailiffs till 1327. The city, however, found great inconvenience from the number of malefactors who escaped thither, in order to be out of the reach and cognizance of the city magistrates; and a grant was made of Southwark to the city of London by the crown, for a small annuity. In Edward VI.'s reign it was formed into a city ward, and was named Bridge Ward Without, 1550.—*Southwark bridge* was designed by John Rennie, and built by a company, 1815-19, at an expense of 800,000*l.* It consists of three great cast-iron arches, resting on massive stone piers and abutments; the distance between the abutments is 708 feet; the centre arch is 240 feet span, the two others 210 feet each; and the total weight of iron 5308 tons. The bridge was freed from toll on 8 Nov. 1864, the company receiving a compensation from the city. An act for the payment of dividends to shareholders was passed in 1872.—*Southwark park* was opened, 19 June, 1869. The Roman Catholic diocese of Southwark formed, 1840. By the Seats act (1885), Southwark sends three members to parliament. Municipal borough, by London Government act, 1899 (10 aldermen, 60 councillors).

the united parishes of St. Margaret and St. Mary Magdalene, and became the parish church as St. Saviour's in 1540. Since then many changes have been made; Mr. G. Gwilt repaired the tower, the lady chapel, and the choir, 1818 *et seq.* The roof of the nave was removed in 1831, and in 1839 replaced by lath and plaster. The prince of Wales laid the memorial stone of a new nave, 24 July, 1890; the church re-opened after restoration at a total cost of 95,000*l.*, the prince of Wales, the archbishop of Canterbury and others present, 16 Feb. 1897; memorial windows to the prince consort and others unveiled, new clock and bells started by the duke of Connaught . . . 22 June, 1898

SPARTA, the capital of Laconia (Greek, *Lacedæmon*), or Lacedæmon, the most considerable republic of the Peloponnesus, and the rival of Athens. Though without walls, it resisted the attacks of its enemies by the valour of its citizens for eight centuries. Lelex is supposed to have been the first king. From Lacedæmon the fourth king, and his wife Sparta, who are also spoken of as the founders of the city, it obtained names. The Lacedæmonians were a nation of soldiers, and cultivated neither the arts, sciences, commerce, nor agriculture. The early history is traditional and the dates conjectural.

SPARTACUS'S INSURRECTION (or Servile War). Spartacus was a noble Thracian, who served in an auxiliary corps of the Roman army. Having deserted and been apprehended, he was reduced to slavery and made a gladiator. With some companions he made his escape, collected a body of slaves and gladiators, 73 B.C.; ravaged southern Italy; and defeated the Roman forces under the consuls sent against him. Knowing the impossibility of successfully resisting the republic, he endeavoured to conduct his forces into Sicily, but was defeated and slain by Crassus, 71 B.C.

"**SPASMODIC SCHOOL**" of poetry, a name sarcastically given to Philip James Bailey ("Festus," 1839), Alex. Smith, Sydney Dobell (died in Aug. 1874), and others (precursors of Morris, Algernon Swinburne, and Rossetti, sarcastically termed the "fleshly school"), ridiculed by professor Aytoun in his "Firmilian," published 1854.

SPEAKERS OF THE HOUSE OF COMMONS.

Peter de Montford, afterwards killed at the battle of Evesham, was the first speaker, 45 Hen. III., 1260; sir Thos. Hungerford is said to have been the first named "Speaker," 1372; but sir Peter de la Mare is supposed to have been the first regular speaker, 50 Edw. III., 1376. The king refused his assent to the choice of sir Edward Seymour, as speaker, 6 March, 1678; and serjeant William Gregory was chosen in his room. Sir John Trevor was expelled the chair and the house for taking a gratuity after the act for the benefit of orphans had passed, 12 March, 1694-5; a deputy speaker was appointed Aug. 1853.

SPEAKER'S COMMENTARY, a name given to an edition of the Bible with a revised text and a commentary by several bishops and other theologians, edited by F. C. Cook. The undertaking originated, it is said, chiefly with Mr. John Evelyn Denison, speaker of the house of commons, with the view of opposing the interpretations of Dr. Colenso, and was announced in Nov. 1863. The publication, begun in 1871, was completed in 1881. The Apocrypha published in 1888.

SPECIAL CONSTABLES are sworn in for the preservation of the public peace when disturbances are feared. The laws relative to their appointment were amended in 1831 and 1835. Louis Napoleon, afterwards emperor, aided as a special constable in London, 10 April, 1848; see *Chartists* and *London*, Dec. 1867. Instructions for their organisation were issued, 13 Jan. 1868. On 28 Jan. 52,974 in the metropolis, and 113,674 in the United Kingdom, had been sworn in. Their services were not required, and they were honourably dismissed by an order issued 31 March, 1868.

Special constables were sworn in in relation to the disturbances in Trafalgar-square (see *Riots*) 17 Nov. et seq.; 1,500 held Trafalgar-square, Sunday, 20 Nov. 1887; served till 18 Jan. 1888, and thanked.

SPECIES. Much controversy among naturalists arose in consequence of the publication, in 1859, of Mr. Charles Darwin's "Origin of Species," in which he suggests that all the various species of animals were not created at one time, but have been gradually developed by what he terms "natural election," and the struggle for life in which the strong overcome the weak.

This preservation of favourable individual differences and variations, and the destruction of those which are injurious, I have called *natural selection*, or the survival of the fittest."—*Darwin*.

The idea was put forth by Lamarck in his "*Philosophie Zoologique*," 1809. Similar views appear in the "Vestiges of Creation," 1844. Mr. Darwin says that he infers "from analogy that probably all the organic beings which have ever lived on the earth have descended from some one primordial form, into which life was first breathed by the Creator." See *Development and Evolution*.

Charles Darwin was born 12 Feb. 1809; and died 19 April, 1882.

SPECIFIC GRAVITIES. See under *Weights*.

SPECTACLES, unknown to the ancients, are generally supposed to have been invented by Alexander de Spina, a monk of Florence, in Italy, about 1285. According to Dr. Plott, they were invented by Roger Bacon, about 1280. Manni attributes them to Salvino, who died 1317. On his tomb at Florence is the inscription, "Qui giace Salvino degli Armati, inventore degli occhiali: Dio gli peroni le peccata" ("Here lies Salvino degli Armati, inventor of spectacles: May God pardon his sins").

SPECTATOR. The first number of this periodical appeared on 1 March, 1711; the last was No. 635, 20 Dec. 1714. The papers by Addison have

one of the letters C L I O at the end. The most of the other papers are by sir Richard Steele, a few by Hughes, Budgell, Eusden, Miss Shephard, and others.—The *Spectator* newspaper (philosophical, whig), begun 5 July, 1828. Mr. Richard Holt Hutton, an able scholar, was editor from 1861 for 40 years; he died 9 Sept. 1897. Present editor, Mr. J. St. Loe Strachey, 1910.

SPECTRUM, the term given to the image of the sun or any other luminous body formed on a wall or screen, by a beam of light received through a small hole or slit, and refracted by a prism. The colours thus produced are red, orange, yellow, green, blue, indigo, and violet. The phenomena were first explained by Newton, whose "Optics" was published in 1704. Several of these colours are considered to be compounds of three primary ones: by Mayer (1775), red, yellow, and blue;—by Dr. Thos. Young (1801), red, green, and violet;—by Prof. Clerk Maxwell (1860), red, green, and blue. As the colour of a flame varies according to the substance producing it or introduced into it, so the spectrum varies. This led to the invention of a method of chemical analysis by professors Bunsen and Kirchhoff (1860), by which they discovered two new metals, and drew conclusions as to the nature of the atmosphere of the sun and stars, and of the light of the nebulae, by comparing the spectrum with that produced by flames into which iron, sodium, and other substances have been introduced. For the invisible rays of the spectrum, see *Calorescence*, *Fluorescence*, *Bolometer*, and *Röntgen Rays*.

Fraunhofer's Lines. In 1802 Dr. Wollaston observed several dark lines in the solar spectrum; in 1815 Joseph Fraunhofer not only observed them, but constructed a map of them, giving 590 lines or dark bands. By the researches of Brewster and others the number observed is now above 2000.

Mr. Fox Talbot observed the orange line of strontium in the spectrum in 1826; and sir David Brewster observed other lines, 1833-42-3. In 1862-3 Mr. William Huggins analysed the light of the fixed stars and of the nebulae; and in 1865 Dr. Bence Jones, by means of spectrum analyses, detected the presence of minute quantities of metals in the living body, introduced only a few minutes previously.

A spectroscopic society in Italy published a journal early in 1872.

SPELLING REFORM. The reform of English orthography on phonetic lines was first advocated by Sir T. Smith (c. 1542); John Hart (*Chester Herald*) (1569); Bishop Wilkins (1666); John Jones, M.D., author "Practical Phonography" (1701); Benjamin Franklin (1768); and Sir Isaac Pitman, Dr. A. J. Ellis, and many later reformers. A resolution in favour of reform was adopted by the London School Board in 1877, and a

SPHERES. The celestial and terrestrial spheres and sun-dials are said to have been invented by Anaximander, 552 B.C.; and the armillary sphere by Eratosthenes, about 225 B.C. The planetarium was constructed by Archimedes before 212 B.C. Pythagoras maintained that the motions of the twelve spheres must produce delightful sounds, inaudible to mortals, which he called the music of the spheres.

SPINNING was ascribed by the ancients to Minerva, the goddess of wisdom. Arcas, king of Arcadia, taught his subjects the art about 1500 B.C. Tradition reports that Luceetia with her maids was found spinning, when her husband Collatinus paid a visit to her from the camp, that the wife of Tarquin was an excellent spinner, and that a garment made by her, worn by Servius Tullius, was preserved in the temple of Fortune. Till 1767, the spinning of cotton was performed by the hand spinning-wheel, when Hargreaves, an ingenious mechanic, near Blackburn, made a spinning jenny, with eight spindles, and also erected the first carding machine, with cylinders. Arkwright's machine for spinning by water was an extension of the principle of Hargreaves; but he also applied a large and small roller to expand the thread, for which he took out a patent in 1769. At first he worked his machinery by horses; but in 1771 he built a mill on the stream of the Derwent, at Cromford. In 1774-9, Crompton invented the mule (*which see*).

SPINTHARISCOPE, a contrivance for showing the scintillations of radium nitrate, exhibited at Royal Society soirée, May 15, 1903.

SPIRES (in Bavaria). The emperors held many diets at Spires since 1309, and it was the seat of the imperial chamber till 1689, when the city was burned by the French, and not rebuilt till after the peace of Ryswick, in 1697. The diet to condemn the reformers was held at Spires, called there by the emperor Charles V. 1529; see *Protestants*.

SPIRIT-LEVEL. The invention is ascribed to J. Melchisedec Thevenot, who died 1692.

SPIRIT-MOTOR. Mr. Yarrow explained to the Institute of Naval Architects his method of employing vaporised spirit instead of steam in the propulsion of steam launches, thus dispensing with the use of a boiler, &c., March, 1888. Petroleum is used as fuel in some railway locomotives, and petrol as the generating power for driving motors.

SPIRITS, see *Distillation*. In all nations spirituous liquors have been considered as a proper subject of heavy taxation for the support of the state; the duty imposed on spirits in 1746 led to much smuggling, *which see*; see *Alcohol*, *Brandy*, *Rum*, *Methylated Spirits*, *Whisky*, &c.

In 1840 England made about ten millions of gallons of spirits, Scotland about seven millions of gallons, and Ireland about nine millions of gallons.

In 1851 the number of gallons on which duty was paid for home consumption was 23,976,596. The total amount paid was 6,017,218*l.* of which 3,758,186*l.* were paid by England, 1,252,297*l.* by Scotland, and 1,006,735*l.* by Ireland.

The total duty on home consumption paid in 1853 was 6,760,422*l.*

In 1858, 9,195,154*l.* were paid as duty on 27,370,934 gallons.

In 1855, *methylated* spirits of wine, for use in the arts and sciences, were made duty free.

In 1859, 27,657,721 gallons of spirits were distilled in the United Kingdom. The uniform duty of 8*s.* per gallon was paid on 24,254,403 gallons for home consumption, producing 9,701,764*l.* In the year 1865-6 the tax produced about 13,955,000*l.*, being the largest sum then ever raised by indirect taxation. In 1871-2, 16,798,344*l.* (customs and excise); 1875-6, 21,295,663*l.*; 1877-8, 20,675,928*l.*; 1883-4, 18,435,957*l.*; 1887-8, 17,312,550*l.*; 1888-9, 17,175,797*l.*; 1889-90, 18,531,277*l.*; 1890-1, 19,263,541*l.*; 1895-6, 20,799,430*l.*; 1900-1, 25,111,790*l.*; 1905-6, 21,659,536*l.*; 1906-7, 21,960,467*l.*; 1907-8, 21,838,817*l.*; 1908-9, 21,417,508*l.*

SPIRITUAL COMBATANTS (*Dukhobortsy*). A Russian communistic religious sect formed by a quaker missionary near the end of the last century, now settled in the Caucasus, about 20,000 members. Its leading tenet, the refusal of all military service, so important in a country like Russia, has led to its repression and severe punishment. The sect also opposes legal tribunals, oaths, &c. Peter Veriguin, their energetic leader, was exiled to Siberia, 1894-5; count Leo Tolstoy gave a description of the sect and its sufferings, *Times*, 23 Oct. 1895. Continued prosecution of the sect, Oct. 1896, 1,129 exiles land at Larnaka, Cyprus, under British protection, 30 Aug. 1898; the climate being unsuitable about 7,000 leave for Manitoba, Canada, 1898-9; count Tolstoy gives 5,000 dols. for their relief, Dec. 1899; deeming it wrong to keep animals in servitude, they turn their horses, cows,

&c., adrift, Aug. 1902; their petition for land to live in under no authority than that of God, refused by the British Columbian Government, 23 Oct. 1902; they leave their homes to christianize the world, about 28 Oct.; great suffering and distress; their march stopped at Minnedosa by mounted police; all sent back by special trains to their homes, 9-12 Nov. 1902.

Large number of fanatical Dukhobors, settled in the Saskatoon district, turned their cattle and horses loose, and began a fresh march to meet the Messiah, reported 27 Sept. 1904. They were turned back by the police.

SPIRITUALISM or SPIRIT-RAPPING.

Spiritual manifestations (so called) began, it is said, in America about 1848, and attracted attention in this country about 1851, in the shape of rapping, table-turning, &c. Many inquisitive or credulous persons visited Mr. Daniel Dunglas Home or Home and Mr. Forster, noted "spiritual mediums." Mr. Home, secretary of the Spiritual Athenaeum, Sloane-street, Chelsea, published, in 1863, "Incidents of my Life," in which he states that the only benefit he derived from the "gift" was the convincing many unbelievers of the certainty of a life to come; see *Trials*, April, May, 1868. The "Spiritual Magazine" began Jan. 1860; the "Spiritualist," 9 Nov. 1869. The London Dialectical society published a report on spiritualism in Nov. 1871. Mr. (afterwards sir) Wm. Crookes, in 1871, investigated the phenomena, and ascribed them to "psychic force" ("Quarterly Journal of Science," July and Oct. 1871). Miss Kate Fox, said to be the earliest American medium (about 1852), was married to Mr. H. D. Jencken, in London, Dec. 1872. London Spiritualist Alliance founded, 1884, incorporated 1896; official organ, *Light*, weekly, 2d, started in 1881. The first president of the Alliance and editor of *Light* was Mr. W. Stainton-Moses; president and editor (1910), Mr. E. Dawson Rogers. In connection with the Alliance is an extensive library of works on psychic science. The Spiritualists' National Union, founded in 1890 as the Spiritualists' National Federation, incorporated 1902. One hundred and fifty societies are represented in this union; official organ, *The Two Worlds*, weekly, 1d. There are one hundred and seventy other societies in the United Kingdom. The Union of London Spiritualists, founded 1898, consists of representatives of twenty societies. The British Spiritualists' Lyceum Union consists of two hundred Lyceums (children's Sunday schools); official organ, *The Lyceum Banner*, monthly, 1d.

SPIITALFIELDS (East London), so named from the priory of St. Mary Spittle, founded by Walter Brune and his wife Rosia, 1197; dissolved 1534. Here the French protestant refugees, after the revocation of the Edict of Nantes, settled and established the silk manufacture in 1685.

SPIITHEAD, a roadstead near the Spit, a sand-bank between Portsmouth and the Isle of Wight. See *Naval Reviews*, under *Navy of England*. Here in 1797 the sailors of the channel fleet mutinied for higher pay.

SPITZBERGEN, an archipelago in the Arctic ocean, discovered in 1553 by sir Hugh Wil-

loughby, who called it Greenland, supposing it to be a part of the western continent. In 1595 it was visited by Barents and Cornelius, two Dutchmen, who pretended to be the original discoverers, and called it Spitzbergen, or sharp mountains, from the many sharp pointed and rocky mountains with which it abounds; see *Phripps*.

SPITZER COLLECTION, formed by Frederick Spitzer, a Jew, consisted chiefly of articles of *virtu* connected with the Middle Ages and Renaissance with some antiques but no paintings. It included metal work, *faience*, and majolica ware, arms and jewellery. He built an hotel at Paris to receive them, and died in 1890, aged about 75. The collection, valued at about 500,000*l.*, was sold for about 400,000*l.*, 17 April-17 June, 1893.

SPONGE, the name applied to a class of animals, *porifera*, intermediate between the *protozoa* and *coelenterata*. Sponges are in general composed of an internal supporting framework of horny fibres interlaced with calcareous or siliceous spires (*spicula*) covered with a soft gelatinous substance, called *sarcode*. Their food consists chiefly of microscopic organisms contained in the water which constantly circulates through the minute pores of the sponge, and finds its outlet by the larger apical openings. Sponges exist in a variety of forms; one is the beautiful Venus's flower-basket. Several species of sponges are used for economic purposes; two species are chiefly brought from the Levant, and one of a coarser kind from the W. Indies and Florida. They are also artificially cultivated in the Adriatic by planting cuttings in waters favourable to their growth. A considerable trade is carried on in sponges, about 600 boats and some 5,000 men being employed in the Levant, and a similar number in the W. Indian trade, to the annual value respectively of 100,000*l.* and 70,000*l.*

SPONTANEOUS GENERATION. The origin of the germs of infusorial animalcules developed during putrefaction, &c., has been warmly debated by naturalists. Spallanzani (about 1766), and especially M. Pasteur and others, assert that these germs are really endowed with organic life existing in the atmosphere. Needham (about 1747), and especially M. Pouchet and his friends in our day, assert that these germs are spontaneously formed out of organic molecules.—Pouchet's "*Hétérogénie*" appeared in 1859. Bastian's "Beginnings of Life," 1872. The researches of professor Tyndall, supporting Pasteur, and opposing Bastian, were published 1876-8. The late professor Huxley, in his presidential address to the British Association at Liverpool, 1870, affirmed that the doctrine of *biogenesis* (that life proceeds only from life) "was victorious all along the line."

"Spontaneous generation" (also termed *generatio æquivoca*, *epigenesis*, and *abiogenesis*) has been still further disproved by the laborious microscopic investigations of Dr. W. H. Dallinger, 1875-8. He found germs to stand a much greater heat than perfect organisms.

Experiments, carried out by Mr. J. Butler Burke in the Cavendish laboratory, Cambridge, on the action of radium chloride and radium bromide upon a gelatin medium commonly used for bacterial cultures, result in the production of microscopic growths, which, in Mr. Burke's opinion, after careful study, were highly organised bodies; to these he applied the name of *radioles* (which see), announced in *Nature*, May, 1905.

M. Raphael Dubois, in a lecture at Lyons university, 4 Nov. 1904, referring to experiments he had made of a similar kind, calls the growths *côbes*. M. Dubois states (1905) that the same results are obtainable by non-radiferous chloride of barium. Experiments with pure barium salts on a gelatin medium by Prof. Rudge, see *Nature*, Oct. and Nov. 1905.

Lotinga's Weekly, 1910. Several London newspapers also contain sporting news.

SPORTS. The first "Book of Sports," under the title of "The King's Majestie's Declaration to his Subjects concerning Lawful Sports to be used" on Sundays after evening prayers, was published by king James I., 24 May, 1618. The second "Book of Sports," with a ratification by his majesty Charles I., is dated 18 Oct. 1633. On the publication of the first "Book of Sports," there arose a long and violent controversy among English divines on certain points; see *Sabbatarians*, *Sunday*, &c. The book was ordered to be burnt by the hangman, and the sports were suppressed by the parliament. The "*Sporting League*" established to maintain British sports in opposition to the Anti-Gambling league, first meeting in London, earl of Coventry in the chair, 19 Dec. 1894.

SPRINGFIELD (Missouri), near which was fought the desperate battle of Wilson's Creek, in which the federals had the advantage over the confederates, but lost their brave general, Nathaniel Lyon, 10 Aug. 1861.

SPURS. Anciently the difference between the knight and esquire was that the knight wore gilt spurs (*equus auratus*), and the esquire silver ones. Two sorts of spurs seem to have been in use at the time of the Conquest, one called a *pryck*, having only a single point, the other a number of points of considerable size. Spurs nearly of the present kind came into use about 1400; see *Plating*.

SPURS, BATTLE OF. Henry VIII. of England, the emperor Maximilian, and the Swiss, in 1513, entered into an offensive alliance against France. Henry VIII. landed at Calais in the month of July, and soon formed an army of 30,000 men. He was joined by the emperor with a good corps of horse and some foot, the emperor as a *mercenary* to the king of England, who allowed him a hundred ducats a day for his table! They invested Terouenne with an army of 50,000 men; and the duc de Longueville, marching to its relief, was signally defeated on the 16th of August, at Guinegatte. This battle was popularly called the battle of *Spurs*, because the French used their *spurs* more than their *swords*. The English king laid siege to Tournay, which submitted in a few days. *Hénault*. See *Courtrai*, for another "battle of spurs."

STABAT MATER, a Latin hymn, by Jacopone, 14th century, sung during Passion week in

Catholic churches. Rossini's music to this hymn (1842) is often performed.

STADE DUES. At a castle near the town of Stade, in Hanover, certain dues on goods were charged by the Hanoverian government. The British government settled these dues in 1844. They were resisted by the Americans in 1855, and were abolished in June, 1861. Great Britain paid 160,000*l.* as her share of the compensation (3,000,000*l.*).

STADTHOLDER, see *Holland*.

STAFFA, a small uninhabited island in the Hebrides, 6 miles distant from Iona, celebrated for its caves and the columnar basalt cliffs. Here is the famous *Fingal's Cave*, the sides of which are formed of basaltic columns, while from the roof, 66 feet in height, hang clusters of short columns, whitened with calcareous stalactite. The cave is 227 ft. in length and 42 ft. wide at the entrance.

STAFF COLLEGE (Sandhurst), for providing an education to qualify military officers for the duties of the staff. The foundation stone was laid by the duke of Cambridge on 14 Dec. 1859.

STAFFORD, Staffordshire, a municipal and parliamentary borough, returning, since 1885, one M.P. A castle was erected here by Ethelfleda, countess of Mercia, 913; taken by the parliamentary forces in 1643, it was demolished; a new castle, not completed, built by sir G. Jerningham, 1810-15. A charter was granted by king John, 1207, and the grammar-school was rebuilt and endowed by Edward VI., 1550. The two old churches of St. Mary and St. Chad are of interest. Isaac Walton was baptised in the former. Principal industries are boot and shoe manufacture and brewing. Population, 1881, 19,977; 1901, 20,894; 1909 (est.), 21,601. Fire at the workhouse infirmary, 7 deaths, 16 May, 1901.

STAGE COACHES, so called from the stages or inns at which the coaches stopped to refresh and change horses. *Bailey*. The stage-coach duty act passed in 1785. These coaches were made subject to salutary provisions for the safety of passengers, in 1810; to mileage duties, 1815. The acts were consolidated in 1832, and amended in 1833 and 1842. See *Mail Coaches*, &c.

STAGYRITE, properly Stagirite, see *Aristotelian*.

STAMFORD BRIDGE (York). In 1066 Tostig, brother of Harold II., rebelled against his brother, and joined the invading army of Harold Hardrada, king of Norway. They defeated the northern earls and took York, but were defeated at Stamford-bridge by Harold, 25 Sept., and were both slain. The loss by this victory no doubt led to his defeat at Hastings, 14 Oct. following. The claim of Mr. William Grey for the *earldom of Stamford*, was granted by the house of Lords, 3 May, 1892.

STAMP-DUTIES. By 22 & 23 Charles II. (1670-1) duties were imposed on certain legal documents. In 1694 a duty was imposed upon paper, vellum, and parchment. The stamp-duty on newspapers was commenced in 1711, and every year added to the list of articles upon which stamp-duty was made payable.

Stamp act, which ordered a stamp to be affixed to all legal documents, in the colonies, and thereby to assist the revenue of Great Britain, was passed 22 March, 1765. It excited great opposition in

N. America, with rioting, and consequently was repealed, 21 Feb. 1766. The resistance of the colonists to taxation, without representation in parliament, led to the American war, 1775-83.

Stamp duties in Ireland commenced 1774

Stamps on notes and bills of exchange in 1782

The stamp-duties produced in England, in 1800, a revenue of 3,126,535*l*.

Many alterations made in 1853 and 1857. In June, 1855, the stamp-duty on newspapers as such was totally abolished; the stamp on them being henceforth for postal purposes.

In July and Aug. 1854, 19,115,000 newspaper stamps were issued; in the same months, 1855, only 6,870,000.

Drafts on bankers to be stamped 1858

Additional stamp duties were enacted in 1860 (on leases, bills of exchange, dock warrants, extracts from registers of births, &c.); in 1861 (on leases, licences to house-agents, &c.).

Stamp-duties reduced in 1864, 1865.

All fees payable in the superior courts of law, after 31 Dec. 1865, are to be collected by stamps, by an act passed in June, 1865. Also in Public Record office 1868

By the Stamp acts, 10 Aug. 1870, newspaper stamps were abolished after 1 Oct. 1870

New stamp duties imposed; came into effect 1 Jan. 1871

rd. receipt and postage stamps used for each other after 1 June. 1881

Stamp-duties imposed on foreign or colonial share certificates, bonds, &c., by Customs act, 1888.

A new consolidating act relating to stamps passed, 21 July, 1891

Certain exemptions made by the Finance act, 31 July, 1894

The changes are noticed in the Finance act passed annually.

STANDARD for gold and silver in England fixed by law, 1300. Standard gold is 22 parts out of 24 of pure gold, the other two parts or carats being silver or copper. The standard of silver is 11 oz. 2 dwts. of fine silver alloyed with 18 dwts. of copper, or 37 parts out of 40 pure silver, and three parts copper. In 1300 these 12 oz. of silver were coined into 20 shillings; in 1412 they were coined into 30 shillings; and in 1527 into 45 shillings. In 1545 Henry VIII. coined 6 oz. of silver and 6 oz. of alloy into 48 shillings; and the next year he coined 4 oz. of silver and 8 oz. of alloy into the same sum. Elizabeth, in 1560, restored the old standard in 60 shillings; and in 1601 in 62 shillings. The average proportions of silver to gold at the royal mint are 15½ to 1. The standard of plate and silver manufactures was affirmed, 6 Geo. I. 1719 *et seq.*; see *Gold, Goldsmiths, Silver, Coinage, and Currency*.

"**STANDARD**," *rd.* conservative newspaper; begun, morning, 1827; evening, 29 June, 1857 (the latter amalgamated with the *St. James's Gazette*, with the title of *The Evening Standard and St. James's Gazette*, 1905).

STANDARD, BATTLE OF THE, see *Northallerton*.

STANDARD MEASURES. In the reign of Edgar a law was made to prevent frauds arising from the diversity of measures, and for the establishment of a legal standard measure to be used in every par of his dominions. The standard

vessels made by order of the king were deposited in the city of Winchester, and hence originated the well-known term of "Winchester measure" of the time of Henry VII. (1487). The bushel so made is still preserved in the museum of that city. Henry I. also, to prevent frauds in the measurement of cloth, ordered a standard yard of the length of his own arm to be made and deposited at Winchester, with the standard measures of king Edgar. The Guildhall contains the standard measures of succeeding sovereigns. *Camden*.—The standard weights and measures were settled by parliament in 1824. The pound troy was to be 5760 grains, and the pound avoirdupois 7000 grains. The "Standard yard of 1760," in the custody of the clerk of the house of commons, was declared to be the Imperial Standard yard and the unit of measures of extension. This standard having disappeared (it was supposed to have been destroyed by the fire in 1834), a new commission was appointed to reconstruct it, and researches for this purpose, in conformity with the act, which directed the comparison of the standard with a pendulum vibrating seconds of time in the latitude of London, were begun by Francis Baily (died in 1844), continued by the rev. R. Sheepshanks till his death in 1855, and completed by G. B. Airy, astronomer royal. In 1855 was passed "an act for legalising and preserving the lost standards of weights and measures." The parliamentary copies of the standard pound and yard are deposited at the Royal Observatory, Greenwich. The standard weights and measures act was passed Aug. 1866. The Standard Commission published reports, 1866 *et seq.*

The old standard yard and other measures and weights, supposed to have been burnt at the fire of the parliamentary houses in 1834, were discovered by Mr. Bull's agents in the Journal Office, where they had been deposited and left unnoticed, July, 1891. The rude standards of the reign of Henry VII. and Elizabeth are still in existence.

STANDARDS, see *Banners, Flags, &c.* The practice in the army of using a cross on standards and shields is due to the asserted miraculous appearance of a cross to Constantine, previously to his battle with Maxentius; Eusebius says that he received this statement from the emperor himself, 312. The standard was named *LABARUM*. For the celebrated French standard, see *Auriflamme*.—**STANDARD OF MAHOMET**, on this ensign no infidel dared look. Christians have been massacred by the Turkish populace for looking on it.—The British **IMPERIAL STANDARD** was first hoisted on the Tower of London, and on Bedford Tower, Dublin, and displayed by the Foot Guards, on the union of the kingdoms, 1 Jan. 1801.

STANFORD COURT, Worcestershire, the ancient mansion of sir Francis Winnington, burnt 5-7 Dec. 1882; valuable portraits, books, MSS. &c., destroyed.

STANHOPE ADMINISTRATION was formed by James (afterwards earl) Stanhope and the earl of Sunderland, 15 April, 1717. Stanhope was premier and chancellor of the exchequer; lord (afterwards earl) Cowper, lord chancellor; earl of Sunderland and Joseph Addison, secretaries of state, &c. In March, 1718, Addison resigned, and the earl of Sunderland became premier.

STANNARY COURTS of Devon and Cornwall for the administration of justice among the tin miners, whose privileges were confirmed by 33 Edw. I. 1305. They were regulated by parliament in 1641, and at many times since. A "Stan-

neries act" was passed in 1869; another act in 1887. The Stannaries court (abolition) act, passed 14 Aug. 1896, came into force 1 Jan. 1897.

STAPLE (literally that which is fixed). The chief English staple commodities which were traded in by privileged merchants, and on which customs were levied, were wool, skins, leather, tin, lead and sometimes cloth, butter, and cheese; certain towns were appointed for the collection of the duties; statutes relating to the staple were passed by Edward III., Richard II., and Henry VI. Edward III.'s "ordinacio stapularum" (ordinance of the staple) was enacted in 1353.

STARCH is a sediment produced at the bottom of vessels wherein wheat has been steeped in water: it is soft and friable, easily broken into powder, and is used to stiffen and clear linen, with blue; its powder is employed to powder the hair. The art of starching linen was brought into England by Mrs. Dinghein, a Flemish woman, 1 May, 1553. *Stow*. Patents for obtaining starch from other substances have been taken out: from potatoes by Samuel Newton and others in 1707; from the horse-chestnut by Wm. Murray in 1796; from rice by Thomas Wickham in 1823; from various matters by Orlando Jones in 1839-40.

STAR-CHAMBER, COURT OF. So called haply from its roof being garnished with stars. *Coke*. This court of justice was called Star-Chamber, not from the stars on its roof (which were obliterated even before the reign of queen Elizabeth), but from the *Starra*, or Jewish covenants, deposited there by order of Richard I. No star was allowed to be valid except found in those repositories, and here they remained till the banishment of the Jews by Edward I. The court was instituted or revived, 3 Hen. VII. 1487, for trials by a committee of the privy council, which was in violation of Magna Charta; as it dealt with civil and criminal causes unfettered by the rules of law. In Charles I.'s reign it exercised its power upon several bold innovators, who gloried in their sufferings, and contributed to render government odious and contemptible. It was abolished in 1640. There were in this court from 26 to 42 judges, the lord chancellor having the casting voice. The judicial committee of the privy council is the Star-chamber revived under another name.

STAR OF INDIA, an order of knighthood for India, instituted by letters patent 23 Feb., gazetted 25 June, 1861, enlarged in 1866 and 1903. It comprised the sovereign, the grand master, 25 knights (Europeans and natives), and extra or honorary knights. The prince of Wales (now king) held a grand chapter at Calcutta, 1 Jan. 1876.

STARS, THE FIXED. They were classed into constellations (*which see*), it is supposed, about 1200 B.C. Hicetas, of Syracuse, taught that the sun and the stars were motionless, and that the earth moved round them, about 344 B.C. (this is mentioned by Cicero, and perhaps gave the first hint of this system to Copernicus). Job, Hesiod, and Homer mention several of the constellations. The Royal Library at Paris contains a Chinese chart of the heavens, made about 600 B.C., in which 1460 stars are correctly inserted. The aberration of the stars was discovered by Dr. Bradley, 1727; see *Astronomy*, and *Solar System*. Maps of the stars were published by the Society for the Diffusion of Useful Knowledge in 1839, and a set of Celestial Maps, issued under the superintendence of the Royal Prussian Academy, was completed in 1859. See *Photometer*.

Tycho Brahe discovered a new star in Cassiopeia in 1572.

Temporary stars were observed in 1876 and 1885.

A list of about 200 stars, which vary in their brightness and sometimes disappear, has been published by Mr. G. F. Chambers in his "Handbook on Astronomy," 1889-90. A variable star, named α Ceti, or Mira Ceti, observed by David Fabricius in Aug. 1596, disappeared in Oct. following. It was observed again in 1603 and 1638, and since.

Bessel discovered the annual parallax of star ϵ Cygni (hence he calculated its distance from the earth to be about 60 billions of miles) 12 Feb. 1838

Struve made it 40 billions (supported by Brünnow and R. S. Ball) 1853

The calculations of T. Henderson (at the Cape) 1832 supported by D. Gill and others showed that probably α Centauri, is the star nearest to the earth 1883-4

A new star in Auriga in the Milky Way was discovered at Edinburgh, by Dr. Anderson, 1 Feb. 1892. It had been photographed by prof. Pickering, 1, 10, 20 Dec. 1891. It has been named Nova Aurigæ. Its brilliancy diminished, May; revived Aug. 1892

Dr. (after sir) Wm. Huggins reported his spectroscopic observations on the star to the Royal Institution 3 May, "

A new star in Centaurus discovered by Mrs. Fleming 12 Dec. 1895

Four variable stars discovered by Mr. R. T. Innes at the Cape Observatory, reported, 26 Aug. 1897.

A new one in Andromeda discovered by Mr. T. Anderson, reported 26 Jan. 1899. Another in Sagittarius, by Mrs. Fleming, from the Draper memorial photos, 1897 or early 1898 (5 by her since 1885), May, 1899.

A new variable of *Algol* type discovered by photography by M. Ceraski in *Cygnus*, May-June, 1899. Two new variables, one in *Hercules* and the other in *Cygnus*, 24 and 28 Aug. 1899, discovered by Dr. T. D. Anderson, Edinburgh.

A new star, *Nova Persei*, of the first magnitude, discovered by Mr. Anderson, Edinburgh, in Perseus, and by M. Borissiak, at Kieff, 21 Feb. 1901. Much studied and photographed. Gradual decrease of magnitude; in June, 1902, and since its spectrum showed the characteristics of planetary nebulae; on Dec. 1 its magnitude had diminished to 9.5.

Variable star in the region of the Milky Way discovered by Mr. T. H. Ashbury 1905

STATE MEDICINE, see under *Sanitation*, 2 May, 1888.

STATE PAPER OFFICE was founded in 1578, now merged into the Public Record Office. In 1856 the British government began the publication of Calendars of State Papers, invaluable to future historians; brought down to William and Mary, 1898.

STATES-GENERAL OF FRANCE. An ancient assembly of France, first met, it is said, in 1302 to consider the exactions of the pope. Previous to the Revolution, it had not met since 1614. The states consisted of three orders, the clergy, nobility, and commons. They were convened by Louis XVI., and assembled at Versailles, 5 May, 1789 (308 ecclesiastics, 285 nobles, and 621 deputies or *tiers état*, third estate). A contest arose whether the three orders should make three distinct houses, or but one assembly. The commons insisted upon the latter, and assuming the title of the National Assembly, declared that they were competent to proceed to business, without the concurrence of the two other orders, if they refused to join them. The nobility and clergy found it expedient to concede the point, and they all met in one hall; see *National Assembly*. Centenary, see *France*, 5 May, 1889.

STATESMAN'S YEAR-BOOK, statistical and historical annual of the states of the world, first published in 1864, edited by Frederick Martin.

STATIONERS. Books and papers were formerly sold only at stalls; hence the dealers were called stationers. The company of stationers of London is of great antiquity, and existed long before printing was invented, yet it was not incorporated until 3 Philip & Mary, 1557. Their old dwelling was in Paternoster-row; 500th anniversary celebrated 10 June, 1903.

STATISTICS, the science of the state, political knowledge, is said to have been founded by sir Wm. Petty (1623—1687), in his "Political Arithmetic," published 1691. The term is said to have been invented by professor Achenwall of Göttingen in 1749. The first statistical society in England was formed at Manchester in 1833; the Royal Statistical Society of London, which publishes a quarterly journal, was established 15 March, 1834, for the purpose of procuring, arranging, and publishing "facts calculated to illustrate the condition and prospects of society." Jubilee kept, 22, 23, 24 June, 1885; incorporated, 1887. The gold medal presented to Mr. Robert Giffen (K.C.B. 1895), the able government statistician, 20 Nov. 1894; resigns office 30 Sept. 1897. Similar societies have been established on the continent. International Statistical Institute constituted in 1885, met at Rome, 12-16 April, 1887. International Statistical Congresses are now held occasionally. One in London, under the presidency of the prince of Wales, 31 July, 1905. The eminent statistician, Dr. Wm. Farr, died 14 April, 1883. *Statistical Abstracts* have been published annually by the government for many years, giving much information respecting the revenue, expenditure, commerce, etc., of the empire.

STATUES, see *Sculpture*, &c. Two statues of *Ramesses II.* and one of his queen (about 1322 B.C.), 10 feet high, discovered at Aboukir by Daninos Pasha, Oct. 1891. *Phidias*, whose statue of *Jupiter* passed for one of the wonders of the world, was the greatest statuary among the ancients, 440 B.C. He had previously made a statue of *Minerva* at the request of *Pericles*, which was placed in the *Parthenon*. It was made of ivory and gold, and measured 39 feet in height. *Lysippus* invented the art of taking likenesses in plaster moulds, from which he afterwards cast models in wax, 326 B.C. *Michael Angelo* was the greatest artist among the moderns. The first equestrian statue erected in Great Britain was that of *Charles I.* in 1678.* By 17 & 18 Vict. c. 10 (10 July, 1854), public statues were placed under the control and protection of the Board of Works. The following are the chief public statues in London:—

* This statue is of brass, cast by Le Sueur, in 1633, at the expense of the Howard-Arundel family. During the civil war, the parliament sold it to John River, a brazier, in Holborn, with strict orders to break it to pieces; but he concealed it underground till the Restoration, when it was erected, in 1678, on a pedestal executed by Grinling Gibbons. The first equestrian statue of bronze, founded at one cast, was that of *Louis XIV.* of France, 1699; it was elevated about 1724.

Statute Law Revision and Civil Procedure act, 44 & 45 Vict. c. 59, passed 27 Aug. 1881. "Statutes: Revised Edition: (1325-1878)," in 18 volumes, published 1870-85. The number of volumes since greatly reduced. Select commons' committee on the subject, met 17 July, 1891.

STATUTORY DECLARATIONS. By 5 & 6 Will. IV. c. 62 (1835), persons objecting to oaths are permitted to make declarations before magistrates, judges, &c.; commencing: "I —, do solemnly and sincerely declare that."

Mr. Alexander Chaffers having made a declaration against the character of Lady Twiss, wife of sir Travers Twiss, was prosecuted for libel. She withdrew during the examination, and the prosecution ceased: but Chaffers was severely censured by the magistrate, and by the attorney-general in parliament March, 1872

STEAM CARRIAGE (for ordinary roads), invented by the earl of Caithness, was said to be successful in 1860. It travelled over rough roads at the rate of 8 miles an hour, at a cost of less than 1d. per mile. His lordship made a journey of 140 miles in two days; see *Road Steamers and Carriages*.

STEAM ENGINE AND NAVIGATION. Hero of Alexandria, in his "Pneumatics," describes various methods of employing steam as a power; and to him is ascribed the *Æolopile*, which, although a toy, possesses the properties of the steam-engine: he flourished about 284-241 B.C. Roger Bacon appears to have foreseen the application of steam-power; see *Railways, Locomotives, Road Steamers, Carriages, &c.*

GREAT EASTERN, for a short time

(1857-8) called *Leviathan* 692 ft. 83 ft.

Horse Power:—Paddles, 1000; screw, 1600; weight of ship, 12,000 tons; ordinary light draught, 12,000 tons; said to have cost 732,000l.

She was designed by Mr. I. K. Brunel (who died 15 Sept. 1859), and built by Messrs. Scott Russell and Co., at Millwall; launching lasted from 3 Nov. 1857, to 31 Jan. 1858.

The capital subscribed having been all expended, a new company was formed to fit her for sea.

On 7 Sept. 1859, she left her moorings at Deptford for Portland-roads. On the voyage an explosion took place (off Hastings), through some neglect in regard to the casing of one of the funnels, when ten firemen were killed and many persons seriously injured. After repairs she sailed to Holyhead, arriving there 10 Oct.; she endured the storm of 25-26 Oct. well; and proceeded to Southampton for the winter, 4 Nov.

In 1862 she performed several voyages to and from New York; but in Aug. ran on a rock near Long Island and injured her bottom.

She was repaired and arrived at Liverpool 17 Jan. 1863, and sailed to New York (16-27 May).

She was bought by Glass, Elliot, and Co. in March or April, 1864, and was chartered to convey the Atlantic telegraph cable; sailed from Sheerness 15 July; and returned 19 Aug. 1865; see under *Electric Telegraph*.

She sailed for New York, prepared for 2000 passengers, 26 March, and returned with 191. She was seized by the seamen, claiming their wages, May, 1867; and the case was carried into Chancery in July. At the meeting of the shareholders 10 Feb. 1868, no dividend was declared. She conveyed the French Atlantic telegraph cable, successfully laid Oct. 1869.

Arrived at Bombay with Bombay and Suez cable, 27 Feb.; returned to Sheerness June, 1870

Sailed with the fourth Atlantic telegraph cable 8 June; which was completely laid 3 July, 1873

Sailed with the fifth Atlantic telegraph cable: laid Aug., Sept. 1874

Put up for sale at 30,000l.; not bought 19 Oct. 1881

Sold to Mr. Craik for 21,000l. 20 Oct. 1887

In the Clyde, sold to metal brokers, for 16,500l., Dec. „

The vessel moved to the Mersey, where she is beached 25 Aug. 1888

Total receipts of the sale at Liverpool 58,000l. 24 Nov. „

STEAM GUN; suggested by Wm. Murdoch, 1803. One patented by Messrs. Perkins, in 1824, was ineffectual.

STEAM HAMMER, invented by Mr. James Nasmyth in 1838, and patented by him 18 June, 1842. Its main feature is the absolutely direct manner by which the elastic power of steam is employed to lift up and let fall the mass of iron constituting the hammer, which is attached direct to the end of a piston-rod passing through the bottom of an inverted steam cylinder placed immediately over the anvil.

In 1842, Mr. Nasmyth applied his steam-hammer to driving piles, which has importantly assisted in the execution of great public works. Owing to its vast range of power, forged iron-work can now by its means be executed on a scale, and for a variety of purposes, with an ease and perfection not previously possible.

Parts of gigantic marine steam-engines, anchors, and Armstrong guns, as well as the most minute details of machinery, as in Enfield rifles, are executed by the steam-hammer.

Mr. Nasmyth, aged 81, died 7 May, 1890.

A steam-hammer, said to be the then largest in the world, completed at Woolwich: the falling portion weighs 40 tons, and when used with top steam (51 tons) has the force of 91 tons, April, 1874. One at Schneider's works, Creuzot, France; weight between 75 and 80 tons, Dec. 1877.

STEAM-MAN. A figure constructed to drag a phaeton received this name in New York in March, 1868.

STEAM NAVIGATION, see under *Steam*.

STEAM-PLOUGHS were patented by G. Callaway and R. A. Purkes, 1849; H. Cowing, 1850; and others. John Fowler's of 1854 is much approved.

STEAM-RAM (to be used in naval warfare), was invented by Mr. James Nasmyth in 1836, and communicated to the Admiralty in 1845. Steam-rams built by Mr. James Laird of Birkenhead for the Confederates in N. America, were stopped and eventually bought by the British government, 1864.

STEARINE (from *stear*, suet), that part of oils and fats which is solid at common temperature. The nature of these substances was first made known by Chevreul, in 1823, who showed that they were compounds of peculiar acids, with a base termed *glycerine*; of these compounds the chief are stearine, margarine, and elaine; see *Candles*.

STEEL, metal, a compound of iron and carbon, exists in nature, and has been fabricated from the earliest times. It was certainly used by the Egyptians, Assyrians, and Greeks. It has largely replaced cast iron in ship building, &c.

Reamur discovered the direct process of making steel by immersing malleable iron in a bath of cast iron. 1722

A manufactory for cast steel is said to have been set up by Benjamin Huntsman at Handsworth, near Sheffield. 1740

The manufacture of shear steel began in Sheffield, about 1800

German steel was made at Newcastle previously by Mr. Crawley.

The inventions of Mushat (1800), Lucas (1804), and Heath (1839), were important steps in this manufacture; see *Engraving*.

Reipe patented his "puddled steel" 1850

Mr. (aft. sir) H. Bessemer made steel by passing cold air through liquid iron, 1856. By this method 20 tons of crude iron have been converted into cast steel in 23 minutes.*

Tungsten steel was made in Germany, 1859; and M. Fremy made steel by bringing red-hot iron in contact with carbonate of ammonia 1861

M. Alfred Krupp exhibited an ingot of steel weighing 4500 lbs. in 1851, and one weighing 20 tons in 1862

The subject much investigated by M. Caron, 1861-5; much attention was excited by cutlery made from a metallic sand, brought from Tarunaki or New Plymouth, in New Zealand 1860

STEEL PENS. "Iron pens" are mentioned by Chamberlayne in 1685. Steel pens, made long before, began to come into use about 1820, when the first gross of three-slit pens was sold wholesale for 7d. 4s. In 1830 the price was 8s., and in 1832, 6s. A better pen is now sold for 6d. a gross.

STEEL-YARD. An ancient instrument, the same that is translated *balance* in the Pentateuch. The *Statera Romana*, or Roman steel-yard, is mentioned in 315 B.C.—THE STEEL-YARD or STILL-YARD COMPANY, London merchants, who had the steel-yard in Thames-street assigned to them by Henry III., about 1232, were Flemings and Germans, and the only exporters, for many years after, of the staple commodities of England. *Anderson*. The company lost its privileges, finally, in 1578; and the merchants were expelled from England in 1597.

The Russians quitted San Stefano, 22 Sept. 1878.

It established independence of Montenegro, Servia, and Roumania; constituted Bulgaria a tributary principality; required a heavy indemnity from Turkey for Russia, who was to gain a port on the Black Sea and Kars; to exchange the Dobruzscha for Bessarabia; to obtain rights for Christians; to open the Bosphorus and Dardanelles in peace and war; &c.

STENOCHROMY, see *Printing in Colours*.

STENOGRAPHY (from *stenos*, narrow), the art of short-hand, practised by the ancients. Its improvement is attributed to Tyro, Cicero's freedman, and still more to Seneca. The Egyptian Exploration Fund in 1904 exhibited a papyrus dated A.D. 155, found at Oxyrynchus, relating to shorthand teaching. Dr. Timothy Bright's "Characterie, or the Arte of Shorte, Swifte, and Secrete Writing," published in 1583, is the first English work on short-hand. Peter Bales, the famous

penman, published on stenography in 1590; and John Willis published his "*Stenographie*" in 1602. Since then many systems and modifications have been produced. See *Phonography*.

Edmund Willis's system, 1618; Thomas Shelton's system, 1620 (used by Samuel Pepys); Wm. Catwright's, 1642-69 (known as Rich's); Wm. Mason's, 1672, improved by Thos. Gurney (1720) (known as Gurney's, officially used in parliament since 1813); John Byrom's, published after his death, 1767; Wm. Mavor's, 1780; Sam Taylor's (on which are based "Odell's and Harding's"), 1786; Rev. Richard Roe's, 1820, first Script system; James H. STEPHEN'S CHAPEL, ST. (Westminster), built by king Stephen, about 1135. It was rebuilt by Edward III. in 1347, and by him made a collegiate church, to which a dean and twelve secular priests were appointed. Soon after its surrender to Edward VI., about 1548, it was applied to the use of Parliament; see *Parliament*. It was destroyed by fire, 16 Oct. 1834. The Society of Antiquaries published memorials of it about 1810; and Mr. Mackenzie's work appeared in 1844. The restoration of the beautiful crypt was completed in Jan. 1870.

STEPNEY, a parish, E. London, the Stebenhide of Domesday book. Edward I. summoned a parliament here, 1299. Stepney suffered severely by the plague, 1625 and 1665. Stepney-green was restored and opened as a park by the Metropolitan Board of Works, Aug. 1872. Stepney church, built 1470, restored 1899, much damaged by fire, 12 Oct. 1901; re-opened 21 June, 1902. STEREOCHEMISTRY, the chemistry of atoms, carbon, &c., in space, connected with the researches of M. Pasteur and his colleagues, Van't Hoff and Le Bel; was so named about 1890 by Victor Meyer. Prof. J. Wislicenus, one of its earliest exponents, died in 1902.

STEREOCHROMY, a mode of painting in which water-glass (an alkaline solution of flint, silic) serves as the connecting medium between the colour and the substratum. Its invention is ascribed

to Von Fuchs, who died at Munich on 5 March, 1856. Fine specimens of this art by Kaulbach and Echter exist in the Museum at Berlin, and also at Munich.

STEREOMETER, by which is compassed the art of taking the contents of vessels of liquids by gauging, invented about 1350. *Anderson*. M. Say's stereometer, for determining the specific gravity of liquids, porous bodies and powders as well as solids, was described in 1797.

STEREOSCOPE (from *stereos*, solid, and *skopein*, to see), an optical instrument for representing in apparent relief natural objects, &c., by uniting into one image two plane representations of these objects as seen by each eye separately. The first stereoscope by reflection was constructed and exhibited by professor Charles Wheatstone in 1838, who had announced its principle in 1833. Since 1854 stereoscopes have been greatly improved. By Mr. John Anderton's lantern stereoscope, remarkable effects were exhibited on a screen in the Royal Society's lecture room, 7 June, 1893. Mr. T. E. Heath the first to apply the stereoscope to sideral astronomy. His instrument exhibited to Royal Society, 1905.

STEREOTYPE, a cast from a page of movable printing-types, so named by the Parisian printer, Didot, 1798. It is said that stereotyping was known in 1711. It was practised by Wm. Ged of Edinburgh, about 1730. Some of Ged's plates are at the Royal Institution, London. A Mr. James attempted to introduce Ged's process in London, but failed, about 1735.* *Nichols*. Stereotype printing was in use in Holland, in the last century; and a quarto Bible and a Dutch folio Bible were printed there. *Phillips*. It was revived in London by Wilson in 1804. Since 1850 the durability of stereotypes has been greatly increased by electrotyping them with copper or silver. Stereotyping used for printing the *Times*, 1856, *et seq.* It soon came into general use for newspaper printing.

In the library of the Royal Institution is an edition of Sallust, with this imprint: "Edinburgi, Gulielmus Ged, auri faber Edinensis, non typis mobilibus, ut vulgo fieri solet, sed tabellis seu laminis fuis, excudebat. 1744." (Printed at Edinburgh by William Ged of Edinburgh, goldsmith, not with moveable types, as is commonly done, but with cast tablets or plates.)

STERLING (money). Ducange says (1733), "Esterlingus, sterlingus, are English words relating to money, and hence familiar to other nations, and applied to the weight, quality, and kind of money." "Denarius Angliæ, qui vocatur sterlingus," stat. Edw. I. (The penny of England, which is called sterling.) Camden derives the word from *easterling* or *esterling*, observing that the money brought from Germany, in the reign of Richard I., was the most esteemed on account of its purity, being called in old deeds "*nummi easterling*." Others derive the word from the Easterlings, the first moneyers in England.

STETHOSCOPE. In 1816 Laënnec, of Paris, by rolling a quire of paper into a kind of cylinder, and applying one end to the patient's chest and the other to his own ear, perceived the action of the heart in a much more distinct manner than by the immediate application of the ear. This led to his inventing the stethoscope, or "breast-explorer," the principle of which, now termed "auscultation," was known by Hippocrates (357 B.C.), and by Robert Hooke, 1681. See *Water*, 1895.

* It was hotly opposed by the journeymen printers.

STETTIN (Pomerania), an ancient city, formerly held by the Sidini and Venedes, was taken by Boleslas of Poland in 1121. After being conquered by the Swedes, Russians, and French, it was awarded to Prussia in 1814. Pop., 1905, 224,119. A new harbour opened by the emperor, 23 Sept. 1898.

STEWARD OF ENGLAND, LORD HIGH. The first grand officer of the crown. This office was established prior to the reign of Edward the Confessor, and was formerly annexed to the lordship of Hinckley, Leicestershire, belonging to the family of Montfort, earls of Leicester, who were, in right thereof, lord high stewards of England; but Simon de Montfort, the last earl of this family, having raised a rebellion against his sovereign, Henry III., was attainted, and his estate forfeited to the king, who abolished the office, 1265. It is now revived only *pro hac vice*, at a coronation, or the trial of a peer. The first afterwards appointed was Thomas, second son of Henry IV. The first for the trial of a peer was Edward, earl of Devon, on the arraignment of the earl of Huntingdon, in 1400. The last was lord Denman at the trial of the earl of Cadigan, 16 Feb. 1841. The duke of Hamilton was lord high steward at the coronations of William IV. 1831, and Victoria, 1838. The duke of Marlborough was lord high steward at the coronation of king Edward VII. on Aug. 9, 1902.

STEWARD OF THE HOUSEHOLD, LORD (an ancient office), has the sole direction of the king's house below-stairs; he has no formal grant of his office, but receives his charge from the sovereign in person, who, delivering to him a white wand, the symbol of his office, says, "*Seneschal, tenez le bâton de notre maison*." This officer has been called lord steward since 1540; previously to the 31st of Henry VIII. he was styled grand master of the household. His function as a judge was abolished in 1849.

STICKLESTADT (Norway). Here Olaf II., aided by the Swedes, was defeated in his endeavours to recover his kingdom from Canute, king of Denmark, and slain, 29 July, 1030. He was afterwards sainted, on account of his zeal for Christianity.

STIPENDIARY MAGISTRATES, see *Magistrates*.

STIRLING (S. Scotland). For the battle of Stirling (1297), see *Cambuskenneth*. The strong castle was taken by Edward I. of England, 1304. Here James II. stabbed the earl of Douglas, 13 Feb. 1452, and here James VI. was crowned, 24 July, 1567. Stirling surrendered to Monk, 14 Aug. 1651. The statue of king Robert Bruce unveiled, 24 Nov. 1877. A gigantic bronze statue of sir William Wallace unveiled at the National Wallace Monument 25 June, 1887.

STIRRUPS were unknown to the ancients. Gracchus fitted the highways with stones to enable the horsemen to mount. Warriors had projections on their spears for the same purpose. Stirrups were used in the 5th century, but were not common even in the 12th.

STOCKINGS of silk are said to have been first worn by Henry II. of France, 1547. In 1560 queen Elizabeth was presented with a pair of knit black silk stockings, by her silk-woman, Mrs. Montague, and she never wore cloth ones any more. *Howell.* He adds, "Henry VIII. wore ordinary cloth hose, except there came from Spain, by great chance, a pair of silk stockings; for Spain very early abounded with silk." Edward VI. was presented with a pair of Spanish silk stockings by his merchant, sir Thomas Gresham; and the present was then much taken notice of. *Idem.* Others relate that William Rider, a London apprentice, seeing at the house of an Italian merchant a pair of knit worsted stockings from Mantua, made a pair like them, the first made in England, which he presented to the earl of Pembroke, 1564. *Stow.* The art of weaving stockings in a frame was invented in England by the rev. Mr. Lee, of Cambridge, in 1589, twenty-five years after he had learnt to knit them with wires or needles. Cotton stockings were first made in 1730; see *Cotton*. Digitated stockings (like gloves), introduced 1882.

STOCKPORT (in Cheshire) became eminent on account of the cotton trade. Heaton Norris, in Lancashire, is united to it by a bridge over the river. Here the Manchester blanketeers were dispersed, 11 March, 1817; and here was a serious religious riot, when two Roman catholic chapels were destroyed, and the houses of many Roman catholics gutted, and their furniture and other contents smashed or burnt, 29 June, 1852. STOICS, disciples of Zeno, the philosopher (about 290 B.C.); obtained the name because they listened to his instructions in a porch (Greek, *stoa*) at Athens. Zeno taught, that man's supreme happiness consisted in living agreeably to nature and reason, and that God was the soul of the world, *Stanley*.

STOKE, EAST (near Newark, Nottinghamshire). Near here, on 16 June, 1487, the adherents of Lambert Simnel, who personated Edward, earl of Warwick, and claimed the crown, were defeated by Henry VII. John de la Pole, the earl of Lincoln, and most of the leaders, were slain. Simnel was afterwards employed in the king's household.

STONE. Stone buildings erected in England by Benedict Biscop about 670. A stone bridge built at Bow, in the 11th or 12th centuries, is accounted the first; but a bridge exists at Crowland, which is said to have been built in 860; see *Bridges*. The first stone building in Ireland was probably a round tower; see *Building*. Stone china-ware was made by Wedgwood in 1762. *Artificial stone* for statues was manufactured by a Neapolitan, and introduced into England, 1776. Stone paper was made in 1776; see *Ransome's Artificial Stone*, and *Lithotomy*. For stone implements, see *Flints*, and *Piano-forte*. An orchestra composed of wind instruments made of terra-cotta appeared in London in 1874.

STONEHENGE (on Salisbury Plain, Wiltshire) is said to have been erected on the counsel of Merlin, by Aurelius Ambrosius, in memory of 460 Britons, who were murdered by Hengist the Saxon about 450. *Geoffrey of Monmouth*. Erected as a sepulchral monument of Ambrosius, 500. *Polydore Vergil*. An ancient temple of the Britons, in which the Druids officiated. *Dr. Stukeley*. The Britons are said to have held annual meetings at Abury and Stonehenge, when laws were made and justice administered. The cursus near Stonehenge was discovered by Dr. Stukeley, 6 Aug. 1723. The origin and object of these remains are still very obscure.

The thorough preservation of Stonehenge strongly advocated Aug. 1886. Fall of one of the uprights and capstone, 31 Dec. 1900, afterwards restored, Stonehenge enclosed within a fence, 1901.

STONYHURST COLLEGE, N.E. Lancashire. This institution for the education of Roman Catholics was begun by the arrival in 1794 of 18 Jesuit fathers, with their pupils, of the seminary of St. Omer (*which see*), by invitation of Mr. Thos. Weld of Lulworth, himself formerly a pupil. At first they were placed in an old mansion here. The undertaking prospered, and during last century the present spacious buildings were erected, including a chapel, library, museum, and observatory. In 1840 the college was affiliated to the University of London.

STORM-WARNINGS, see under *Meteorology*.

STORMS, see *Meteorology*, *Cyclones*, and *Waterspouts*. The following are recorded:—

In London a storm raged which destroyed 1500 houses, 944.

In several parts of England, the sky being very dark, the wind coming from the S.W.; many churches were destroyed; and in London 500 houses fell, 5 Oct. 1091. On the coast of Calais, when Hugh de Beauvais and several thousand foreigners, on their voyage to assist king John against the barons, perished, 1215. *Holinshed*.

It thundered 15 days successively, with tempests of rain and wind, 1233.

Storm with violent lightnings; one flash passed through a chamber where Edward I. and his queen were conversing, did them no damage, but killed two of their attendants, 1285. *Hoveden*.

Violent storm of hail near Chartres, in France, which fell on the army of Edward III. then on its march. The hail was so large that the army and horses suffered very much, and Edward was obliged to conclude a peace, 1339. *Matt. Paris*.

When Richard II.'s queen came from Bohemia, on her setting foot on shore an awful storm arose, and her ship and a number of others were dashed to pieces in the harbour, Jan. 1382. *Holinshed*.

Richard's second queen also brought a storm with her to the English coasts, in which the king's baggage was lost, and many ships cast away, 1366. *Holmshede.*

Hurricane, throughout Europe, which did very considerable damage, on 3 Sept. 1658, the day that Cromwell died. *Mortimer.*

Storm on east coast of England: 200 colliers and coasters lost, with most of their crews, 1696.

The "Great Storm," one of the most terrible that ever raged in England. The devastation on land was immense; and in the harbours and on the coasts the loss in shipping and in lives was still greater, 26-27 Nov. 1703. The loss sustained in London alone was calculated at 2,000,000*l.* sterling. The number of persons drowned in the floods of the Severn and Thames, and lost on the coast of Holland, and in ships blown from their anchors and never heard of afterwards, is thought to have been 8000. SUGAR* (*Saccharum officinarum*) is supposed to have been known to the ancient Jews. Found in the East Indies by Nearchus, admiral of Alexander, 325 B.C.—*Strabo*. An oriental nation in alliance with Pompey used the juice of the cane as a common beverage.—*Lucan*. It was prescribed as a medicine by Galen, 2nd century. Brought into Europe from Asia, A.D. 625;—in large quantities, 1150. Attempted to be cultivated in Italy; not succeeding, the Portuguese and Spaniards carried it to America about 1510.

The sugar-cane transported from Syria to Cyprus about 1148; from Madeira about 1420; and to the West Indies about 1506

It is not known at what date sugar was introduced into England, but it seems to have been prior to the reign of Henry VIII. Mr. Whitaker, in the *History of Whalley*, p. 109, quotes an instance in 1497

A manuscript letter from sir Edward Wotton to lord Cobham, dated Calais, advises him that sir Edward had taken up for his lordship twenty-five sugar-loaves at six shillings a loaf, "whiche is eighte pence a pounce" 6 March, 1546

Sugar-refining was made known to Europeans by a Venetian, 1503, and was first practised in England in 1650, though some say we had the art a few years earlier. The invaluable vacuum-pan was invented by Howard, 1812. Dr. Scofferri's processes were patented in 1848-50, but not adopted in Britain.

* Sugar, long considered a neutral substance, without congeners, has become the head of a numerous family, viz.: Cane-sugar (*sucrose*, from the sugar-cane; boiled with dilute acids it becomes *glucose*); Fruit-sugar (from many fruits); Grape-sugar (*glucose*, from dried fruits and altered starch); sugar of milk; *melitose* (from eucalyptus, by Berthelot in 1856); *sorbin* (from the berries of the mountain ash, by Pelouze); *inosite* (from muscular tissue, Scherer); *dulcose* (by Laurent); *mannite* (from manna, obtained from the fraxinus ornus, a kind of ash); *quercite* (from acorns); to these have been added *mycose*, by M. Mitscherlich, and *melezetose* and *rehalose*, by M. Berthelot.

SUICIDE (from *sui*, self; *cadere*, to kill), the slayer of himself. The first instances recorded in Jewish history are those of Samson, about 1120, and Saul, 1055 B.C. The Greek and Roman philosophers deemed it a crime, and burned the offending hand apart from the rest of the body. In the reign of Tarquin I., the Roman soldiers, thinking themselves disgraced by being ordered to make common sewers, destroyed themselves, 606 B.C. Cato com-

mitted suicide, 46 B.C.* In the Roman catholic church, in the 6th century it was ordained that no commemoration should be made in the Eucharist for such as committed self-murder. This ecclesiastical law continued till the Reformation, when it was admitted into the statute law of England by the authority of parliament, with the confiscation of land and goods. Till 1823 the body of the suicide was directed to be buried in a cross-road, and a stake to be driven through it. A new act, suppressing the barbarous customs, was passed in 1882. It is now usually buried in consecrated ground without a religious ceremony. Thomas Cooper, the eminent Chartist, author of "The Purgatory of Suicides," an epic poem, published in 1845, died, aged 87, 15 July, 1892. Dr. Henry Morselli published "Suicides: an Essay," 1881. There were 7,572 suicides in France in 1887.

* Three instances of self-destruction by fire: the philosopher Empedocles threw himself into the crater of Mount Etna; a Frenchman threw himself, in 1820, into the crater of Vesuvius; and an Englishman, who jumped into the furnace of a forge about the year 1811. Plutarch relates that an unaccountable passion for suicide seized the Milesian virgins, from which they could not be prevented by the tears and prayers of their friends; but a decree being issued that the body of every young maid who did self-murder should be drawn naked through the streets, a stop was soon put to the extraordinary frenzy.

SUITORS' FUND (in the court of chancery) in 1862 amounted to 1,200,000*l.* As this money has no specific owner, a proposal was made by government to apply it to the building of new law-courts, payment of all legal claims being guaranteed, which was directed by the "Courts of Laws Fees" act, passed 20 Aug. 1867.

SULPHUR has been known from the earliest times. Basil Valentine mentions its production from green vitriol. Sulphuric acid (vitriol), produced by him from burning sulphur, was introduced into England about 1720. Sulphur has been the object of research of many eminent chemists during the present century, and many discoveries have been made, such as its allotropic condition, &c. It is the inflammable constituent in gunpowder, and a deleterious ingredient in coal gas. The sulphur mines of Sicily have been wrought since the 16th century, but the exportation was inconsiderable till about 1820; in 1838 the trade increased so much that Great Britain alone imported 38,654 tons. In that year the Neapolitan government was induced to grant a monopoly of the trade to a French company; but a firm remonstrance from the British government led to a discontinuance of this impolitic restriction in 1841, which, however, gave a great and lasting impetus to the British sulphur manufacture.

SULPHURYL FLUORIDE, a colourless, odourless gas, which can be liquefied and solidified at low temperatures; prepared by Moissan and Lebeau, by the action of fluorine on sulphur dioxide; reported, 17 Aug. 1901.

SULU, Sooloo or Soluk Archipelago, a group of above 60 islands in the Malay Archipelago.

SUMATRA, an island in the Indian ocean, called Java Minor by Marco Polo, and visited by Nicolo di Conti prior to 1449. Mainly on account of the pepper trade, the Dutch formed a settlement at Padang about 1649, and the British at Bencoolen about 1685. The Dutch possessions with Java were acquired by the British in 1811; but were restored in 1816. In 1824 the Dutch acquired all the British settlements in Sumatra, in exchange for Malacca and some possessions in India. Restrictions on their progress in Sumatra were removed by treaty Feb. 1872. Severe fighting between the Dutch and the Achinese natives with varying results, mostly in favour of the Dutch, April 1873 to 1879. Dutch successful in war, peace announced, Aug. 1879. New war; great victory of the Dutch, 13 Sept. 1882. Sumatra suffered much by the volcanic eruptions and earthquakes of 26-27 Aug. 1883. See *Java and Holland*, 1896 *et seq.*

SUMMARY JURISDICTION ACT, 42 & 43 Vict. c. 49, 11 Aug. 1879. It amends the law respecting the jurisdiction of magistrates, in regard to fines, imprisonments, &c. It came into operation 1 Jan. 1880. Amended 1881, 1884 and 1885; again, powers extended, 1899.

SUMPTUARY LAWS restrain excess in dress, furniture, eating, &c. The laws of Lycurgus were severe against luxury, probably 9th century B.C. Those of Zaleucus ordained that no sober woman should go attended by more than one maid in the street, or wear gold or embroidered apparel, 450 B.C.—*Diog. Laert.* The *Lex Orchia* among the Romans (181 B.C.) limited the guests at feasts, and the number and quality of the dishes at an entertainment; and it also enforced that during supper, which was the chief meal among the Romans, the doors of every house should be left open. The English sumptuary laws, chiefly of the reigns of Edward III. and Henry VIII., were repealed in 1856; see *Dress*.

SUN.* Pythagoras taught that the sun was one of the twelve spheres, about 529 B.C. The relative distances of the sun and moon were first calculated geometrically by Aristarchus, who also maintained the stability of the sun, about 280 B.C. Numerous theories were ventured during fifteen centuries, and astronomy lay neglected till about A.D. 1200, when it was brought into Europe by the Moors of Barbary and Spain. The Copernican system was made known in 1530; see *Copernican System and Solar System*. Galileo and Newton maintained that the sun was an igneous globe. The transit of Mercury was observed by Gassendi, 1631. For recent discoveries, see *Eclipses*, *Spectrum*, and *Venus*.

* The estimated diameter is 840,000 miles, and the distance from the earth, given as 95,000,000 miles, has been corrected to 94,000,000, by the result of the experiments and calculations of MM. Fizeau and Foucault (1864). "The error corrected corresponds to the apparent breadth of a human hair at 125 feet, or of a sovereign 8 miles off."—*Herschel*. Distance computed by sir G. B. Airy from results of the observation of transit of Venus (9 Dec. 1874), 93,321,000 miles, Oct. 1877; 92,600,000, June, 1878. From the transit of 1882 by professor Harkness (an American), 92,385,000 miles, October, 1888. The sun is now described as consisting of a solid or liquid nucleus, surrounded by a luminous envelope (photosphere), over which is a dense atmosphere containing the vapours of various metals and other elements; see *Spectrum*.

By the observations of Dr. Halley on the spot which darkened the sun's disc in July and August, 1676, he established the certainty of its motion round its own axis.

Solar spots were observed by Fabricius and Harriot in 1610. A macula three times the size of the earth passed the sun's centre, 21 April, 1766, and frequently since.

SUNDAY was the day on which, anciently, divine adoration was paid to the Sun. Among Christians it is commonly called *Dies Dominica*, or Lord's day, on account of our Saviour's appearance on that day, after his resurrection. The first civil law that was issued for the observance of this day, combined it with that of the seventh-day Sabbath and other festivals (*Eusebius, Life of Constantine*), and it was followed by several imperial edicts, in favour of this day, which are extant in the body of Roman law, the earliest being that of Constantine the Great, dated 7 March, 321. SUNDAY SCHOOLS. Cardinal Sr. Charles Borromeo introduced Sunday instruction of children at Milan, about 1580; in the next century his example was followed in England by the rev. Joseph Alleine; by rev. David Blair, at Brechin, about 1760; by the rev. Theophilus Lindsey, at Catterick, Yorkshire, about 1763; and more especially organised by Robert Raikes, an eminent printer of Gloucester, conjointly with rev. Thos. Stock, 1780. SUNSHINE RECORDER, a sphere of glass so disposed as to char a marked piece of paper, by concentrating the sun's rays. The instrument (invented by Mr. J. F. Campbell in 1857) in its present form was devised by sir G. G. Stokes (died 1 Feb. 1903) and made by Mr. R. J. Lecky (1880). A more delicate form of instrument for recording photometrically the duration and intensity of sunshine was invented by Mr. J. B. Jordan, 1884; much improved, April, 1888.

SUPERANNUATION ACTS for the Civil Service were passed in April, 1859, Aug. 1866, June, 1892.

SUPREMACY over the church was claimed by pope Gelasius I. as bishop of Rome, 494. On 15 Jan. 1535, Henry VIII. by virtue of the act 26 Hen. VIII. c. 1, formally assumed the style of "on earth supreme head of the church of England," which was retained by Edward VI., Mary I. (for a time), but was refused by Elizabeth, and has never been revived by succeeding sovereigns. The bishop of Rochester (Fisher) and the ex-lord chancellor (sir Thomas More) and many others were beheaded for denying the king's supremacy in 1535; and in 1578, John Nelson, a priest, and Thomas Sherwood, a young layman, were executed at Tyburn for the same offence. The "act of Supremacy," repealed by 1 & 2 Phil. and Mary, c. 8 (1554), was re-enacted 1 Eliz. c. 1 (1559).

SUPREME COURT OF JUDICATURE was constituted by the Judicature act 36 & 37 Vict. c. 66, passed 5 Aug. 1873, to come into operation 1 Nov. 1874. In 1874 this was deferred to 1 Nov. 1875. The "Council of Judges" appointed by this act met to consider questions relating to the reform of the law, 18 Jan. 1892. See under *Judges*.

The existing courts were to be united into one Supreme Court, divided into the High Court of Justice and the Court of Appeal. The High Court to consist of the lord chancellor, the two lord chief justices, the vice-chancellors, and the other judges; (hereafter the court to consist of 21 judges.)

Five divisions: 1. Chancery, 2. Queen's Bench, 3. Common Pleas, 4. Exchequer, and 5. Probate, Divorce, and Admiralty; subject to alteration.

The Court of Appeal to consist of five ex-officio judges (viz., lord chancellor, two lord chief justices, lord chief baron, master of the rolls), and such others as may be appointed (§§ 20, 21, 22).

Appeals to the house of lords or the judicial committee of the privy council to be discontinued.

Law and equity to be concurrently administered; law terms abolished; and sittings in vacation provided for. See under *Terms*.

The act passed 11 Aug. 1875, suspended §§ 20, 21, and 55, converted the proposed court of appeal into an intermediate court till 1 Nov. 1876. (See below.)

The Supreme Court of Judicature (comprising the High Court of Justice, Chancery division, Queen's Bench, Common Pleas, and Exchequer subdivisions, Probate, Divorce, and Admiralty division (all which see) began 2 Nov. 1875

After one term, it was said in the *Times*, "Its operation has tended to economise judicial power and to prevent delay of justice" 29 Nov. "

By the Appellate Jurisdiction act (1876) the house of lords retains its powers as a court of ultimate appeal; the court to consist of the lord chancellor, two lords of appeal (to be created peers for life, with 6000l. salary), and any peers who are or have been lawyers. Act to come into operation 1 Nov. 1876

The court may sit during prorogation of parliament. The statute relating to the judicial committee of the privy council and to the intermediate court of appeal is amended

By this act also the Queen's Bench, Common Pleas, and Exchequer divisions of the Supreme Court are converted into 15 courts of first instance or primary courts.

Additional judge for chancery division appointed. Style of ordinary judges:—of the court of appeal to be "lord justices of the appeal;" other judges, "justices of the high court;" by act passed, 24 April. 1877

An amendment act (42 & 43 Vict. c. 78), relating to offices, fees, &c., passed 15 Aug. 1879

At a meeting of the judges it was resolved to recommend the abolition of the exchequer and common pleas, and their consolidation into one, termed the "queen's bench division," under the lord chief justice of England, 30 Nov.; order in council, 16 Dec. 1880

Carried into effect; old divisions at an end; judicature act carried out for the first time, 7 March, 1881

Further changes made by the act 44 & 45 Vict. sec. 68, passed 27 Aug. 1881, by it the master of the rolls was made a judge of appeal only, and the chief justice of England was endowed with the powers of the chief justice of common pleas and the chief baron of the exchequer.

New code of rules of procedure issued about 9 July; came into force 24 Oct. 1883. See *Circuits*. Amendment act passed (combining other acts), 14 Aug. 1884; other acts passed 14 Aug. 1890, 11 May, and 5 Aug. 1891 and 3 July, 1894

SURAT (E. Indies). Before the English East India company obtained possession of Bombay, the presidency of their affairs on the coast of Malabar was at Surat; and they had a factory here established under captain Best in 1611. The Great Mogul had here an officer who was styled his admiral. An attack of the Mahratta chief Sivajee, on the British factory, was defeated by sir George Oxenden, 1664. The English were again attacked in 1670 and 1702, and often subsequently. The

East India company, in 1759, fitted out an armament, which dispossessed the admiral of the castle; and, soon after, the possession of this castle was confirmed to them by the court of Delhi. Surat was vested in the British in 1800 and 1803. A fourth part of Surat was destroyed by fire 6, 7 April, 1889.

SURGEONS. Barbers and surgeons were united in one company in 1540; but it was enacted that "no person using any shaving or barbering in London shall occupy any surgery, letting of blood, or other matter, excepting only the drawing of teeth." In 1745 the surgeons and barbers of London were made distinct corporations. The college of surgeons obtained charters in 1745, 1800, and 1843 (when it was styled the "Royal College of Surgeons of England"), 1852 and 1859. Since that period, various legislative and other important regulations have been adopted to promote their utility and respectability; and no person is legally entitled to practise as a surgeon in the cities of London and Westminster, or within seven miles of the former, who has not been examined at this college. The college in Lincoln's-inn-fields was remodelled in 1836, and the interior completed in 1837. The premises were enlarged in 1852-3. The museum began with the Hunterian collection, 1800; and the library was founded in 1801. Centenary of the college celebrated, 26 July, 1900. Mrs. Mary Emily Dowson, the first lady surgeon duly qualified to act, was invested with the letters testimonial of the Irish college of surgeons, June, 1886. See *Anatomy, Physic, and Medical Council*.

Royal college of surgeons, Edinburgh, received its charter from James V. 1505; another received in 1778, and a fuller one, 1851; Dublin, incorporated, 1786.

SURGERY. It was not until the age of Hippocrates that diseases were made a separate study from philosophy, &c., about 410 B.C. Hippocrates mentions the *ambe*, the ancient instrument with which they reduced dislocated bones. Celsus flourished about A.D. 17; Galen, 170; Aëtius, 500; Paulus Ægineta, in 640. The Arabians revived surgery about 900; and in the 16th century a new era in the science began; between these periods surgery was confined to ignorant priests and barbers. Anatomy was cultivated under Vesalius, the father of modern surgery, in 1538. Surgeons and doctors were exempted from bearing arms or serving on juries, 1513, at which period there were only 13 in London; see *Physic and Photography*, 1896. For antiseptic treatment see *Germ Theory*.

Death of prof. Albert Mosetig, aged 69 [originator of the method of treating bones affected with caries with a filling composed of iodoform and petroleum, a treatment which often rendered amputation unnecessary], end April, 1907

SURGICAL AID SOCIETY, founded 1862; supplies the poor with instruments, water-beds, &c.

SURINAM (Dutch Guiana), discovered by Ojeda, 1499. The factories established by the English in 1640 were occupied by the Portuguese, 1643; by the Dutch, 1654; taken by the British, 1799, 1804; and restored to the Dutch, 1802, 1814. Plantation riot, Mavor the manager killed, troops fire on the rioters, 13 killed and 40 wounded, reported. 31 July, 1902

SURNAMES were introduced into England by the Normans, and were adopted by the nobility about 1100. The old Normans used *Fitz*, which signifies son, as Fitz-herbert. The Irish used O, for grandson, as O'Neal, O'Donnell. The Scottish Highlanders used Mac, as Macdonald, son of Donald. The Welsh used Ap, as Ap Rhys, the son of Rhys;

Ap Richard. The prefix Ap eventually was combined with the name of the father, hence Prys, Pritchard, &c. The northern nations added the word son to the father's name, as Williamson. Many of the most common surnames, such as Johnson, Wilson, Dyson, Nicholson, &c., were taken by Brabanters and other Flemings, who were naturalised in the reign of Henry VI., 1435.

SURPLICES were first worn by the Jewish priests, and are said to have been first used in churches in the fourth century, and encouraged by pope Adrian, 786. "Every minister saying public prayers shall wear a comely surplice with sleeves," *Canon* 58. The garb prescribed by stat. 2 Edw. VI. 1547; again 1 Eliz. 1558; and 13 & 14 Chas. II. 1662.

SURREY CHAPEL, Blackfriars-road, was built for Calvinistic dissenters in 1783; the rev. Rowland Hill, their minister, who died in 1833, was buried in a vault here. The congregation under the rev. Newman Hall (died 18 Feb. 1902) removed to Christ church, in Westminster-road, July, 1876. See *Lincoln Tower*.

SURREY HOUSE MUSEUM, Forest Hill, containing the collections of Mr. F. Horniman, cost about 100,000*l.*, presented by him to the public, was opened by sir Morell Mackenzie, 24 Dec. 1890.

SURREY ZOOLOGICAL GARDENS (near London) were established in 1831, by Mr. Edward Cross, who brought hither the menagerie formerly at Exeter change. Various picture models were exhibited subsequent to 1837, viz., Vesuvius, Iceland, &c., accompanied by fireworks. In 1856, a company which had taken the gardens, erected a large yet elegant building for concerts; the architect being Mr. Horace Jones. On 19 Oct. 1856, when the hall contained about 9000 persons, attending to hear the rev. C. H. Spurgeon, seven were killed and thirty seriously injured, by a false alarm of fire. It was burnt 11 June, 1861; see *Fires*.

SURTEES SOCIETY for publishing MSS. relating to the northern counties, established 1834; 108 volumes have been published, 1910.

SURVEY ACT, passed 12 May, 1870. See *Ordinance Survey*.

SURVEYORS, INSTITUTION OF, London, founded in 1868, to promote the "knowledge which constitutes the profession of a surveyor." Incorporated by royal charter as "The Surveyors' Institution" in 1881. The number of members, 1,200 in 1886; about 3,000 in 1897.

SUSA, or **SHUSHAN**, capital of Susiana, a province of Persia, was taken by Alexander the Great, 331 B.C.

SUSPENSION BRIDGES are ancient in China. The Hungerford (or Charing-cross) suspension bridge, opened May 1, 1845, was removed to Clifton and opened there, 8 Dec. 1864. Parliament empowered the commissioners of woods to erect (among other improvements there) a suspension bridge at Battersea, Sept. 1846; and many bridges of similar construction have been erected in various parts of the kingdom. Lambeth and Westminster suspension bridge was opened 10 Nov. 1862; see *Menai Strait, Hungerford, Clifton, &c.*

SUSPENSORY BILL, the name given to "a bill to prevent for a limited time [to 1 Aug. 1869] new appointments in the church of Ireland; and to restrain, for the same period, in certain

respects, the proceedings of the Ecclesiastical Commissioners for Ireland." This bill was introduced into the commons by Mr. Gladstone, 14 May, and passed through committee, 5 June; rejected by the lords (192 to 97), 30 June, 3 A.M., 1868. A similar bill, with limitations relating to Wales and Monmouthshire, introduced by Mr. Asquith, read first time (301 to 245), 23 Feb. 1893; withdrawn, Sept. 1893; see *Church of England*, May, 1893.

SUTLEJ, a river in N.W. India, the ancient Hyphasis or Hypana, on the banks of which were fought the desperate battles of Aliwal, 28 Jan., and Sobraon, 10 Feb. 1846 (*which see*).

SUTTEE, the burning of widows. This custom began in India from one of the wives of "Bramah, the Son of God," sacrificing herself at his death, that she might attend him in heaven. Seventeen widows have burnt themselves on the funeral pile of a rajah; and in Bengal alone, 700 have thus perished in a year. The English government, after long discouraging suttees, by the agency of lord William Bentinck, formally abolished them, 7 Dec. 1829; but they have since occasionally taken place. The wife of the son of the rajah of Beygoon thus perished, June, 1864, and several wives of sir Jung Bahadur, minister of Nepal, 1 March, 1877. Suttees still occur.

Legislative interference with the Hindoo marriage laws declared by lord Dufferin, viceroy, to be ineffectual; moral influence progressing (see under *Deism*) Oct. 1886

SUWANOW (or **SUWOROFF**), a group of small uninhabited isles in the Pacific, about 450 miles NNW. of the Samoan isles, annexed by Great Britain, 1889.

SVEABORG, a strong fortress in Finland, the Gibraltar of the north, $3\frac{1}{2}$ miles south of Helsingfors; it is situated on seven rocky islands; the fortifications were commenced by the Swedes in 1748, and completed after Finland was united to Russia in 1809. On 6 Aug. 1855, the English and French fleet anchored off Sveaborg, and bombarded it by mortar and gun-boats from the 9th to the 11th, causing the destruction of nearly all the principal buildings, including the dockyard and arsenal. Few casualties and no loss of life ensued in the allied squadron, but this success was not followed up.

SWABIA, a province in S. Germany; was conquered by Clovis, and incorporated into the kingdom of the Franks, 496. After various changes of rulers, it was made a duchy by the emperor Conrad I., in 912, for Erchanger; according to some, in 916, for Burekhardt. The duchy became hereditary in the house of Hohenstaufen in 1080. Duke Frederick III. became emperor of Rome, commonly styled of Germany, as Frederick I. (usually styled Barbarossa, red beard), in 1152. Conradin, his descendant, was defeated at the battle of Tagliacozzo (*which see*), in 1268, and beheaded shortly after. The breaking up of the duchy gave rise to many of the small German states; part of Swabia is included in Württemberg and Switzerland. Swabia was made a circle of the empire in 1387 and 1500. A league, composed of Swabian cities and states, about 1254, was the germ of the great Swabian league, formed for the preservation of the peace of Germany, under the auspices of the emperor Frederick, in 1488.

SWEATING.

SWEATING SYSTEM, a term applied, especially in the east end of London, to the practice carried on by large tradesmen of entrusting orders to middlemen termed "sweaters," who employ men, women, and children (principally foreigners) to make up clothes, boots, and furniture in their own houses at excessively low wages with many evil consequences. Lord Dunraven's motion for a select committee of inquiry was carried in the lords, 28 Feb.; archbishop of Canterbury, earl of Derby, and others appointed 9 March, 1888. Painfully distressing evidence was obtained. The origin of the evil is attributed to the great competition in producing extreme cheapness. SWEDEN (N. Europe). The ancient inhabitants were the Fins, now the modern inhabitants of Finland, who retired to their present territory on the appearance of the Scandinavians or Goths, who have ever since been masters of Sweden; see *Scandinavia*, and *Norway*, 1891. The internal state of this kingdom is little known previous to the 11th century. By the union of Calmar in 1397, Sweden became a province of Denmark, and was not wholly rescued from this subjection till 1521, when Gustavus Vasa recovered the kingdom from the Danish yoke. He became king in 1523, and his descendants ruled till 1809. The government of Sweden is a limited

monarchy. The diet consists of four orders, the nobles, the clergy, the peasants, and the burghers, and meet every three years. The king is, as in Britain, the head of the executive. There are two universities, Upsal and Lund; and Sweden can boast, among its great men, Linneus, Celsius, Scheele, Bergman, Berzelius, Thorwaldsen, and Andersen. *Capital*: Stockholm (population, 1908, 339,582). Population (31 Dec. 1887), 4,734,901; 1890, 4,784,675; 1908, 5,429,600. SWEDENBORGIAN is the name given to those who adopt the theological teachings of

Emanuel Swedenborg, but the organization calls itself The New Church, or New Jerusalem Church.

Swedenborg was born in Stockholm, 29 January, 1688, died in London 29th March, 1772; interred in a vault of the Swedish church in Prince's-square, near the Tower of London; remains taken home by the Swedish Government and deposited with much ceremony in Ursula cathedral, 1908.

Assessor in the Swedish Royal College of Mines, 1717-1747, with a seat in the Upper House of the Legislature.

Ennobled by queen Ulrica Eleonora, 1719.

Wrote many scientific and philosophical works, his *Principia, Economy of the Animal Kingdom, &c.*, being published at the expense of the duke of Brunswick.

In 1743 he began his work as a theologian, writing *Arcana Celestia, Heaven and Hell, True Christian Religion, Divine Love and Wisdom, Divine Providence, Apocalypse Revealed, &c., &c.*

In London meetings of his followers began in 1783; they organised for public worship 1787.

Swedenborg Society for publishing his works founded 1810.

Missionary and Tract Society of the New Church, 1821. National Missionary Institution, 1857.

New Church College, 1865.

New Church Orphanage, 1887.

In 1910 there were over 71 churches in Great Britain connected with the General Conference, and 6 independent congregations. In America there were 99 connected with the General Convention, and many important circles in affiliation. In Canada there were several places of worship, and others in Australia, New Zealand, and South Africa. Also in France, Germany, Austria, Hungary, Sweden, Denmark, &c.

Their belief is that the whole Godhead is centred in Jesus Christ, who is Father, Son, and Holy Spirit; Creator, Redeemer, and Saviour; one in essence and person; in whom is a Trinity of Love, Wisdom, and Power, answering to the trinity in man of soul, body, and their operation; that Salvation is effected by faith in Him and obedience to Him, the Lord operating with the man, and the man co-operating with the Lord, and that Charity and Faith are together in good works; that the Sacred Scripture is the Word of God or the Divine Truth itself, the literal sense being the basis and continent of a spiritual sense in all and every part, and that the word is in all the heavens and the wisdom of the angels is thence derived; that man is a spiritual being fitted for life in the spiritual world, clothed temporarily with a material body for life in this world, which at "death" he lays aside for ever; that the last Judgment was effected in the spiritual world during Swedenborg's lifetime; and that the Lord's Second Coming has taken place in the revelation to man by the Lord, through the instrumentality of Swedenborg, of a new system of truth derived from the inner or spiritual sense of Scripture, based upon the literal sense when properly understood, and having special application to the spiritual life and needs of man, here and hereafter.

The centenary of this society was celebrated by an International Swedenborg Congress attended by 1,300 persons, 1910.

The tabernacle set up at Shiloh by Joshua, 1444 B.C. was replaced by the temple erected by Solomon, 1004 B.C. The chapel erected for George Whitefield in Moorfields in 1741, being of a temporary nature, received the name of Tabernacle, which was afterwards given to their chapels by the Calvinistic Methodists. Whitefield's Tabernacle in Tottenham-court-road was erected in 1756, and enlarged in 1760. His lease expired in 1828; the chapel was opened by the Independents in 1830, taken down in 1890, and a new chapel erected on the site. A large metropolitan tabernacle, erected for the ministrations of Rev. C. H. Spurgeon (died, 31 Jan. 1892), in Newington Butts was opened on 31 March, 1861; burnt down, 20 April, 1893; rebuilt, 1899.

Here a battle was fought 27, 28 July, 1809, between the united British and Spanish armies under sir Arthur Wellesley, and the French army commanded by marshals Victor and Sebastiani. After a conflict on the 27th, both armies remained on the field during the night, and the French at break of day renewed the attack, and were again repulsed by the British with great slaughter. At noon Victor charged the whole

British line, was repulsed at all points, and retreated with a heavy loss. As Soult, Ney, and Mortier were in the rear, the British retired after the victory.

TALLY OFFICE in the Exchequer took its name from the French word *tailleur*, to cut. A tally is a piece of wood written upon both sides, containing an acquittance for money received; which, being cloven asunder by an officer of the exchequer, one part, called the stock, was delivered to the person who paid, or lent, money to the government; and the other part, called the counter-stock, or counter-foil, remained in the office, to be kept till called for, and joined with the stock. This manner of striking tallies is very ancient.—*Beatson*. The practice was ordered to be discontinued in 1782. See *Exchequer*. On 16 Oct. 1834, the houses of parliament were burnt down by too many of these tallies being used in heating the stoves in the house of lords.

TALMUD (from *lamad*, to teach), the compendium of ancient Jewish oral or unwritten law, as distinguished from the Pentateuch, or written law; its origin is coeval with the return from the Babylonish captivity, 536 B.C. Its compilation in Hebrew was begun by the Scribes, and by their successors the work was carried on till 220 n.c. It is composed in prose and poetry, and contains two elements, legal and legendary. The morality resembles that of the New Testament, and the philosophy is rather Platonic than Aristotelian.

The *Mishna*, comprising the work of the rabbis, termed *Thanaim*, was compiled by Jehuda Hanassi, in the middle of the second century, A.D., and forms the Jerusalem Talmud, written at Tiberias, in Palestine, about 230. The Babylonian Talmud contains also the *Genera* or *Ghemara*, the work of the rabbis termed *Amoraim*, criticisms and comments on the *Mishna*. The part named *Halacha* is dogmatic, legal, and doctrinal; the *Agaba* is illustrative, narrative, and legendary.

After being almost universally condemned, and the MSS. often burnt, the defence of the Talmud was undertaken by the German reformer Reuchlin, in the 16th century, and between 1520 and 1523, the "Talmud Babylonicum," in 12 vols. fol., and the "Talmud Hierosolitanum," in one vol. fol., were printed at Venice.

After its failure he fled to Hamburg, and was there delivered up to the English, 24 Nov.; for which Bonaparte declared war upon Hamburg, 15 Oct. 1799. Tandy was liberated after the peace of Amiens in 1802.

TANGANYIKA, a lake of eastern central Africa, 420 miles in length, 15 to 80 miles in breadth.

Discovered by Speke and Burton, 1858. The supposition that the lake belonged to the basin of the Nile was disproved by Livingstone and Stanley, 1871. Cameron, 1871, discovered an outlet, the Lukuga, on the west side of the lake, which Stanley, in 1876, proved to be a communication with the Luabala or Upper Congo.

TANGIER (Morocco, N.W. Africa), besieged by prince Ferdinand of Portugal, who was beaten and taken prisoner, 1437. It was conquered by Alfonso V. of Portugal in 1471, and given as a dower to princess Catherine, on her marriage with Charles II. of England, 1662; who, in 1683, caused the works to be blown up, and the place abandoned. Tangier afterwards became a piratical station. See *Morocco*.

TANJORE (W. India). About 1678, Venecajee, a Mahratta chief, brother of the great Sevajee, made himself rajah. In 1749 a British expedition endeavoured to restore a deposed rajah without success; the reigning prince bought them off by the cession of territories. Much intervention ensued. In 1799 the company obtained possession of the country, engaging to support the rajah with nominal authority. The last is said to have died in 1855.

TANNHÄUSER, the name of one of Wagner's operas, founded on the German legend of the hero of that name.

TANNING leather with the bark of trees was early practised. Great improvements have been made in tanning by chemical processes.

TANTALUM, a rare metal, discovered in an American mineral by Hatchett, in 1801, and named by him columbium; and in a Swedish mineral by Ekberg, who gave it its present name. Wollaston pointed out the identity of the two metals in 1809; and Berzelius prepared pure metallic tantalum in 1824. In 1846 Rose discovered that tantalum was really a mixture of three metals, which he named tantalum, niobium, and pelopium.—*Gmelin*.

TANZIMAT, see *Turkey*, 1839-44.

TAOISM, one of the three religions of China. The name is derived from the Tào, or "Way," a treatise written by Li Urh, or Laou-tze, a contemporary of Confucius in the sixth century B.C. The "Way" is the quiet, passionless discharge of all our duties, "Heaven" not being a ruler, but a pattern. Taoism was modified by the introduction of Buddhism.

TAPESTRY. An art of weaving borrowed from the Saracens, and hence its original workers in France were called *Sarazinois*. The invention of tapestry hangings belongs [the date is not mentioned] to the Netherlands.—*Guicciardini*. Manufactured in France under Henry IV. by artists invited from Flanders, 1606. The art was brought into England by William Sheldon; and the first manufactory of it was established at Mortlake by

sir Francis Crane, 17 James I. 1619.—*Salmon*. Under Louis XIV. the art of tapestry was much improved in France; see *Gobelins Tapestry*. Very early instances of making tapestry are mentioned by the ancient poets, and also in Scripture; so that the Saracens' manufacture is a revival of the art. For the tapestry said to have been wrought by Matilda, queen of England, see *Bayeux Tapestry*.

TAPIR, the American water-hog, a pachydermatous animal. The first born in England at Zoological Gardens, London, 12 Feb. 1882.

TAR. The chemist Becher first proposed to make tar from pit-coal; the earl of Dundonald's patent was granted 1781. The mineral tar was discovered at Coalbrookdale, Shropshire, 1779; and in Scotland, Oct. 1792. Tar-water was first recommended for its medicinal virtues by Dr. Berkeley, bishop of Cloyne, about 1744. From benzole, discovered in coal-tar, many brilliant dyes are now produced; see *Benzole*.

TARA, a hill in Meath, Ireland, where the early kings of Ireland were inaugurated. Near here, on 26 May, 1798, the royalist troops, 400 strong, defeated the insurgent Irish (4000 men), 500 killed. On 15 Aug. 1843, Daniel O'Connell held a monster meeting here (250,000 persons said to have been assembled).

TARENTUM (now *Taranto*, S. Italy) was founded by the Greek Phakuntus, B.C. 708. The people of Tarentum assisted by Pyrrhus, king of Epirus, supported a war which had been undertaken B.C. 281 by the Romans, to avenge the insults the Tarentines had offered to their ships when near their harbours; it was terminated after ten years; 300,000 prisoners were taken, and Tarentum became subject to Rome. Except the citadel, Tarentum was captured by Hannibal, 212, but recovered by Fabius, 209 B.C. Tarentum has shared in the revolutions of Southern Italy, and only ruins remain.

TARGUMS or **EXPLANATIONS**, names given to certain ancient Chaldee paraphrases of the Old Testament. The most remarkable are those of Onkelos, Jonathan-ben-Uzzel, and Joseph the Blind. The Targum of Onkelos is referred by some writers to the first century A.D.

TARIFA (S. Spain), the ancient Joza and Julia Truoducta, where Muza landed when invading Spain, 712. It was taken from the Moors by Sancho IV. of Castile, 1291 or 1292; and was relieved, when besieged by them, after a great victory over the kings of Morocco and Granada, by Alfonso XI. of Castile and Alfonso IV. of Portugal, 28 or 30 Oct. 1340. The conflict is called the battle of Salado, having been fought on the banks of that river. Tarifa was taken by the French in 1823.

develop the resources of the Empire, and to defend the industries of the United Kingdom. The league, which is independent of political parties, carries on its propaganda by means of meetings, lectures, and literature on the subject; it also supports members of parliament and parliamentary candidates who are in favour of tariff reform. Branches of the league have been formed in every constituency in England and Wales, with the exception of the counties of Worcestershire, Warwick, Shropshire, and Staffordshire, which form the area worked by the Imperial tariff committee at Birmingham.

TARPEIAN ROCK (Rome), owed its name to the tradition that Tarpeia, daughter of Tarpeius, the keeper of the Roman citadel, was here crushed to death by the shields cast on her by the Sabines, whom she treacherously admitted, having bargained for the gift of what they wore on their left arms, meaning their bracelets; about 750 B.C.

TARRAGONA (N.E. Spain), occupied as a naval station by the British before their capture of Gibraltar in 1704. It was stormed and sacked by the French under Suchet, 29 Jan. 1811, and the inhabitants put to the sword. Population, 1887, 27,225; 1910 (est.), 36,250.

TARTAN or **HIGHLAND PLAID**, the dress of the Scottish Highlanders, said to have been derived from the ancient Gauls, or Celtæ, the *Galli non braccati*.

TARTARIC ACID is said to have been the first discovery of the eminent chemist, Scheele, who procured it in a separate state by boiling tar with lime, and in decomposing the tartrate of lime thus formed by means of sulphuric acid, about 1770. In 1859 baron Liebig formed tartaric acid from other sources.

TARTARY, a name given in the middle ages to a part of Central Asia and Eastern Europe, see *Turkestan and Crimea*. The Tatars, or Tartars, or Mongols, or Moguls, were known in antiquity as Scythians. During the decline of the Roman empire, these tribes began to seek more fertile regions; and the first who reached the frontier of Italy were the Huns, the ancestors of the modern Mongols. The first acknowledged sovereign of this vast country was the famous Genghis Khan. His empire, by the conquest of China, Persia, and all central Asia (1206-27), became one of the most formidable ever established; but it was split into parts in a few reigns. Timur, or Tamerlane, again conquered Persia, broke the power of the Turks in Asia Minor (1370-1400), and founded the Mogul dynasty in India, which began with Baber in 1525, and formed the most splendid court in Asia till the close of the 18th century; see *Golden Horde*. The Calmucks, a branch of the Tartars, expelled from China, settled on the banks of the Volga in 1672, but returned in 1771, and thousands perished on the journey.

TAUNTON (Somerset) was taken by Perkin Warbeck, Sept. 1497; and here he was surrendered to Henry VII. 5 Oct. following. The duke of Monmouth was proclaimed king at Taunton, 20 June, 1685; and it was the scene of the "bloody assize" held by Jeffreys upon the rebels in August. The castle restored and a fine museum opened by lord Cork, 21 May, 1902. Population, 1901, 21,078; 1909 (est.), 23,048.

TAVERNS may be traced to the 13th century. "In the reign of king Edward the Third, only three taverns were allowed in London: one in Chepe, one in Walbrok, and the other in Lombard-street."—*Spelman*. The *Boar's Head*, in Eastcheap, existed in the reign of Henry IV., and was the rendezvous of prince Henry and his dissolute companions. Shakespeare mentions it as the residence of Mrs. Quickly, and the scene of Falstaff's merriment.—*Shakespeare*, "Henry IV." The *White Hart*, Bishopsgate, established in 1480, was rebuilt in 1829. Taverns were licensed in 1752.

Taverns were restricted by 7 Edward VI. 1552-3, to 40 in London, 8 in York, 4 in Norwich, 3 in Westminster, 6 in Bristol, 3 in Lincoln, 4 in Hull, 3 in Shrewsbury, 4 in Exeter, 3 in Salisbury, 4 in Gloucester, 4 in Chester, 3 in Hereford, 3 in Worcester, 3 in Southampton, 4 in Canterbury, 3 in Ipswich, 3 in Winchester, 3 in Oxford, 4 in Cambridge, 3 in Colchester, 4 in Newcastle-upon-Tyne.

TAXES were levied by Solon, the Athenian legislator, about 594 B.C. The first class of citizens paid an Attic talent of silver, about 55*l.* of our money. Darius, the son of Hystaspes, levied a land-tax by assessment, which was deemed so odious that his subjects styled him, by way of derision, Darius the Trader, 480 B.C.—*D'Eon*. Taxes in specie were first introduced into England by William I., 1067, and he raised them arbitrarily; yet subsidies in kind, as in wool, leather, and other products of the country, continued till the accession of Richard II., 1377.—*Camden*; see *Revenue and Income Tax*. "**TAXES ON KNOWLEDGE**" (see *Advertisement Duty, Newspaper Stamp, and Paper Duty*). For his exertions in repealing these, a testimonial was presented to Mr. T. Milner Gibson in 1861. The assessed taxes now include *land tax, house duty, and property and income tax*. The Taxes Management act, 43 & 44 Vict. c. 19, passed 6 Aug. 1880 (see below). The elder Wm. Pitt, in his great speech on the Stamp act imposed on the colonies without their consent, 1765—66, said that taxation and representation should go hand in hand. See *Stamp Duties*. Receipts from general taxation, 1904-5, 120,530,000*l.*

On 16 Aug. 1855, the lines of the allied army at this place were attacked by 50,000 Russians under prince Gortschakoff, who was repulsed with the loss of 329 slain, 1958 wounded, and 600 prisoners. The brunt of the attack was borne by two French regiments under general D'Herbillion. TEETOTALER, a term applied to an abstainer from all fermented liquors, originated with Richard Turner, an artisan of Preston, who, contending for the principle at a temperance meeting about Sept. 1833, asserted "that nothing but *te-tetotal* will do." The word was immediately adopted. He died 27 Oct. 1846. Joseph Livesey, of Preston (an originator of the movement in 1832), died, aged 90, 2 Sept. 1884. TELEGRAPHONE, a development of the telephone and phonograph invented by Mr. Poulsen, a Dane, by which the voice may be directed to any number of points simultaneously, *Nature*, 17 May, 1900; another by Mr. Kumberg, reported, 27 Oct. 1900.

TELEGRAPHS (from the Greek, *tele*, afar, and *grapho*, I write). Æschylus, in his *Agamemnon* (B.C. 500), describes the communication of intelligence by burning torches as signals. Polybius, the Greek historian (who died about 122 B.C.), calls the different instruments used by the ancients for communicating information, *pyrsia*, because the signals were always made by fire. In 1663, a plan was suggested by the marquis of Worcester, and a telegraph was suggested by Dr. Hooke, 1684. M. Amontons is also said to have been the inventor of telegraphs about this period. James II., while duke of York, originated a set of navy signals, which were systematised by Kempenfeldt in 1780; and a dictionary was compiled by sir Home Popham. M. Chappe then invented the telegraph first used by the French in 1792, and two were erected over

the Admiralty-office, London, 1796. The semaphore was erected there 1816. The naval signals by telegraph enabled 400 previously concerted sentences to be transmitted from ship to ship, by varying the combinations of two revolving crosses. Baron Reuter's telegraph agency founded at Aix la Chapelle, 1851. Acts relating to telegraphs were passed in 1863 and 1866. The telegraph act, passed 31 July, 1868, enabled the postmaster-general to purchase existing electric telegraphs (not less than 1*s.* for a telegram, 20 words). Mr. Scudamore was appointed director, Jan. 1872. The principle of a 6*d.* telegram adopted by the commons, 29 March, 1883, and enacted to come into operation 1 Oct. 1883, deferred; bill introduced by Mr. Shaw-Lefevre 30 March; act passed 14 Aug.; came into operation 1 Oct. 1885. Another telegraph act passed 28 June, 1892, and 1899. See *Telephone*. The Society of Telegraph Engineers founded 1871. Present title "Institution of Electrical Engineers." See *Electric Telegraph* and *Wireless Telegraphy*, under *Electricity* and *Telegraphs*, under *Post Office*, 1869 *et seq.* The *Telegraphic Journal* began 15 Nov. 1873.

TELEKOUPHONON, or speaking telegraph, consisted of piping of gutta percha, caoutchouc, glass, or earthenware, with a terminal mouthpiece of ivory, bone, wood, or metal. It was used for dockyards and large establishments. It was described by Mr. Francis Whishaw at the meeting of the British Association at Swansea, August, 1848.

TEL-EL-KEBIR, Egypt, the site of the entrenched camp of the rebel general, Arabi Pasha, his force being about 17,500 regular infantry, 2,500 cavalry, 6,000 Bedouins and other irregulars, and 70 guns; captured by the British 13 Sept. 1882.

Sir Garnet Wolseley broke up his camp at Ismailia on the night of 12 Sept. and began his advance at 1.30 a.m., his force being about 11,000 infantry, 2,000 cavalry, and 40 guns; the troops marched rapidly in the dark. At daybreak they arrived at the camp. The sur-

prised Egyptians filled the trenches and fought well under cover; but when the British scaled the parapets, they at first resisted bravely, but afterwards fled, being hotly pursued by the British cavalry, leaving all their guns, ammunition, &c., in the hands of the victors. Thousands were killed or made prisoners. Arabi Pasha fled towards Cairo. Arabi Pasha's army was completely broken up, and the British entered Cairo the next day, 14 Sept. British killed about 52, and 380 wounded; Egyptian killed and wounded about 1500. The Highlanders bore the brunt of the action.

TELEMETER, &c., an instrument for determining the distance between a gun and the object fired at. Lieut. von Ehrenberg and major Montaudon, in Baden, constructed a telemeter the size of a watch, by which the distance is determined and shown on a dial by the action of sound, 1878-85. *Teletopometer*, another apparatus for ascertaining the distance from point to point, invented by Dr. Luigi Cerebotani, was announced in Sept. 1885; two telescopes are employed.

TEMPLARS. The military order of "soldiers of the Temple," to protect pilgrims, was founded about 1118 by Baldwin II., king of Jerusalem, confirmed by pope Honorius II., 1128. The Templars were numerous in several countries, and came to England before 1185. Their wealth having excited the cupidity of the French kings, the order was suppressed by the council of Vienne, and part of its revenues was bestowed upon other orders about 1312. Numbers of the order were tried, condemned, and burned alive or hanged in 1308-10, and it suffered much persecution throughout Europe; 68 knights were burnt at Paris, 1310. Pope Clement V. abolished the order, April, 1312. The grand master Molay was burnt alive at Paris, 18 March, 1314. Their property in England was given to the Hospitallers, and the head of the order in England died in the Tower. See *Good Templars*.

THAMES EMBANKMENT.

Recommended by sir Christopher Wren, 1666, and by Wm. Paterson, founder of the bank of England, about 1694. The corporation embarked a mile in 1767. It was further recommended by Gwynne, 1767; by sir Frederick Eden, 1798; by sir Frederick Trench, 1824; by James Walker; by the duke of Newcastle, 1844; and by John Martin the painter, 1856. In 1860, the Metropolitan Board of Works recommended that the north bank of the Thames should be embanked, whereby the bed of the river would be improved; a low-level sewer could be easily constructed beneath a broad roadway; docks to be constructed within the embankment wall; the expense to be defrayed by the city duties on coal, and by means provided by government. The principle of this recommendation was approved by parliament, and a committee was appointed, which first sat . . . 30 April, 1861

THAPSUS (N. Africa). Near here Julius Cæsar totally defeated the army of the party which supported the policy of Pompey, Feb. 46 B.C. The suicide of Cato followed soon after.

THEATINES, a religious order, the first who assumed the title of regular clerks, founded by Caraffa, bishop of Theate, or Chieti, in Naples (afterwards pope Paul IV.), 1524, to repress heresy. They first established themselves in France, according to Hénault, in Paris, 1644. The Theatines vainly endeavoured to revive among the clergy the poverty of the apostles.

THEATRE (Greek *theatron*, "a place for seeing"). Greek theatres for the exhibition of the drama and musical performances were gradually developed from the ring in which songs and choruses were performed in honour of Dionysus or Bacchus. Greek theatres are well described and illustrated in Mr. Robert W. Lowe's article *Theatre* in Chambers's Encyclopedia, 1892. The theatre of Dionysus at Athens could contain 30,000 spectators, and that at Megalopolis (*which see*), 44,000. The revival of the drama in the 16th century led to the construction of modern theatres on Greek models such as that at Rome by Bramante, 1580; the *Teatro Olimpico* at Vicenza by Palladio, 1584. See *Amphitheatres*, *Comédie Française*, and *Operas*.

THEATRES IN ENGLAND. The first royal licence for a theatre in England was in 1574, to master Burbage and four others, servants of the earl of Leicester, to act plays at the Globe, Bankside. It is stated the first play-house in London was erected at Shoreditch, and called the "Theatre" in 1576, and that the Curtain near it, was erected in 1577. The Blackfriars was built in 1596. The other London theatres in Elizabeth's reign were Whitefriars, Rose, Hope, Swan, Red Bull, Cockpit

or Phoenix, and several others. Shakespeare and his fellow actors erected the Globe theatre on Bankside, about 1594. The prices of admission are said to have been—gallery, 2d.; lords' rooms, 1s.; see *Drama*, *Drury Lane*, and other theatres. The theatres were closed by parliament, 1642-60.

The apparatus of the "compagnie du theatrophone" of Paris was exhibited at the Savoy hotel, and by its means the performance of the "Nautch Girl" at the Savoy theatre was said to be well heard, 11 Dec. 1891.

THEBAN LEGION, according to tradition, was composed of Christians, and submitted to martyrdom rather than attack their brethren during the persecution of the emperor Maximin, or sacrifice to the gods, about A.D. 286. Their leader Maurice was canonised.

THEBES or LUXOR, in Upper Egypt, called also Diospolis, as being sacred to Jupiter. *Homer*. Its foundation is mythically attributed to Osiris. It is said to have been the magnificent capital of Egypt about 1600 B.C., having a circuit of about 14 geographical miles. It was then the chief seat of the worship of Ammon, or Amun, the Zeus Ammon of the Greeks, and the Jupiter Ammon of the Romans, and hence was called No Ammon by the Hebrews. Thebes was ruined by Cambyzes, king of Persia, 525 B.C., and by the foundation of Alexandria, 336 B.C.; it rebelled and was taken by Ptolemy Lathyrus, 86 B.C., and few traces of it were seen in the age of Juvenal; see *Memnonium*. After centuries of neglect, its wonderful ruins have been greatly visited since the explorations of Belzoni, 1817. — The tombs of Amenophis II. abt. 1500 B.C., XVIII. dynasty, and 7 other royal mummies, discovered by M. Loret in perfect preservation, March, 1898. **THEBES**, N. Greece (the capital is mythically said to have been founded by Cadmus.)

The legendary history of *Œdipus* and his family, celebrated by the Greek tragic poets, belongs to Thebes. It became a republic about 1120 B.C., and flourished under Epaminondas 378-362 B.C. The "sacred band" formed by him, 377 B.C., was revived in 1877. Thebes' seven gates are mentioned by Homer. See *Boeotia and Greece*. Thebes suffered much by earthquake shocks, end of May, 1893, and was nearly destroyed by earthquakes, 20 April *et seq.* 1894: active relief measures were organized.

Funerary temple or mortuary chapel of king Mentu-*tep* III., of the XIth dynasty, 2500 B.C., the oldest temple at Thebes, discovered by M. Edouard Neville and Mr. H. R. Hall working on the site of Deir-el-Bahari, in connection with the excavations of the Egypt Exploration Fund, during the winter season of 1903-4. The temple in an exceptionally good state of preservation, and the best preserved of the few Egyptian temples *in situ* of earlier date than the XVIIIth dynasty, is situated near to the beautiful temple erected by queen Hatshepsu (or Hatusu), of the XVIIIth dynasty. Many results of great importance to the knowledge of Egyptian art and architecture and their development, raised by this discovery (see *Times*, 23 April, 1904). Further excavations; interesting discoveries of sarcophagi, statues, reliefs, &c., made in the temple during the winter of 1904-5.

Discovery by the explorers of the Egypt exploration fund of a shrine of Hathor; life-size statue of the goddess represented in the form of a cow in painted limestone, found in an excellent state of preservation, reported 1 March, 1906.

Discovery of the tomb and mummy of queen Teie, the mother and inspirer of the famous "heretic king" of Egyptology, Amen-hotep IV., by Mr. Theodore M. Davis; for description of the tomb, see *Times*, 8 Feb. 1907.

Mr. Theodore M. Davis, excavating in the Valley of the Tombs of the Kings at Thebes, discovers the jewels of queen Ta-usert; *Times*, 24 Feb. 1908.

THEFT was punished by heavy fines among the Jews; by death at Athens, by the laws of Draco; see *Draco*. The Anglo-Saxons nominally punished theft with death, if above 12*d.* value; but the criminal could redeem his life by a ransom. In the 9th of Henry I. this power of redemption was taken away, 1108. The punishment of theft was very severe in England, till mitigated by Peel's acts 9 & 10 Geo. IV. 1829. The laws respecting theft were consolidated in 1862. Larceny act passed 14 Aug. 1896; another passed, 2 Aug. 1901.

THEINE, see *Cafeine*.

THEISTS (*Theos*, God), a name given to deists about 1660.—Dean Martin. See *Deism*, *Unitarians*, and *Voysey*.

THELLUSSON'S WILL, a most singular document. Mr. Peter Isaac Thellusson, a Genevese and an affluent merchant of London, left 100,000*l.* to his widow and children; and the remainder of his property, more than 600,000*l.*, he left to trustees, to accumulate during the lives of his three sons, and the lives of their sons; then the estates, directed to be purchased with the produce of the accumulated fund, were to be conveyed to the eldest lineal male descendant of his three sons, with the benefit of survivorship. Should no heir then exist, the whole was to be applied, by the agency of the sinking fund, to the discharge of the national debt. It is said that Mr. Thellusson held much property in trust, and that he desired a sufficient interval of time to elapse for the appearance of just claimants. He died 21 July, 1797. His will incurred much public censure, and was contested by the heirs-at-law, but finally established by a decision of the house of lords, 25 June, 1805. The last surviving grandson died in Feb.

1856. A dispute then arose whether the eldest male descendant or the male descendant of the eldest son should inherit the property. The question was decided on appeal by the house of lords (9 June, 1859), in favour of the latter, lord Rendlesham and Charles S. Thellusson confirming the decision of the Master of the Rolls in 1858. In consequence of the legal expenses the property is said not to exceed greatly its value in the testator's lifetime. On 28 July, 1800, the Thellusson act was passed, restraining testators from devising their property for purposes of accumulation for longer than 21 years after death; any other direction to be void.

THEOCRACY, government by God, existed among the Israelites till Saul was made king, about 1095 B.C. (*Sam.* viii. 7.)

"THEOLOGIA GERMANICA," or "Teutsche Theologie" (printed 1528; Latin and French editions, 1558), a German mystical work, written about the 14th century. In it the "good man," disgusted with the corruptions in church and state, is led to seek for God in the temple of the heart. Luther is said to have placed the work next to the Bible and St. Augustine.

THEOLOGY (from the Greek *Theos*, God), the science which treats of the nature and attributes of God, of his relations to man, and of the manner in which they may be discovered. It is generally divided into two heads. 1. *Inspired*, including the Holy Scriptures, their interpretation, &c. 2. *Natural*; which lord Bacon calls the first part of philosophy. Modern tehology has been much influenced by the results of the higher criticism (*which see*).

THEOPHILANTHROPISTS (lovers of God and man), a sect formed in France in 1796; and headed by one of the five directors, Lepaux, in 1797; was dissolved in 1802.

THEOSOPHY (*theos*, God; *sophia*, wisdom) divine wisdom, a name that has been given since the time of Ammonius Saccas, in the third century, to various schools of philosophy and their mystical tenets respecting the spiritual nature of man and his relation to the universe. Followers of Giordano Bruno and Paracelsus, in the 16th century, are termed theosophists.

The *Theosophical Society* was founded in America by Madame Blavatsky, aided by colonel Olcott, about 1875-6. Aims at universal brotherhood, the study of Eastern philosophy, and to investigate unexplained laws of nature and powers latent in man. It has a station in London, and many branches in India, America, and the colonies. Mrs. Anna Kingsford, M.D., president in 1883, died 22 Feb. 1888.

Fahrenheit's thermometer invented about 1726; Reaumur's and Celsius's (the latter now termed centigrade) soon after. [Fahrenheit's scale is usually employed in England, and Reaumur's and the centigrade on the continent.]

The mode of construction by substituting quicksilver for spirits was invented some years subsequently. Hailey proposed it in 1697.

THERMOPYLÆ (Doris, N. Greece). Leonidas, at the head of 300 Spartans and 700 Thespians, at the defile of Thermopylæ, withstood the whole force of the Persians during three days, 7, 8, 9 Aug. 480 B.C., when Ephialtes, a Trachinian, perfidiously leading the enemy by a secret path up the mountains, brought them to the rear of the Greeks, who, thus placed between two assailants, perished gloriously on heaps of their slaughtered foes. One Greek only returned home, and he was received with reproaches for having fled.* Here Antiochus the Great, king of Syria, was defeated by the Romans, 191 B.C.

THESSALY (N. Greece), the seat of many of the adventures described by the poets. The first king of whom we have any certain knowledge was Hellen, son of Deucalion, from whom his subjects were called Hellenists, a name afterwards extended to all Greeks. From Thessaly came the Achæans, the Ætolians, the Dorians, the Hellenes, &c. The two most remarkable events in the early history of this country are the deluge of Deucalion, 1548 B.C., and the expedition of the Argonauts, 1263 B.C.; see them severally. Thessaly long aimed at neutrality in Grecian affairs, but became involved through its rulers, the tyrants of Phære;—Lycophron, about 404 B.C.; his son Jason, 374, assassinated 370; Alexander, the most eminent, defied Athens and Thebes; assassinated 359. Philip of Macedon, after a defeat (353 B.C.), gained a victory over the tyrants, 352; and subjugated the country wholly, 343. The Romans gave a nominal freedom to Thessaly after their victory at Cynoscephalæ, 197. It is now included in the kingdom of Greece by the treaty of 24 May, signed 2 July, and occupied Aug.—Sept. 1881. Railway from Volo to Larissa the capital, opened by the king, 4 May, 1884. * Some Scottish historians make the origin of this order very ancient. The abbot Justinian says it was instituted by Achaius I. of Scotland, 800, when that monarch made an alliance with Charlemagne, and then took for his device the thistle. It is stated that the king Hungus, the Pict, had a dream, in which St. Andrew made a midnight visit, and promised him a sure victory over his foes, the Northumbrians; and that the next day St. Andrew's Cross (X) appeared in the air, and the Northumbrians were defeated. On this story, it is said, Achaius framed the order more than 700 years before James V.

Nicholls, called Thom, or Tom, assumed the name of sir W. Courtenay, knight of Malta and king of Jerusalem, came into Kent, was an unsuccessful candidate for parliament, and incited the rabble against the Poor Law act. On 31 May, 1838, a farmer of the neighbourhood, whose servant had joined the crowd which attended Thom, sent a constable to fetch him back; but on his arrival on the ground he was shot dead by Thom. The military were then called out, and lieut. Bennett proceeded to take the murderer into custody; but Thom advanced, and, firing a pistol, killed the lieutenant on the spot. One of the soldiers fired at Thom, and laid him dead by the side of lieut. Bennett. The people then attacked the military, who were compelled to fire, and eight more persons were killed before the mob dispersed.

THRASHING MACHINES. The flail was the only instrument formerly in use for thrashing corn. The Romans used a machine called the *tribulum*, a sledge loaded with stones or iron, drawn over the corn-sheaves by horses. The first machine attempted in modern times was invented by Michael Menzies, at Edinburgh, about 1732; Andrew Meikle invented a machine in 1776. Many improvements have been since made, and steam is employed. An act for the prevention of accidents by these machines was passed in 1879.

THRASYMENE or **TRASIMENE** (more correctly Trasimenus), a lake (N. Italy). A most bloody engagement took place near the Trasimene lake between the Carthaginians under Hannibal and the Romans under Flaminius, 217 B.C. No less than 15,000 Romans were left dead on the field of battle, and 10,000 taken prisoners; or, according to Livy, 6000; or Polybius, 15,000. The loss of Hannibal was about 1500 men. About 10,000 Romans made their escape, all covered with wounds. Flaminius was killed during the fight.—*Livy*; *Polybius*. On the same day, an earthquake occurred, which desolated several cities in Italy.

THREATENING LETTERS. Sending letters, whether anonymously written, or with a fictitious name, demanding money, or threatening to kill a person, or fire his house, was made punishable as a felony, without benefit of clergy, by the Black Act, in 1722. Persons extorting money by threatening to accuse others of such offences as are subjected to death, or other infamous punishments, were to be adjudged imprisonment, whipping, or transportation, by 30 Geo. II., 1756, and other acts; another, 24 & 25 Vict. c. 96, 97 (1861).

THUMB-SCREW, an instrument used in the first stages of torture by the Spanish inquisition. In Great Britain, rev. Wm. Carstares, a presbyterian minister, was the last who suffered by it, before the Scotch privy council, to make him divulge secrets entrusted to him, which he firmly resisted. After the revolution in 1688, the thumb-screw was presented to him by the council. King William expressed a desire to see it, and tried it on, bidding the doctor to turn the screw; but, at the third turn, he cried out "*Hold—hold! doctor: another turn would make me confess anything.*"

THUNDERING LEGION. During a contest with the invading Marcomanni, the prayers of some Christians in a Roman legion are said to have been followed by a storm of thunder, lightning, and rain, which tended greatly to discomfit the enemy; and hence the legion received the name, 174.

Posidonius of Apamea accounted for the tides from the motion of the moon, about 79 B.C.; and Caesar speaks of them in his fourth book of the Gallic war. The theory of the tides was first satisfactorily explained by Kepler, 1598; but the honour of a complete explanation of them was reserved for sir Isaac Newton, about 1683. Sir Wm. Thomson, at the Royal Institution, 9 April, 1875, described a valuable tide-calculating machine.

On 1 Jan. 1788, the paper was named the *Times*. It is asserted that the *Times* was termed the "Thunderer" in consequence of an article by Edward Sterling in which are the words, "We thundered forth articles on reform, &c." when Barnes was editor.

TIN. The Phœnicians traded with England for more than 1100 years before the Christian era. Under the Saxons, our tin mines appear to have been neglected; but under the Normans, they produced considerable revenues to the earls of Cornwall, particularly to Richard, brother of Henry III. A charter and various immunities were granted by Edmund, earl Richard's brother, who framed the Stannary Laws (*which see*), laying a duty on the tin. Edward III. confirmed the tinnerns in their privileges, and erected Cornwall into a dukedom, with which he invested his son, Edward the Black Prince, 1337. Since that time the heirs-apparent to the crown of England, if eldest sons, have enjoyed it successively. Tin mines were discovered in Germany, which lessened the value of those in England, till then the only tin mines in Europe, 1240.—*Anderson*. England and Normandy were reunited under Henry, at the decease of William Rufus, who had already possessed himself of Normandy by a mortgage from his brother Robert, at his setting out for Palestine. Robert, on his return, recovered Normandy by an accommodation with Henry; but having afterwards quarrelled, Robert was defeated in the battle of Tinchebray, 28 Sept. 1106, and Normandy was annexed to the crown of England.—*Hénault*.

As Byzantine remains are also found some of his conclusions are disputed by eminent antiquaries.

TITHES, or **TENTHS**, were commanded to be given to the tribe of Levi, 1490 B.C. (*Lev. xxvii. 30*). Abraham returning from his victory over the kings (*Gen. xiv.*), gave tithes of the spoil to Melchisedek, king of Salem, priest of the most high God (1913 B.C.); the first recorded instance of the payment of tithes. The next precedent in order of time is Jacob's vow at Bethel (*Gen. xxviii. 22*). In the early age of the Christian church they were given purely as alms, and were voluntary. The moral and religious duty of paying tithes was recognized and had become the custom of the church at the end of the 4th cent. Enjoined by the councils of Tours, 567; Rouen, 650; and subsequently. Legal sanction to ecclesiastical customs by legislation of Charlemagne, 779 and 787, and payment of tithes enforced by legal penalties; abolished in France at the Revolution, 1789. Tenths were confirmed in the Lateran councils, 1215.—*Rainaldus*. The payment of tithes appears to have been claimed by Augustin, the first archbishop of Canterbury, and to have been allowed by Ethelbert, king of Kent, under the term "God's fee," about 600.

The first mention of them in any English written law is a constitutional decree made in a synod strongly enjoining tithes, 786.

Laws of king Edgar attach a legal punishment to the neglect of the customary and religious duty of paying tithes, and provide means for their enforcement by temporal penalties, 970.

In England, in 1545, tithes were fixed at the rate of 2*s.* 9*d.* in the pound on rent; since then, many acts have been passed respecting them.

TITLES TO LAND CONSOLIDATION ACT (Scotland), passed 31 July, 1868, and amended in 1869.

TOBACCO, *Nicotiana tabacum*, received its name from Tabacco, a province of Yucatan, New Spain; some say from the island of Tobago, one of the Caribbees; others from Tobasco, in the Gulf of Florida. It is said to have been first observed at St. Domingo, in Cuba, 1492; and to have been used freely by the Spaniards in Yucatan in 1520. Tobacco was either first brought to England in 1565, by sir John Hawkins; or by sir Walter Raleigh and sir Francis Drake, in 1586. It was manufactured only for exportation for some years. *Stow's Chron.* The Pied Bull inn, at Islington, is said to have been the first house in England where tobacco was smoked. In 1584 a proclamation was issued against it. James I. published "A Counter-blaste against Tobacco," and the star-chamber ordered the duties to be 6s. 10d. per pound, 1614. Its cultivation was prohibited in England by Charles II., 1684. Act laying a duty on the importation was passed 1684. The cultivation was allowed in Ireland, 1779. The tax was increased and put under the excise, 1789. *Anderson*; *Ashe*. Various statutes have passed relative to tobacco. 1883, 56,475,199 lbs., and 3,121,174 lbs. manufactured; in 1890, 65,729,970 lbs.; and 3,678,846 lbs. manufactured; 1900, 98,348,500 lbs. and 6,362,140 lbs. manufactured; 1904, 106,670,040 lbs. and 4,326,324 lbs. manufactured; 1906, 115,526,329 lbs. and 3,802,878 lbs. manufactured; 1908, 119,035,723 lbs. and 3,620,973 lbs. manufactured. The toleration granted was somewhat limited. It exempted persons who took the new oath of allegiance and supremacy, and made also a declaration against popery, from the penalties incurred by absenting themselves from church and holding unlawful conventicles; and it allowed the quakers to substitute an affirmation for an oath, but did not relax the provisions of the Test act (*which see*). The party spirit of the times checked the king in his liberal measures.

TOLLS were first paid by vessels passing the Stade on the Elbe, 1109. They were first demanded by the Danes of vessels passing the Sound, 1341; see *Stade and Sound*. *Tollbars* in England originated in 1267, on the grant of a penny for every waggon that passed through a certain manor; and the first regular toll was collected a few years after for mending the road in London between St. Giles's and Temple-bar. Gathered for repairing the highways of Holborn-inn-lane and Martin's-lane (now Aldersgate-street), 1346. Toll-gate or *turnpikes* were set up in 1663. TONTINES, loans given for life annuities with benefit of survivorship, invented by Laurence Tonti, a Neapolitan. They were first set on foot at Paris to reconcile the people to cardinal Mazarin's government, by amusing them with the hope of becoming suddenly rich, 1653. *Voltaire*. Tonti died in the Bastille after seven years' imprisonment. Three Irish tontines in 1773-77 had 3,500 members; the last public tontine in England was in 1789. New York tontine association, founded 1790, was wound up 1870-78. A Mr. Jennings was an original subscriber for a 100*l.* share in a tontine company; and being the last survivor of the shareholders, his share produced him 3000*l.* per annum. He died aged 103 years, 19 June, 1798, worth 2,115,244*l.*; see *Alexandra Park*.

By the termination of a tontine begun by M. Lafarges in 1791 to diminish the national debt the French government received 1,218,000 francs Dec. 1888.

TOOLS. Many of the tools in common use are described and represented in Rosellini's magnificent work, "*Monumenti dell' Egitto e della Nubia*," 1832-44. The tools used by Bezaleel and Aholiab in the construction of the tabernacle, described in Exodus xxxi. and xxxv. B.C. (1491), were doubtless Egyptian or Phœnician. In building Solomon's temple (1014-04) B.C., "there was neither hammer nor axe nor any tool of iron heard," the stone and other materials being previously prepared (1 Kings vi. 7). The invention of many tools is mythically ascribed to Dædalus, the Athenian artificer in the 14th century B.C. The multiplement invented by lord Wemyss combines many tools in a small compass, April, 1902.

TORBANEHILL MINERAL. Mr. Gillespie, of Torbanehill, granted a lease of all the coal in the estate to Messrs. Russell. In the course of working, the lessees extracted a combustible mineral of considerable value as a source of coal-gas, and realised a large profit in the sale of it as gas-coal. The lessor then denied that the mineral was coal, and disputed the right of the lessees to work it. At the trial in 1853 there was a great array of scientific men and practical gas engineers, and the evidence was most conflicting. One side maintained the mineral to be coal, the other that it was a bituminous schist. The judge set aside the scientific evidence, and the jury pronounced it to be coal. The authorities in Prussia have since pronounced it *not* to be coal. *Percy*.

The action of Fulton's torpedoes was successful in Britain 1805; but their use was declined by the government. Torpedo shells ignited by electricity were successfully employed in the war in the United States, 1861-5. On 4 Oct. 1865, Messrs. M'Kay & Beardslee tried them at Chatham before the duke of Somerset and others. An old vessel, the *Terpsichore*, was speedily sunk. Torpedoes, made by professor (aft. sir Frederick) Abel, of Woolwich, were tried in May, 1866. A torpedo invented by Mr. Wightman and an Austrian, tried and reported successful at Sheerness; an old hulk was sunk, 8 Oct. 1870. Charter granted to Torquay, Aug. 1892.
Mr. Wm. Pengelly, founder of the Torquay Natural History society and of the Devonshire association for the advancement of science, literature, and art in 1862, died, aged 82, 16 March, 1894.

TORRES STRAIT, dividing Australia from Papua or New Guinea, was discovered by Torres, a Spaniard, in June, 1606. Anthropological expedition from Cambridge, conducted by Dr. A. Haddon, arrived at Murray island, and was heartily welcomed by the natives, mid May-Dec. 1893.

TORRES VEDRAS (a city of Portugal). Near here Wellington, retreating from the French, took up a strong position, called the *Lines of Torres Vedras*, 10 Oct. 1810.

TORTOLA, see *Virgin Isles*.

TORTURE was only permitted by the Romans in the examination of slaves. It was applied to heretics by the Roman catholic clergy, and was used in England so late as 1640 (when Archer,

who took part in an attack on Laud's palace, was racked), and in Scotland until 1690. The trial by torture was abolished in Portugal, 1776; in France, by Louis XVI., in 1789; and in Sweden by Gustavus III., 1786. General Picton was convicted of allowing Louisa Calderon to be tortured in Trinidad, in accordance with the old law of the island, at his trials, 21 Feb. 1806, and 11 June, 1808.

TOSKI, battle of, see *Soudan*, 3 Aug. 1889.

TOTNES (Devon): thought to be the Roman *Ad Durium Ammen*. It was held by Judhael de Totneis, who built the castle about 1085. It was disfranchised for gross corruption and bribery, by the Reform act, 15 Aug. 1867.

TOTTENHAM OUTRAGE. See *Alicons*, 23 Jan. 1909.

TOUL, the Roman *Tulli Leucorum*, a fortified town on the Moselle, N.E. France, one of the most ancient in the empire. The city and diocese acquired great privileges from Charles the Simple, 925, when it was united with the German empire. It was reunited with France, 1552. The fortifications, begun in 1238, were rebuilt and enlarged in 1700, according to the plans of Vauban. After a vigorous resistance to the Germans, commencing 14 Aug. 1870, Toul surrendered with its garrison of 3000 men, 23 Sept., when the town was burning in twenty-three places. The Germans thus acquired an uninterrupted railway communication to Paris.

TOULON, the ancient *Telo Martius* (S. France), an important military port. It was taken by the constable of Bourbon, 1524, and by the emperor Charles V. in 1536. In 1707 it was bombarded by the allies, both by land and sea, by which almost the whole town was reduced to a heap of ruins, and several ships burned; but the allies were at last obliged to raise the siege. It surrendered 27 Aug. 1793, to the British admiral, lord Hood, who took possession both of the town and shipping, in the name of Louis XVII., under a stipulation to assist in restoring the French constitution of 1789. A conflict took place between the English and French forces, when the latter were repulsed, 15 Nov. 1793. Toulon was retaken by Bonaparte, 19 Dec., when great cruelties were exercised towards such of the inhabitants as were supposed to be favourable to the British.—A naval battle off this port was fought 11 Feb. 1744, between the English under Mathews and Lestock, against the fleets of France and Spain: in this engagement the brave captain Cornwall fell. The victory was lost by a misunderstanding between the English admirals. Mathews was afterwards dismissed for misconduct. Population in 1901, 101,172; 1906, 103,550. See *Cholera*, 1884.

TOULOUSE, the ancient *TOLOSA* (S. France), founded about 615 B.C.; was the capital of the Visigothic kings in A.D. 419; and was taken by Clovis in 508. The dukes of Aquitaine reigned here, 631-761. A university was established here, 1229, and a parliament, 1302. The inquisition was established here to extirpate heretics, 1229. The troubadours, or rhetoricians of Toulouse, had their origin about 850, and consisted of a fraternity of

poets, whose art was extended throughout Europe, and gave rise to the Italian and French poetry; see *Troubadours*. The allied British and Spanish army entered this city on 12 April, immediately after the **BATTLE OF TOULOUSE**, fought between the British Peninsular army under lord Wellington, and the French led by marshal Soult, 10 April, 1814. The French were forced to retreat, after twelve hours' fighting. Neither of the commanders knew that Napoleon had abdicated the throne of France. Population, 1886, 147,617; 1901, 147,696; 1910 (est.), 152,000.

TOULOUSE. The county was created out of the kingdom of Aquitaine by Charlemagne, in 778. It enjoyed great prosperity till the dreadful war of the Albigenses (*which see*), when the count Raymond VI. was expelled, and Simor de Montfort became count. At his death, in 1218, Raymond VII. obtained his inheritance. His daughter Jane and her husband, Alphonse (brother of Louis IX. of France), dying without issue, the county of Toulouse was united to the French monarchy in 1271. A large part of Toulouse destroyed by an inundation of the Garonne; St. Cyprien like a sepulchre; 23 June, 1875.

TOURAINE, the garden of France, was conquered by the Visigoths about 480. It was ceded to Geoffroy count of Anjou, 1044, and thus became the property of the Plantagenet kings of England. It was seized by Philip Augustus in 1203, and was made a duchy by John, 1360. It was finally united to the crown on the death of the duke of Anjou, 1584.

TOURNAMENTS, or **JOUSTS**, were martial sports of the ancient cavaliers. Tournament is derived from the French word *tourner*, "to turn round." Tournaments were frequent about 890; and were regulated by the emperor Henry I., about 919. Tournaments were introduced into England early in the 12th century; prohibited by Henry II., but revived by Richard I., his son. Solemn tournaments were held by Edward III., 25 Sept. 1329, in London; and 19 Jan. 1344, at Windsor; and by Richard II. in Smithfield, London, 10 Oct. 1319; and also by Henry VIII., in May 1513. The Lateran council published an article against their continuance in 1136. Henry II. of France, in a tilt with the comte de Montgomery, had his eye struck out, an accident which caused the king's death in a few days, 29 June, 1559. Tournaments were then abolished in France.—A magnificent feast and tournament, under the auspices of Archibald, earl of Eglintoun, took place at Eglintoun castle, 29 Aug. 1839, and the following week: many of the visitors (among whom was the late emperor of the French) assumed the characters of ancient knights, lady Seymour, aft. duchess of Somerset, being the "Queen of beauty." She died 14 Dec. 1884. Among the festivities at the marriage of prince Humbert, at Turin, was a tournament, 24 April, 1868. Tournaments held at the Agricultural hall, London, N. (for benefit of soldiers' widows, &c.), 21 June et seq. 1880. In Oct. 1883, these tournaments were organized as "Royal Military Tournaments" for development of skill in arms in the army, and are held annually, now under the title "Royal Naval and Military Tournament."

TOURNAY (S. Belgium) was very flourishing till it was ravaged by the barbarians in the 5th century. It has sustained many sieges. Taken by the allies in 1709, and ceded to the house of Austria by the treaty of Utrecht; but the Dutch were

allowed to place a garrison in it, as one of the barrier towns. It was taken by the French under general La Bourdonnaye, 8 Nov. 1792. Several battles were fought near Tournay in May, 1793, and May, 1794. Population, 1890, 35,403; 1900, 37,069; 1908, 37,640.

TOURNIQUET (from *tourner*, to turn), an instrument for stopping the flow of blood into a limb, by tightening the bandage employed in amputations, is said to have been invented by Morel at the siege of Besançon, 1674. J. L. Petit, in France, invented the screw tourniquet in 1718.

TOURS, an ancient city, central France, near which Charles Martel gained a great victory over the Saracens, and saved Europe, 10 Oct. 732, and from which he acquired the name of *Martel*, signifying *hammer*. This conflict is also called the battle of Poitiers. When Paris was invested by the Germans, M. Crémieux and several of the members of the French government of defence went to Tours, together with the representatives of foreign powers, 18 Sept. 1870. On 9 Oct. these were joined by Gambetta, minister of the interior, afterwards of war (who escaped from Paris by a balloon, 7 Oct.). In consequence of the defeat of the army of the Loire near Orleans, the government removed to Bordeaux, 11 Dec.

TOWER OF LONDON. The tradition that Julius Cæsar founded a citadel here (about 54 B.C.) is very doubtful. A royal palace, consisting of no more than what is now called the White Tower, which appears to have been first marked out by William the Conqueror, 1076, was commenced in 1078, and completed by his son, William Rufus, who, in 1098, surrounded it with walls and a broad deep ditch. Several succeeding princes made additions to it, and king Edward III. built the church. In 1638, the old White Tower was rebuilt; and under king Charles II. it was thoroughly repaired, 1680-5, and a great number of additional buildings made to it. Here are the Armoury, Jewel-office, and various other divisions and buildings of peculiar interest. Here took place many executions of illustrious persons, and many murders (king Henry VI., 1471; king Edward V. and his brother, 1485; sir Thomas Overbury, 1613). The armoury and 280,000 stand of arms, &c., were destroyed by fire, 30 Oct. 1841. The "New Buildings" in the Tower were completed in 1850. See *Blood*; for *Tower-Subways*, see *Thames*. Constable of the Tower, gen. sir Frederick C. Stephenson, appointed 2 March, 1898.

The menagerie, long here, was removed to the Zoological Gardens, 1831; the state papers were removed to the Record Office, 1857.

Opened free to the public (Mondays and Saturdays) from 3 April, 1875.

Lanthorne Tower rebuilt and other restorations, 1884-5.

The White Tower and other parts greatly damaged by an explosion of dynamite; about 16 visitors seriously hurt, about 2 p.m. 24 Jan. John Gilbert Cunningham and Harry Burton apprehended, 24 Jan.; committed for trial, 27 March, 1885. See *Trials*.

Tower Bridge act passed, 14 Aug. 1885; foundation of the bridge laid by the prince of Wales, 21 June, 1886. The work practically completed, 27 March, 1894.

The bridge is a compound suspension and bascule bridge of three spans, of which the centre opening is fitted with a bascule or drawbridge; Mr. J. Wolfe Barry, engineer, K.C.B., 1897; the bridge opened by the prince and princess of Wales; a procession of vessels passed under the bridge, 30 June, 1894.

Opened to the public, 9 July, 1894, *et seq.*
Cost of bridge and approaches, reported to be nearly 1,000,000*l.*

TOWERS. That of Babel, the first of which we read, built in the plains of Shinar (*Gen. xi.*) 2247 B.C.; see *Babel*. The Tower of the Winds at Athens, built 550 B.C. The Tower of Pharos (see *Pharos*), 280 B.C. The *round towers* in Ireland were the only structures of stone found at the arrival of the English, 1169, except some buildings in the maritime towns founded by the Danes. These towers are tall hollow pillars, nearly cylindrical, but narrowing towards the top, pierced with lateral holes to admit the light, and covered with conical roofs. Fifty-six of them still remain, from 50 to 130 feet high; see *Pisa*.

TOWN HOLDINGS in Great Britain and Ireland. A committee appointed in 1886-9 (Mr. Lewis Fry, sir H. James, sir Wm. Marriott, and others), to enquire into terms of occupation, facilities for purchase by tenants, rating, improvements, &c. The report issued 13 July, 1889, was stated to be a compromise.

Report of the committee, dealing with questions relating to local taxation, the liability of ground rents, &c., published . . . 20 May, 1892

TOWNLEY MARBLES, in the British Museum, were purchased in 1805 and 1814.

TOWTON (Yorkshire), where a sanguinary battle was fought, 29 March, 1461, between the houses of York (Edward IV.) and Lancaster (Henry VI.), to the latter of whom it was fatal, and on whose side more than 37,000 fell. Edward issued orders to give no quarter, and the most merciless slaughter ensued. Henry and his queen, Margaret, fled to Scotland; and Edward IV. was settled on the throne.

TOXOPHILITES (from *toxos*, a bow, and *philos*, a lover), a society established by sir Aston Lever in 1781. The Toxophilites formed a division of the Artillery Company about 1784-1803. In 1834 they took grounds in the inner circle of Regent's-park, and built the archery lodge. They possess a very curious piece of plate, given by Catherine, queen of Charles II., to be shot for by the Finsbury archers, of whom the Toxophilites are the representatives.

TOYNBEE HALL, see under *University Teaching*.

TRACTARIANISM, a term applied to certain opinions on church matters propounded in the "Tracts for the Times," of which ninety numbers were published, 1833-41. The principal writers were the revs. Dr. E. Pusey, J. H. Newman, J. Keble, J. Froude, and I. Williams—all of the university of Oxford; see *Puseyism*. The tracts (specially No. 90, ascribed to rev. J. H. Newman) were condemned by the authorities at Oxford, 15 March, 1841.

TRACTION-ENGINES were used on common roads in London in 1860, but afterwards restricted. In Aug. 1862, one of Bray's traction-engines conveyed through the city a mass of iron which would have required 29 horses; see *Road-steamers and Railways*.

TRACT SOCIETIES. The Society for Promoting Christian Knowledge was founded in 1698; the Religious Tract Society, London, in 1799.

TRADE OF GREAT BRITAIN, see *Exports and Imports*. In 1861 the value of the two amounted to 377,017,522*l.*; in 1871 to 614,590,180*l.*; in 1881, 694,105,264*l.*; 1885, 642,442,203*l.*; 1890,

New extension of Blackfriars bridge and L.C.C. tramways service opened 14 Sept. 1909.

TRANQUEBAR (East Indies), the Danish settlement here, founded in 1618, was purchased by the English in 1845.

TRANSCASPIAN RAILWAY, see under *Railways*, 1888.

TRANSFIGURATION. The change of Christ's appearance on Mount Tabor, in the presence of Peter, James, and John, A.D. 32 (*Matt.* xvii.). The feast of the Transfiguration, kept on 6 Aug., was instituted in the East before 700, and seems to have been observed in the West as early as 450. Pope Calixtus III. in 1456 issued a bull making it a "feast of obligation" to be generally observed in honour of the defeat of the Turks at Belgrade in that year.

TRANSFORMATION PRINTS. A method of printing one picture over another, the former being easily effaced, patented by Mr. Andrew Reid of Newcastle-on-Tyne, and others, 1885.

TRANSIT, see *Mercury* and *Venus*.

TRANSLATION TO HEAVEN. The translation of Enoch to heaven at the age of 365 years (*Gen.* v. 24). The prophet Elijah was translated to heaven in a chariot of fire (2 *Kings* ii. 11).—The possibility of translation to the abode of eternal life has been maintained by some extravagant enthusiasts. The Irish house of commons expelled Mr. Asgill from his seat, for his book asserting the possibility of translation to the other world without death, 1703.

TRANSPADANE REPUBLIC, comprising Lombardy and part of the Venetian territories, was established by Bonaparte after his victory at Lodi, 10 May, 1796. With the Cispadane republic, it merged into the Cisalpine republic, Oct. 1797.

TRANSPORTATION, see *Banishment*. Judges were given the power of sentencing offenders to transportation "into any of his majesty's dominions in North America," by 18 Charles II. c. 3 (1666), and by 4 Geo. I. c. 11 (1718). Transportation ceased in 1775, but was revived in 1786. The reception of convicts was successfully refused by the Cape of Good Hope (in 1849) and by the Australian colonies (1864). Transportation, even to West Australia, where labour is wanted, ceased after a few years, through the fierce opposition of the eastern colonies. In consequence of the difficulty then experienced in transporting felons, 16 & 17 Vict. c. 99 was passed to provide other punishment, namely, penal servitude, empowering the queen to grant pardon to offenders under certain conditions, and licences to others to be at large: such licences being liable to be revoked if necessary; and many have been. These licences are termed "tickets of leave." The system is said to have originated in Australia under the superintendence

of Captain Maconochie. It was much assailed in Oct. and Nov. 1862, on account of violent crimes being traced to *ticket-of-leavers*; and was modified by the Penal Servitude Act, 1864; and the Prevention of Crimes Acts, 1871 and 1879. See *Crime*.

John Eyre, esq., a man of fortune, was sentenced to transportation for stealing a few quires of paper. —*Phillips* 1 Nov. 1771

The Rev. Dr. Halloran, tutor to the earl of Chesterfield, was transported for forging a frank (*10d.* postage) 9 Sept. 1818

The first transportation of felons to Botany Bay was in May, 1787; where governor Phillip arrived with about 800 on 20 Jan. 1788; convicts were afterwards sent to Van Diemen's Land, Norfolk Island, &c.

Transportation superseded by penal servitude 1853
Returning from transportation was punishable with death until 5 Will. IV. c. 67, Aug. 1834, when an act was passed making the offence punishable by transportation for life.

A shipment of convicts to West Australia (which had already received 10,000) in 1867.

TRANSUBSTANTIATION, the doctrine of the "real presence." That the bread and wine in the Eucharist are changed into the very flesh and blood of Christ by the consecration, was broached in the days of Gregory III. (731), and accepted by Amalarius and Radbertus (about 830), but rejected by Rabanus Maurus, Johannes Scotus Erigena, Berengarius, Wycliffe, and others. In the Lateran council, held at Rome by Innocent III., the word "Transubstantiation" was used to express this doctrine, which was decreed to be incontrovertible; and all who opposed it were condemned as heretics. This was confirmed by the council of Trent, 18 Jan. 1562. John Huss, Jerome of Prague, and other martyrs of the reformation, suffered for denying this dogma, which is renounced by the church of England (28th article), and by all protestant dissenters. The declaration against transubstantiation, invocation of the saints, and the sacrifice of the mass, on taking any civil office, was abolished by an act passed 25 July, 1867; see *Sacrament*.

Luther maintained the doctrine of *con-substantiation*, viz. that after consecration the body and blood of Christ are substantially present in the bread and wine. He was opposed by Bucer, Carlistadt, Zwingle, and others (termed sacramentarians), who asserted that the Lord's supper is only a commemorative rite.

TRANSVAAL. A British colony. Formerly the Transvaal republic, renamed South African Republic in 1883, founded by Dutch Boers (farmers) in 1848, after several years' severe conflict with the natives. Its independence was declared 17 Jan. 1852, S. J. P. Krüger elected president 7 May, 1853; and its constitution proclaimed 13 Feb. 1858; capital Pretoria, population, 1904, 36,700 (21,161 whites); chief town, Johannesburg, the centre of the Witwatersrand goldfields; population, 1904, 158,580 (83,902 whites). President for four years, T. F. Burgers, 27 May, 1872. Population about 38,000 Boers, 5000 English settlers, 770,000 blacks (1881); 1904 (census), 1,268,716 (299,327 whites, 945,498 Kaffirs, 23,891 other natives); 1910 (est.), 1,481,000. The republic was annexed to Great Britain, 1 Sept., and styled **TRANSVAAL COLONY**, 25 Oct. 1900. See *below* and *South African War*. TRANSYLVANIA, an Austrian province, was part of the ancient Dacia (*which see*). In 1526, John Zapoly rendered himself independent of the emperor Ferdinand I. by the aid of the Turks. His successors ruled with much difficulty till Jan. 1699, when the emperor Leopold I., by the treaty of Carlowitz, finally incorporated Transylvania into the Austrian dominions. The Transylvanian deputies did not take their seat in the Austrian parliament till 20 Oct. 1863. A decree for the convocation of the Transylvanian diet was issued

12 Sept. 1865. The inhabitants are about 1,100,000 ignorant Roumans, 1,500,000 Saxon colonists, and 550,000 Magyars, the last being the ruling class. The union of Transylvania with Hungary in 1848, which caused much discontent, was ratified by the Transylvanian diet, 25 Dec. 1866.

TRAPPISTS. The first abbey of La Trappe in Normandy was founded, in 1140, by Rotrou, comte de Perche. The present order of Trappists owes its origin to the learned Jean le Bouthillier de la Rancé (editor of *Anacreon* when aged 14), who renounced the world, and sold all his property, giving the proceeds to the abbey of La Trappe, to which he retired in 1662, to live there in great austerity. After several efforts he succeeded in reforming the monks, and in establishing a new rule, which commands silence, prayer, reading, and manual labour, and which forbids study, wine, fish, &c. Rancé was born in 1620, and died in 1700.

A number of these monks, driven from France in the revolution of 1790, were received by Mr. Weld, of Lulworth, Dorsetshire, who gave them some land to cultivate and a habitation, where they remained till 1815. This order was charged with rebellion and conspiracy in France, and sixty-four English and Irish Trappists were shipped by the French government at Paimbœuf, 19 Nov., and were landed from the *Hebé*, French frigate, at Cork, 30 Nov. 1831. They established themselves at Mount Melleray, county of Waterford.

TRASIMENE, see *Thrasymene*.

TRAUTENAU (Bohemia). On 27 June, 1866, the first corps of the army of the crown-prince of Prussia seized Trautenau, but was defeated and repulsed by the Austrians under Gablenz; on the 28th, the Prussians defeated the Austrians with great loss.

TRAVELLERS' CLUB (Pall-mall), established in 1815. A member must have "travelled out of the British islands to a distance of at least 500 miles from London, in a direct line."

TRAVELLING IN ENGLAND. In 1707 it took in summer one day, in winter nearly two days, to travel from London to Oxford (55 miles). In 1817 the journey was accomplished in six or seven hours. By the Great Western Railway express (63 miles) it is done in just over 1 hour. In 1828, a gentleman travelled from Newcastle to London (273 miles) inside the best coach in 35 hours, at an expense of 6*l.* 15*s.* 3*d.* or 6*d.* per mile (including dinner, &c.). In 1857, the charge of the Great Northern railway (275½ miles) first-class express (6 hours) was 50*s.* 9*d.*; in 1910, 38*s.* 3*d.*

No fixed charge is made by the majority of railway companies for the hire of special trains. The general charges are *gs.* per mile, plus the ordinary fare for each passenger according to class.

TRAWLING. Deep-sea fishing with a boat (either sail or steam) having a very large net attached to it, and thereby catching the fish which mostly live at the bottom of the sea; principally practised on the N.E. coast of Britain.

Commissions reported in 1864 and since, that trawling was not injurious to the supply of fish as suggested; but another commission, with scientific advice, reported in Feb. 1885, that there was some ground for the fishermen's complaints.

TREAD-MILL, an invention of the Chinese, to raise water for the irrigation of the fields. The complicated tread-mill introduced into the prisons of Great Britain is the invention of Mr. (afterwards sir William) Cubitt, of Ipswich. It was erected at Brixton gaol, 1817, and soon afterwards in other large prisons. Towards the end of the last century it fell into disuse and very few were in existence in 1905.

TREASON, see *High Treason*. **PETTY TREASON** (a term abolished in 1828, defined by the statute of 25 Edw. III. 1352) was a wife's murder of her husband; a servant's murder of his master; and an ecclesiastical person's murder of his prelate or other superior. *Misprision* of treason, knowledge and concealment of the crime, punishable with forfeiture of goods and imprisonment for life.

TREASON-FELONY. By the Crown and Government Security Act, 11 Vict. c. 12 (1848), certain treasons heretofore punishable with death were mitigated to felonies, and subjected to transportation or imprisonment. The Fenians in Ireland were tried under this act; see *Trials*, 1865.

TREASURER OF ENGLAND, LORD HIGH, the third great officer of the crown, a lord by virtue of his office, having the custody of the king's treasure, governing the upper court of exchequer, and formerly sitting judicially among the barons. The first lord high treasurer in England was Odo, earl of Kent, in the reign of William I. This great trust is now confided to a commission, and is vested in five persons, called "lords commissioners for executing the office of lord high treasurer," and of these the chancellor of the exchequer is usually one; the first lord being usually the premier; see *Administrations*, for a succession of these officers. Sir Stafford Northcote (aft. Earl of Iddesleigh) was first lord of the treasury and not premier, 24 June, 1885; see *Salisbury Administrations*.

The first of this rank in IRELAND was John de St. John Henry III. 1217; the last, William, duke of Devonshire, 1766; vice-treasurers were appointed till 1789; then commissioners till 1826, when the revenues of Great Britain and Ireland were united.

The first lord high treasurer of SCOTLAND was sir Walter Ogilvie, appointed by James I. in 1420; the last, in 1641, John, earl of Traquair, afterwards commissioners were appointed.

TREASURER OF THE CHAMBER, formerly an officer of great consideration, and always a member of the privy council. He discharged the bills of all the king's tradesmen, and had his office in Cleveland-row, in the vicinity of the royal palace. His duties were transferred and the office suppressed at the same time with the offices of master of the great wardrobe and cofferer of the household in 1782. *Beaton*.

TREATIES. A formal and written treaty made in England with any foreign nation was entered into at Kingston between Henry III. and the dauphin of France (then in England and

leagued with the barons), 11 Sept. 1217. The first commercial treaty was with Guy, earl of Flanders, 2 Edw. 1274; the second with Portugal and Spain, 1308. *Anderson*. The chief treaties of the nations

TRENT (the ancient Tridentum), in the Tyrol, belongs to Austria. The council held here is reckoned in the Roman catholic church as the 18th general council. Its decisions have been implicitly received as the standard of faith, morals, and discipline in that church. It first sat 13 Dec. 1545, and continued (with interruptions) under pope Paul III., Julius III., and Pius IV. to 4 Dec. 1563; its last sitting (the 25th). A jubilee in relation to this council was celebrated in June, 1863. Trent was

Several times taken during the French war. Population, about 22,000.

At the council was decreed, with anathemas: the canon of scripture (including the apocrypha), and the church its sole interpreter; the traditions to be equal with scripture; the seven sacraments (baptism, confirmation, the Lord's supper, penance, extreme unction, orders, and matrimony); transubstantiation; purgatory; indulgences; celibacy of the clergy; auricular confession. &c.

TRÈVES, or **TRIER**, the Roman Treviri, in Rhenish Prussia, was a prosperous city of the Gauls, 2 B.C. The emperor Gallienus held his court here A.D. 255. The church of St. Simeon dates from the 4th century. Trèves was made an electorate in the 14th century, and became subject to the archbishop in 1585. Councils held here, 385-1423. The archbishopric is said to have been founded before the 7th century and to be the oldest in Germany. After various changes, Trèves was acquired by Prussia, June 1815. In 1844 much excitement was occasioned by miracles said to have been wrought by a "Holy Coat" in the cathedral. The coat was exhibited to thousands, Aug., Sept. 1891. Population, 1890, 36,162; 1900, 43,324; 1910 (est.), 45,000.

TRIAL AT BAR, signifies by the whole court for a plurality of judges. This plan was adopted at Bristol after the riots in 1832; also at O'Connell's trial, 1844; and arranged for the trial of the claimant of the Tichborne estates for perjury, in April, 1873. See *Juries*.

TRIALS. Regulations for conducting trials were made by Lothaire and Edric, kings of Kent, about 673 to 680. Alfred the Great is said to have begun trial by jury; but there is good evidence of such trials before his time. Arrangements were made for more speedy trials by "the Winter Assizes Act," 1876. See *Appeal*.

BECK CASE.—A man calling himself John Smith was convicted in 1877 at the Old Bailey for defrauding women of money or jewellery, perpetrating these frauds under the name of lord Willoughby. Smith was sentenced to 5 years' penal servitude, and released on licence, April, 1881. Complaints were made to the police by women that they had been defrauded in a similar manner by a man styling himself lord Wilton, or lord Winton, de Willoughby, and representing that he had an establishment at St. John's-wood. Otilie Meissonier, a woman who had been defrauded, Nov. 1895, chanced to meet Mr. Adolf Beck, a Norwegian, in Victoria-street, 16 Dec., and charged him with having robbed her, and Mr. Beck, who denied the accusation, was charged. Some of the women who had been victimised affirmed that Mr. Beck was the man who had defrauded them, and gave evidence to that effect before Mr. Shiel, magistrate at Westminster police court. The case being reported a gentleman who had been interested in the original charge against Smith informed the police that Mr. Beck was doubtless the ex-convict Smith, and an ex-policeman, Spurrell, swore positively that Mr. Beck *was* Smith; his opinion was confirmed by another policeman who had been connected in the original case. In March, 1896, Mr. Beck was tried at the Old Bailey before sir Forrest Fulton, and on conviction sentenced to 7 years' penal servitude. For the defence it was contended that the real criminal was the man who had been convicted in 1877. Petitions from Mr. Beck after conviction to the home office that the case was one of mistaken identity were unavailing, and in prison his clothes were marked with D.W., as an indication that he had been previously convicted. In 1898, Mr. Beck's solicitor approached the home office with a view to reopen the case, Mr. Beck having discovered that Smith was a Jew, and that the police had evidence of this fact. This was admitted by the home office (Smith having in 1879 been examined by the prison doctor at Portland, who reported to the home office that Smith was a Jew), and it was decided that Mr. Beck and Smith were not identical. The D.W. was removed from Mr. Beck's clothing, but the authorities still regarded Mr. Beck as guilty of the charges for which he had been convicted. Mr. Beck was released on licence, July, 1901. In April, 1904, he was re-arrested on a similar charge to that for which he was imprisoned in 1896, was tried before Mr. Justice Grantham and again convicted, but sentence was postponed until the next session. In the interval the ex-convict Smith was arrested on a charge of defrauding women; this led to further inquiries, with the result that Mr. Beck's innocence was proved and he received a "free pardon" in respect of the 1896 and 1904 convictions, with the offer of a grant of 2,000*l.* by the treasury. This was refused by Mr. Beck,

In 1152, Edan O'Hoisin was the first archbishop, at least the first who received the pall, for some of his predecessors are sometimes called bishops of Connaught, and sometimes archbishops, by Irish historians. The see of Mayo was annexed to Tuam in 1559. Tuam is valued in the king's books, by an extent returned anno 28 Eliz., at 50*l.* sterling per annum. *Beaton*. It ceased to be archiepiscopal, conformably with the statute 3 & 4 Will. IV., 1833; and is now a bishopric only, to which Killala and Achonry, a joint see, has been added; see *Archbishops*. TUBERCULOSIS, a disease caused by the development of tubercles, small masses of diseased matter in the lungs (phthisis or consumption), in the face and other parts (lupus).

Dr. Robert Koch, of Berlin, discovered and isolated a minute organism, named *bacillus tuberculosis*, to whose action he attributed the disease, 15 Aug. 1881. In the autumn of 1890, he reported his invention of a lymph (see below, 15 Jan. 1891), by the injection of which into the system, as in vaccination, he hoped to cure the diseases. In Berlin he made many experiments on tuberculous guinea-pigs and human beings, with some success in respect to lupus, but not to phthisis. Dr. Koch was much honoured by the emperor, and was aided by the state. Dr. Koch's full account of his method was published in the *British Medical Journal*, London, 15 Nov., and other papers. Medical men flocked to Berlin from all parts of the world, to obtain the lymph. Exaggerated cases of successful application were published, and it soon appeared that time was required to test the efficacy of the remedy. Much discussion ensued. Dr. Koch, on 15 Jan. 1891, published the statement that his lymph, named *tuberculin*, was a glycerine extract from the pure cultivation of the tubercle bacilli.

TUBULAR BRIDGES. The Britannia Tubular Suspension Bridge, then the most wonderful enterprise in engineering in the world, was constructed, 1846-50 (Mr. R. Stephenson and Mr. Fairbairn, engineers), about a mile southward of the Menai Strait Suspension Bridge.*

On the Britannia rock, near the centre of the Menai Strait, the surface of which is about ten feet above low water level, is built a tower two hundred feet above high water (commenced building,

* The Britannia tubular bridge was intended to supply the place of one of the finest bridges in the kingdom; and the railway, of which the tubular bridge forms a part, is in like manner a substitute for one of the finest mail-coach roads ever constructed. The road from London to Holyhead was regarded as the highway from the British metropolis to Dublin; and the late Mr. Telford was applied to by the government to perfect this route by the London and Holyhead mail-coach road, which he did by erecting a beautiful suspension bridge over the river Conway and over the Menai Strait; commenced in July, 1818, and finished in July, 1825.

May, 1846), and on which rest two lines of tubes or hollow girders strong enough to bear their weight and laden trains in addition, the ends resting on the abutments on each shore; each tube being more than a quarter of a mile in length. The height of the tube within is thirty feet at the Britannia tower, diminishing to twenty-three feet at the abutments. The lifting of these tubes to their places was a most gigantic operation, successfully performed,

TUGENDBUND ("league of Virtue"), formed in Prussia soon after the peace of Tilsit, June, 1807, ostensibly for relieving the sufferers by the late wars, and for the revival of morality and patriotism. Its head-quarters were at Königsberg. It excited the jealousy of Napoleon, who demanded its suppression in 1809. It was dissolved at the peace in 1815.

TUILERIES (Paris), the imperial palace of France, commenced by Catherine de Medicis, after the plans of Philibert de l'Orme, 1564; continued by Henry IV.; and finished by Louis XIV. This palace was stormed by the mob, 10 Aug. 1792; and ransacked in the revolutions of July, 1830, and Feb. 1848. Louis Napoleon made it his residence in 1851, and greatly renovated it. The restoration of the Tuileries (much injured by fire by the communists, May 1871) was determined on, Oct. 1872; not proceeded with. The ruins were sold for 32,200*l.* to M. Picard, 4 Dec. 1882.

TULCHAN BISHOPS; a mere nominal episcopacy set up in Scotland by the regent Morton, who, with other nobles, absorbed the larger portion of the revenue, 1572-3. *Tulchan* was a stuffed calf's skin set before a cow to facilitate milking.

TULIPS, indigenous in the east of Europe, came to England from Vienna about 1578. It is recorded in the register of Alkmaar in Holland, that in 1639, 120 tulips, with the offsets, sold for 90,000 florins; and that one, called the *Viceroy*, sold for 4203 guilders! The States stopped this ruinous traffic. The *tulip tree*, *Liriodendron tulipifera*, was brought to England from America, about 1663.

TUNIS (N. Africa) stands nearly on the site of Carthage. Tunis was besieged by Louis IX., of France, who died near it 25 Aug. 1270. It remained under African kings till taken by Barbarossa, for Solymann the Magnificent, 1531. Barbarossa was expelled by the emperor Charles V., when 10,000 Christian slaves were set at liberty, June, 1535. The country was recovered by the Turks under Selim II. 1575. The bey of Tunis was first appointed in 1574; Tunis was reduced by admiral Blake, on the bey refusing to deliver up the British captives, 1655. The Hussein dynasty was founded 1705. In July, 1856, the bey agreed to make constitutional reforms. He died 22 Sept. 1859; and his brother and successor Mohamed-es-Sadok took the oath of fidelity to the constitution. He died, and was succeeded by his brother Sidi Ali, 28 Oct. 1882; died, 11 June, 1902; succeeded by his son Mohamed; succeeded by Mohamed en Nasir, 1906. Tunis made a French protectorate, 1882. TUNNAGE AND POUNDAGE were ancient duties levied on every tun of wine and pound of other goods, imported or exported, and were the origin of our "customs." They commenced in England about 1346, and were granted to the kings for life, beginning with Edward IV. Charles I. gave great offence by levying them on his own authority, 1628. They were granted to Charles II. for his lifetime, 24 June, 1660. By the act 27 Geo. III. c. 13, these and other duties were repealed, 1787, and a new arrangement of excise and customs was introduced.

TUNNELS, for drainage, are ancient. The earliest tunnel for internal navigation was executed by M. Riguey, in the reign of Louis XIV., at Beziers in France. The first in England was by Mr. Brindley, on the duke of Bridgewater's canal, near Manchester, about 1766. Project of the Gravesend tunnel, 1800—the report upon it, 1801. The Thames Tunnel was projected by Mr. Brunel in 1823, and opened for foot passengers, 25 March, 1843; see *Thames Tunnel*. Innumerable tunnels have been made for railways. The railway tunnel at Liverpool was completed in the middle of 1829, lit up with gas, and exhibited once a week. See *Alps* [Mont Cenis, etc.] and *Thames*.

TURBINES. The first steam turbine-fitted vessel, the *Turbinia*, was constructed by the hon. C. A. Parsons at his works at Newcastle-on-Tyne. The *Turbinia*, a small vessel, 100 ft. in length, underwent her first trial 4 Nov. 1894. The system rapidly developed, owing to the increased speed of the vessels fitted with turbine engines, and the economy effected in coal by their use; improvements being made in their construction and the application of the system to various types of ships, including liners and vessels of the royal navy. The turbine-driven torpedo-boat-destroyer *Viper* was lost off the Channel Islands in 1896; and the t.-b.-d. *Cobra* suffered a similar fate in the North Sea in 1897. The first Clyde passenger-ship, *King Edward*, was built in 1901, followed by the *Queen Alexandra* and the *Princess Maud*, 1903. The first turbine ss. for the Atlantic passenger service, the Allan line *Victorian*, 16,000 tons gross, was launched in 1904; and in the same year a sister ship, owned by the same line, the *Virginian*, 11,000 tons gross, was also launched. The *Virginian* crossed the Atlantic in 4 days 4 hrs., (allowing for difference in British and Canadian time); she left Moville 2 p.m. 9 June, and passed Cape Race, Newfoundland, 11 p.m. on 13 June, 1905. The *Carmania*, a Cunarder, 21,000 tons gross, 21,000 indicated h.p., with a speed of 21 knots, fitted with turbines, with accommodation for 2,656 passengers, was launched 21 Feb. 1905, and on her trial trips attained a speed of 19½ knots in a prolonged run. Other large liners and war vessels driven by turbines have since been constructed. See also *Shipping*, *Steam Engine*, and *Navigation*, *Navy*, and *Addenda*.

New American Scout Cruisers.—The Parsons turbine wins, in a 24 hours' speed test to determine the relative efficiency and coal consumption of varying types of engines, by 12 miles, maintaining an average speed of 25½ knots, over a course of 280 miles between Block Island and Sandy Hook . . . 14 April, 1909

TURIN, the ancient Augusta Taurinorum in Piedmont, capital of the Sardinia States, and of the kingdom of Italy, till 1864, when it was superseded by Florence. Its importance dates from the permanent union of Savoy and Piedmont in 1416. The French besieged this city; but prince Eugène

defeated their army, and compelled them to raise the siege, 7 Sept. 1706. In 1798, the French republican army took possession of Turin, seized all the strong places and arsenals of Piedmont, and obliged the king and his family to remove to the island of Sardinia. In 1799, the French were driven out by the Austrians and Russians; but the city and all Piedmont surrendered to the French, June 1800. In May 1814, it was restored to the king of Sardinia; see *Italy*, 1864. Here prince Humbert was married to his cousin Margherita amidst great rejoicing, 22 April, 1868. The monument to Cavour was inaugurated, 8 Nov. 1873. An exhibition opened by the king, 26 April, 1884; another opened by the king, 1 May, 1898. Monuments to prince Amadeus of Savoy (ex-king of Spain) and to king Humbert, inaugurated, 7, 8 May. Internat. art exhibition opened by the king, 10 May; closed, 12 Nov. 1902. Fire in the library (founded by king Victor Amadeus II.) of the university; several rooms destroyed, one containing valuable Egyptian, Babylonian, and Assyrian papyri; over 100,000 books burnt or destroyed by water, 25 Jan., 1904. See *Treaties*, and *Italy*, 1884. Population, 1900, 335,539; 1910 (est.), 375,000.

TURKESTAN, called by the Persians Turan, formerly Independent Tartary (*which see*), the original country of the Turks, in Central Asia, was reached by Alexander, 331 B.C., and has since undergone many changes, forming successively part of the empires of Genghis Khan and Tamerlane (see *Tartary*). For Eastern or Chinese Turkestan, see *Kashgaria*; for Western, see *Bokhara* and *Khiva*. The Russians gradually encroached on this country; on 14 Feb. 1865, a new province, Turkestan, was created by decree, and gen. Kauffmann made governor, 26 July, 1867; died 16 May, 1882. The rule of the czar accepted by the chief tribes at Merv (*which see*), announced 8 Feb. 1884. Gen. Dukhowski appointed gov.-gen. of Turkestan and the Transcaspian territory, April, 1898. Explorations and discoveries by Dr. Sven Hedin in 1895, and by Dr. Stein, June-Dec. 1900. Severe earthquake shocks at Andijan, in Ferghana, 10,000 deaths, 15,000 houses destroyed, 16 Dec. 1902.

TURKEY. The Turks were originally a tribe of Tartars; but, by incorporation with the peoples they have conquered, have become a mixed race. About 760, they obtained possession of a part of Armenia, called from them Turcomania. They gradually extended their power; but in the 13th century, being harassed by other Tartar tribes, they returned to Asia Minor. The Turkish empire till 1878 comprehended the almost independent principalities of Moldavia and Wallachia, Servia, and Montenegro, the hereditary vice-royalty of Egypt, and Tunis. The Turkish quadrilateral for-

tresses were Shumla, Varna, Silistria, and Rust-chuck. The population of the empire was estimated in 1887 at 32,978,100; (immediate Possessions, 21,633,000, tributaries and protectorates, 11,345,100); in Europe, 8,987,000; Asia, 16,174,100; Africa, 7,817,000; 1901, in Europe, about 6,000,000; total, including Asia, &c., about 30,732,900. By the treaty of Berlin (13 July, 1878) Turkey was said to have

	Square Miles.	Inhabitants.	Mohammedans.
Ceded to Roumania . . .	5,935	246,000	142,000
„ Servia . . .	4,326	264,000	75,000

Included in Eastern Roumelia . . .	13,646	746,000	265,000

If the provinces "indefinitely" to be occupied by Austria, Bulgaria, and Eastern Roumelia are excluded, there remain to Turkey in Europe only 74,790 square miles, with 4,779,000 inhabitants, of whom 2,521,500 are Mohammedans. In Armenia Russia takes 10,000 square miles, with about 350,000 inhabitants. Cyprus, entrusted to the keeping of England, has an area of 3,584 square miles, and 237,000 inhabitants in 1901. Thessaly ceded to Greece by convention, 24 May; treaty signed, 2 July, 1881. The Ottoman Empire now consists of about 66,500 sq. miles in Europe, 680,000 sq. miles in Asia, and 400,000 sq. miles in Africa. The estimated population, 1910, being 30,000,000. TURNER'S LEGACIES. Joseph M. W. Turner, a great landscape painter, was born in April, 1775, and died 19 Dec. 1851. He bequeathed to the nation all the pictures and drawings collected by him and deposited at his residence, 47, Queen Anne-street, London, on condition that a suitable gallery should be erected for them within ten years; and directed his funded property to be expended in founding an asylum at Twickenham for decayed artists. The will was disputed by his relatives, but a compromise was made. The oil-paintings (100 in number) and the drawings (1,400) were obtained by the nation, and the engravings and some other property were transferred to the next of kin. The drawings were cleaned and mounted under the careful superintendence of Mr. Ruskin, and the pictures were sent to Marlborough-house for exhibition. In 1861, many of the pictures were removed from the South Kensington Museum to the National Gallery, others in 1869. TYLER'S INSURRECTION, in opposition to the poll-tax imposed on all persons above 15, 5 Nov. 1380. One of the collectors, acting with indecent rudeness to Wat Tyler's daughter, was struck dead by the father, June, 1381. His neighbours took arms, and in a short time almost the whole of the population of the southern and eastern counties rose, extorting freedom from their lords, and plundering. On 12 June, 1381, they gathered upon Blackheath to the number of 100,000 men, and on 14 June murdered Simon of Sudbury, archbishop of Canterbury, and sir Robert Hales, the royal treasurer. The king, Richard II., invited Tyler to a

parley, which took place on the 15th at Smithfield, where the latter addressed the king in a menacing manner, now and again lifting up his sword. On this the mayor, Walworth, stunned Tyler with a blow of his mace, and one of the king's knights named Cavendish, dispatched him. Richard temporised with the multitude by promising a charter, and thus led them out of the city, when sir R. Knollys and a band of knights attacked and dispersed them with much slaughter. The insurrection in Norfolk and Suffolk was subdued by the bishop of Norwich, and 1500 of the rebels were executed.

TYPE-WRITERS. M. Foucault sent to the Paris exhibition of 1855, a writing-machine for the blind; and several were invented by Wheatstone. After successive improvements, Messrs. Remington, in America, in 1873, contracted to construct 25,000. The standard speed is between 60 and 70 words per minute, the record 208. Many other types are in existence, including the Yost, Hammond, Oliver, Simplex, Bar-lock and Smith-Premier.

TYRANT. In early Greek history, the term was applied to any man who governed with irresponsible power. Solon objected to the term, and chose the name Archōn (ruler), 594 B.C. The earliest tyrants were those at Sicily, beginning with Cleisthenes, in the 7th century B.C. Tyranny declined in Greece about 490 B.C., and revived after the close of the Peloponnesian war, 404 B.C.; see *Thirty Tyrants*.

TYRE (Phœnicia), a great city, said to have been first built by Agenor. Another city was built 1257 (about 2267, *Hales*) B.C. It was besieged by

the Assyrians, who retired from before it, after a siege of upwards of five years, 713 B.C. Taken by Nebuchadnezzar, 572 B.C., and the city demolished, when the Tyrians removed to an opposite island, and built a new and magnificent city. It was taken by Alexander with much difficulty, after a siege of seven months, July, 332 B.C. He joined the island to the continent by a mole. *Strabo*. Tyre was captured by the Crusaders, 7 July, 1124; by the French, 3 April, 1799; and by the allied fleet during the war against Mehemet Ali, 1841.

TYRE, ERA OF, began on 19 Oct. 125 B.C., with the month of Hyperberetaus. The months were the same as those used in the Grecian era, and the year is similar to the Julian year. To reduce this era to ours, subtract 124; and if the given year be less than 125, deduct it from 125, and the remainder will be the year before Christ.

TYROL, the eastern part of ancient Rætia, now a province of the Austrian empire, was ceded to the house of Hapsburg in 1363 by Margaret, the heiress of the last count. It became an appanage of the younger (or Tyrol) branch of the imperial house, which came to the throne in the person of Maximilian II., in 1618. The French conquered the Tyrol in 1805, and united it to Bavaria; but in 1809 an insurrection broke out, headed by Andreas Hofer, an innkeeper, who drove the Bavarians out of the Tyrol, thoroughly defeated some French detachments, but laid down his arms at the treaty of Vienna. He was subsequently accused of correspondence with the Austrians, captured and sent to Mantua, and there shot by order of the French government, 20 Feb. 1810. The Austrian emperor ennobled his family in 1819, and erected his statue in Innsbruck in 1834; another statue on the Iselberg was unveiled in the presence of the emperor Francis Joseph, 28 Sept. 1893. The Tyrolese riflemen were very effective in the Italian war in 1859. The Arlberg tunnel railway from Innsbruck to Bregenz inaugurated by the emperor 20 Sept. 1884. Population in 1890, 812,696; 1900, 850,062; 1910 (est.), 991,750.
